Letter from Messrs Morison & Sons dated 4th August 1886

We have the honor to bring to your notice & consideration that, we, in the early part of 1885, among other undertakings built & established a factory for the manufacture of Copal Varnishes, Japans &c &c of every kind. We believe no factory of this kind existed in India previous to ours & as the Government of India always professed a desire that all departments should purchase the country manufactured article in preference to the imported one, when prices & quality allowed, we naturally looked for substantial support from that quarter. To make certain that our manufactures should hold their own in quality with what was imported from England, we with considerable trouble & at some expense, engaged the services of a varnish maker who had already earned a reputation for himself, for he had made the varnishes which obtained the "Gold medal" at the Calcutta Exhibition 1883-84. We made a large quantity of various varnishes, suitable for all purposes, & appointed Agents in Calcutta & Bombay. Our sales however have been on a very small scale. This has not been due to the inferior quality of our varnishes, as the enclosed copies of our testimonials will show. It partly arose from a strong prejudice on the part of the Railway Companies & partly to the standing custom of importing & holding more than a years stock for their requirements. The outlook is now so discouraging that in spite of all our enterprises and the expense we have gone to, we fear we shall be compelled to close the factory. At this crisis we are compelled to address the Government begging that some interest may be shown in our favor. The various Railway Companies & Public Works Department must consume a large quantity

of varnishes &c. We feel confident that we shall be able to meet all their wants and satisfy them both as to price and quality.

We also make waterproof cloth, Tarpaulins, American cloth & Oil cloth & shall be glad to send samples on application.

Endorsement thereon by the Public Department No 1406 C dated 20th August 1886.

Transferred to the Public Works Department for disposal

(By Order)

(Signed) Sidney Laffan.

Under Secretary.

Order thereon No 2133 W dated 24th August 1886.

Communicated to officers of the Public Works Department for information.

2. The Government desire to encourage in every possible way the use of stores of Indian manufacture, if they are suitable for the public service and not more expensive than that imported articles.

To make certain that our manufactures should hold their own in quality with what was imported from England, we with considerable trouble & at some expense, engaged the services of a varnish maker who had already earned a reputation for him self, for he had made the varnishes which obtained the "Gold medal" at the Calcutta Exhibition 1883-84. We made a large quantity of various varnishes, suitable for all purposes, & appointed Agents in Calcutta & Bombay. Our sales however have been on a very small scale. This has not been due to the inferior quality of our varnishes, as the enclosed copies of our testimonials will show. It partly arose from a strong prejudice on the part of the Railway Companies & partly to the standing custom of importing & holding more than a years stock for their requirements. The outlook is now so discouraging that in spite of all our enterprises and the expense we have gone to, we fear we shall be compelled to close the factory. At this crisis we are compelled to address the Government begging that some interest may be shown in our favor. The various Railway Companies & Public Works Department must consume a large quantity

of varnishes &c. We feel confident that we shall be able to meet all their wants and satisfy them both as to price and quality.

We also make waterproof cloth, Tarpaulins, American cloth & Oil cloth & shall be glad to send samples on application.

Endorsement thereon by the Public Department No 1406 C dated 20th August 1886.

Letter from Messrs Morison & Sons dated 4th August 1886

We have the honor to bring to your notice & consideration that, we, in the early part of 1885, among other undertakings built & established a factory for the manufacture of Copal Varnishes, Japans &c &c of every kind. We believe no factory of this kind existed in India previous to ours & as the Government of India always professed a desire that all departments should purchase the country manufactured article in preference to the imported one, when prices & quality allowed, we naturally looked for substantial support from that quarter. To make certain that our manufactures should hold their own in quality with what was imported from England, we with considerable trouble & at some expense, engaged the services of a varnish maker who had already earned a reputation for himself, for he had made the varnishes which obtained the "Gold medal" at the Calcutta Exhibition 1883-84. The outlook is now so discouraging that in spite of all our enterprises and the expense we have gone to, we fear we shall be compelled to close the factory. At this crisis we are compelled to address the Government begging that some interest may be shown in our favor. The various Railway Companies & Public Works Department must consume a large quantity

of varnishes &c. We feel confident that we shall be able to meet all their wants and satisfy them both as to price and quality.

We also make waterproof cloth, Tarpaulins, American cloth & Oil cloth & shall be glad to send samples on application.

Endorsement thereon by the Public Department No 1406 C dated 20th August 1886.

Transferred to the Public Works Department for disposal

Letter from Messrs Morison & Sons dated 4th August 1886

We have the honor to bring to your notice & consideration that, we, in the early part of 1885, among other undertakings built & established a factory for the manufacture of Copal Varnishes, Japans &c &c of every kind. We believe no factory of this kind existed in India previous to ours & as the Government of India always professed a desire that all departments should purchase the country manufactured article in preference to the imported one, when prices & quality allowed, we naturally looked for substantial support from that quarter. To make certain that our manufactures should hold their own in quality with what was imported from England, we with considerable trouble & at some expense, engaged the services of a varnish maker who had already earned a reputation for himself, for he had made the varnishes which obtained the "Gold medal" at the Calcutta Exhibition 1883-84. We made a large quantity of various varnishes, suitable for all purposes, & appointed Agents in Calcutta & Bombay. Our sales however have been on a very small scale. This has not been due to the inferior quality of our varnishes, as the enclosed copies of our testimonials will show. It partly arose from a strong prejudice on the part of the Railway Companies & partly to the standing custom of importing & holding more than a years stock for their requirements. The outlook is now so discouraging that in spite of all our enterprises and the expense we have gone to, we fear we shall be compelled to close the factory. At this crisis we are compelled to address the Government begging that some interest may be shown in our favor. The various Railway Companies & Public Works Department must consume a large quantity

CURRENT NO. 5164

Arcot 4th August 1886.

The Secretary to Government
Public Department
Madras.

Sir,

We have the honor to bring to your notice & consideration that, we, in the early part of 1885, among other undertakings built & established a factory for the manufacture of Copal varnishes, Japans &c &c of every kind. We believe no factory of this kind existed in India previous to ours & as the Government of India always professed a desire that all departments should purchase the country manufactured article in preference to the imported one, when prices & quality allowed, we naturally looked for substantial support from that quarter. To make certain that our manufactures should hold their own in quality with what was imported from England, we with considerable trouble & at some expense, engaged the services of a varnish maker who had already earned a reputation for himself, for he had made the varnishes which obtained the "Gold medal" at the Calcutta Exhibition 1883-84. We made a large quantity of various varnishes, Suitable for all purposes, and appointed Agents in Calcutta & Bombay. Our sales however have been on a

small scale. This has not been due to inferior quality of our varnishes, as the enclosed Copies of our testimonials will show. It partly arose from a strong prejudice on the part of the Railway Companies & partly to the standing custom of importing & holding more than a years stock for their requirements. The outlook is now so discouraging that in spite of all our interprises and the expense we have gone to, we fear we shall be compelled to close the factory. At this crisis we are compelled to address the Government begging that some interest may be shown in our favor. The various Railway Companies & Public Works department must consume a large quantity of varnishes &c. We feel confident that we shall be able to meet all their wants and satisfy them both as to price & quality.

We also make waterproof cloth, Tarpaulins, American cloth & Oil cloth & shall be glad to send Samples on application.

We have the honor to be,
Sir
Your most obed. Servts.

ANGLO-INDIAN VARNISH MANF'G CO.
PROPRIETORS.

Messrs Deschamps & C.
Madras, Calcutta & Bombay.
By appointment to H.H. The Prince of Wales
Gold medals, Paris & Vienna.

To
Messrs Morison & Sons,
Proprietors, Anglo-Indian Varnish
Manufacturing Co.
Arcot

Dear Sirs,

We have much pleasure in stating that the several trials we have made in our factory with your varnishes have proved a complete success.
We have found your varnish as well as your Japan a really good substitute for the very costly varnish received from England & France, & we have not the slightest doubt that your products in Varnish & Japan can easily compete with those from Europe.
It was a long felt want in the country to have a European manufactory of good varnish; the want is now satisfied by the Anglo-Indian Varnish Factory you have established at Arcot. We can safely recommend your products as really good & equally durable.
We shall arrange to have our regular supplies from your firm.
