Estimates, amounting to Rs. 8,697, for the
manufacture of — in the Sangam Project
division during 1886-87, sanctioned.

Estimate (a).

The rate for lime given in the
District Schedule is 4 1/2 Annas
or 5 Annas per pore which is
equal to Rs 5.15.00 to the 100
per Cawdy.

The rate Rs 5.1.00 per Cawdy allowed
in the Estimate is the average rate
of the District.

Estimate (b).

The rate allowed for rough
logs is 9 Annas per c. ft. the
Schedule rate being 5 to 8 Annas.
The cost price of timber is
however subject to fluctuation.

Recommended that the Estimate
be sanctioned.

Letter No. 285 S.G.

Dated the 3rd July 1886

From the C.E. 2nd Circle

NOTE OF REMARKS.

1. The accompanying estimates as follows are for
(a) Manufacture of lime at Sangam Estimate Rs 626
(b) Manufacture of country wood planks and scantlings Estimate Rs 2436
Estimate (a)
The rates cannot be checked for want of details. The estimate schedule gives rate for lime at so much a parakh, & unless it is known how many parakhs of 2 1/3 Cft. go to a Candy, it cannot be checked.
3. The measure adopted in estimate under reference is only used in some districts & in each they vary.
4. Further the outturn as shown in estimate is missing. As a rule the outturn of a kiln charged with 100 parakhs of any description of lime should

yield 150 or the very least
125 per cent. I mean when
the lime is slaked. The
estimate shows the
outturn of slaked lime, as
being equal to the quantity
charged.

5. It is not stated in esti-
mate whether it is stone
or shell lime.

6. Estimate (6.)

Increased rate is allowed
for logs in rough. The
schedule rate is from
6 to 8 annas per cft.
whereas in estimate
annas 9 per cft. is mentioned.

This increased rate though
it seems small, it yet
comes up to great deal
when the total quantity
is considered.
