Draftsmen for the Godavari Eastern Division

Temporary establishment of —, sanctioned.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following papers:—

No. 9 E.W.

Note by the Chief Engineer for Irrigation.

The arrangements necessary to be made to enable the works in progress in the Godávari delta to be carried out properly, and the large grants now made to the delta to be expended, have been discussed with the Superintending Engineer and Executive Engineer. The quarries are now being worked on an extended scale, and there is likely to be a great demand on them for a long time to come; they are at present in charge of the Eastern delta division officer, who has a very heavy charge, probably the heaviest in the presidency, and requires his hands to be strengthened. He has at present six sub-divisions, as follows:—

1. Head-quarters.
2. Workshop.
3. Northern.
4. Southern.
5. Rajahmundry.
6. Dumagudem.

It is proposed now to sub-divide the Headquarters sub-division into (*a*) Anicut and (*b*) Quarry, and thus to give the division seven sub-divisions. An Assistant Engineer will then be able to devote his whole attention to the quarries. This arrangement is recommended for sanction, and a statement, in prescribed form, for the necessary small addition to the office establishment is forwarded.

2. The Anicut sub-division it is proposed to place in charge of the anicut superintendent, D. Ramanah Naidu, who has been frequently recommended for promotion and for transfer to the permanent establishment as a supervisor. When the status of anicut superintendents was considered some time ago, the undersigned stated his opinion that they should not be transferable, but that they should receive increments of pay for long service and merit. In a memorandum written in January 1880, Colonel Mullins said, with reference to D. Ramanah Naidu, "it is possible that at a future time it may be proper to recommend that he should be given a personal allowance to make up his salary to Rs. 150 a month." Since that time five years have elapsed, and he has invariably been well reported on and recommended for promotion. It is considered therefore that his pay should now be raised to Rs. 150 a month, and sanction to this increase is recommended.

Ellore Canal,

Note by the Chief Engineer for Irrigation,	„	30th July „	„ 73 E.W.

Order—dated 7th August 1885, No. 1830 W., Public Works.

The proposal of the Chief Engineer for Irrigation to divide the Headquarters sub-division of the Godávari Eastern division into two—the Anicut sub-division and the Quarry sub-division—is approved.

2. The anicut superintendent, D. Ramanah Naidu, will be in charge of the Anicut sub-division; and his pay while in such charge will be raised to Rs. 150 inclusive of sub-divisional allowance, as recommended by the Chief Engineer for Irrigation.

3. The Superintending Engineer, I Circle, is authorised to entertain the necessary sub-divisional office establishment,* the cost of which will be met from savings under Establishment.

* 1 Clerk, IV class, 3rd grade.
1 Lascar, Rs. 6.

4. The sanction accorded in these proceedings, which will have effect from 1st April 1885, has been registered as Provincial, No. 31 W. of 1885-86, and classified as Establishment, Permanent.

Headquarters Sub-division

Proposal of the Chief Engineer for Irrigation to divide the — of the Godávari Eastern division into two, the Anicut sub-division and the Quarry sub-division, approved.

5th September 1885, No. 2072 W., Public Works.

5

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following papers:—

From Lieutenant-Colonel P. MONTGOMERIE, R.E., Superintending Engineer, I Circle, to the Chief Engineer, Public Works Department, dated Waltair, 26th May 1885, No. 53 C.

With reference to paragraph 4 of G.O., No. 1147 W., dated 15th May 1885, I have the honor to report that the reductions which can be effected in the existing temporary establishment of this circle will depend on the amounts by which the grants for the works are reduced.

2. Should it be determined to make material reductions in the grants, the two temporary divisions for the Rushikulya project and the Central delta of the Godávari might be provisionally absorbed into the Ganjam division and the Godávari Eastern delta division, respectively, the works being carried on by one or two sub-divisions in each case according to requirements.

3. In any case the Rushikulya project division might be amalgamated with the Ganjam division, as the limited supply of labor available in the Ganjam district precludes the possibility of the project works being vigorously pushed on with, except to the detriment of the rest of the district.

4. Should it be necessary to temporarily absorb the Central delta division into the Eastern delta division, Godávari, the necessity for a separate sub-division for the Dowlaishweram quarries would cease and the lately sanctioned southern sub-division of the Eastern delta division might also be provisionally abolished.

5. The establishment of this circle is at present four upper subordinates below the sanctioned strength, although there are two temporary Assistant Engineers more than the authorized number. These latter unless they are natives who have had a good practical training in the department are generally a very doubtful acquisition.

6. The services of the following members of the temporary establishment may be dispensed with according to the necessities of the case:—

Mr. Lowry, Temporary Assistant Engineer.
" O'Flaherty, do. do. do.
" deClosets, do. do. do.
" Mathews, do. do. do.

The number of the temporary subordinates cannot be reduced unless it is determined to discontinue the works altogether.

From the Superintending Engineer, I Circle, to the Chief Engineer, Public Works Department, dated Dowlaishweram, 10th June 1885, No. 543 G.D.

With reference to your memorandum, No. 801 C., dated the 16th April 1885, I have the honor to submit herewith for sanction two statements, one showing the actual amounts of salary provisionally audited by the Examiner of Public Works Accounts in 1884-85, and another showing the temporary establishment required for 1885-86 in the Godávari Eastern division.

Extract from letter from the Superintending Engineer, I Circle, dated 11th June 1885, No. 560 G.D.

* * * * *

"4. The verification of the plans sent to the Eastern division, Godávari, has been delayed for want of draftsmen, for whom provision has been made in the statement of temporary establishment required for 1884-85, which was sent to Government in January 1885, but it has been returned for revision. A fresh statement has been submitted."

No. 63 E.W.

True copy forwarded to the Chief Engineer, Public Works Department, with a request that early sanction may be accorded to the employment of the temporary draftsman therein referred to.

Chepâk,
22nd June 1885.

(Signed) A. W. SMART, Captain, R.E.,
for Chief Engineer for Irrigation.

From the Superintending Engineer, I Circle, to the Chief Engineer for Irrigation, dated Dowlaishweram, 4th August 1885, No. 967 G.D.

With reference to your memorandum, No. 12 G., dated 19th June 1885, I have the honor to inform you that, as already stated in this office No. 560 G.D., dated 11th ultimo, the verification of the plans sent to the Executive Engineer, Eastern division, Godávari, has been delayed for want of draftsmen, for whom provision has been made in the statement of temporary establishment required for 1885-86, which was submitted to the Chief Engineer, Public Works Department, with this office letter, No. 543 G.D., dated 10th June 1885, for the sanction of Government.

No. 77 E.W.

Forwarded to the Chief Engineer, Public Works Department, in continuation of this office No. 63 E.W., dated 22nd June 1885.

Chepâk,
14th August 1885.

(Signed) A. W. SMART, Captain, R.E.,
for Chief Engineer for Irrigation.

Order—dated 5th September 1885, No. 2072 W., Public Works.

In the statement of temporary establishment required for the Godávari Eastern division during 1885-86, the provision made for additional office establishment to be employed in the quarry sub-division has been struck out, as in existing circumstances sanction cannot be given to any addition to the temporary establishment already employed. The provision for an Assistant Engineer has also been struck out, as the item has been separately provided for. The comparative statement A, as corrected, is sanctioned.

2. The Examiner of Public Works Accounts is authorised to admit in the accounts for 1884-85 the cost of establishment detailed in statement B.

3. The Superintending Engineer will submit, through the Chief Engineer for Irrigation, a proposition statement in the prescribed form for the number of draftsmen actually required for verification of plans in the Godávari Eastern division. In the meanwhile he is authorised to employ the men.

4. In his letter, dated 26th May 1885, No. 53 C., the Superintending Engineer proposes to amalgamate the Rushikulya and the Ganjam divisions. The permanent

amalgamation of these divisions having been already ordered in G.O., No. 907 W., dated 16th April 1885, such proposals as may be necessary for carrying out the same should be submitted for approval.

5. The sanction accorded in paragraph 1 of these proceedings has been registered as Provincial No. 36 W. of 1885-86, and classified as Establishment, Temporary.

Statement A.

To accompany letter No 1584 G.D. dated 21st September 1884 from the Supg Engineer 1st Circle to Chief Engineer for Irrigation.

Account Current of Stock Manufacture 1883-84

NO. 1584 G.D. 90

FROM,
THE SUPERINTENDING ENGINEER
FIRST CIRCLE.

TO,
THE CHIEF ENGINEER
FOR IRRIGATION

DOWLAISHWERAM, 21st September 1884.

SIR,

I have the honor to submit for the information of Government the following Report on the Operations connected with the preparation and supply of Materials, by the Head Quarters Sub-division at Dowlaishweram during the Official year 1883-84.

2. At the commencement of the year under notice the balance at debit of the operations amounted to Rs 27,866-3-0 as per accompanying statement (A)- this sum was made up of the following ite

Material in hand on 1st April 1883 valued at Quarry rates	11,153-11-7
Stock manufacture including Land & Kilns	21034-7-
Amount written back in the Supplemental accounts for March 1883 as due to debits erroneously made in July 1882	
Total Rs	27,866-3-

3. Before referring to the details of the Operations during the year it will b

necessary to explain here that up to April 1883 no seperate account had been kept of the outlay incurred under the Subhead "Land & Kilns" but all sums hitherto expended on such works as tramways, Quarry Channels, wharf walls, compensation for Land, Kilns &c were included under the general Subhead "Stock manufacture". In order to facilitate the more gradual recoupment of the outlay on these somewhat expensive Preliminaries to the preparation of materials on a large scale the method of procedure laid down in para 2234 of the P.W.D. Code was ordered by Government to be adopted and the amounts debitable under each of these Sub heads were roughly estimated as follows.

Stock manufacture	Rs 14,867-6-0
Land & Kilns	6167-1-5

During the year under notice the following expenditure was incurred under

Stock manufacture as per statement (D)	82,868-9-11
Land & Kilns as per Statement (B)	16,063-4-3
Other purchases	4408-1-6
Making up a total debit against the operations of the year of Rs	131,206-2-8

Against this the recoveries during the year

On account of materials issued at Bill rates including Special adjustments amounted to Rupees		89,597-13-9
The materials in hand on 31st March 1884 estimated at Quarry Rates was		18,833-0-1
And the balances at debit of		
Stock manufacture	13,044-15-2	
Land & Kilns	7730-5-8	22,775-4-10
Total Rs		1,31,206-2-8

From the above statement it would appear that the debit against Stock

Manufacture & Land	22775-4-10
and Kilns had been	21034-7-5
increased by Rs	1740-13-5

But as a set off against this must be placed the following sums-

Amounts expended on Land & Kilns during the year as per Statement (B)	16,063-4-3
The difference between the amounts of Quarry percentage recoverable on material in hand at end & commencement of the year as per statement (C)	12,180-5-3
Total Rs	28,243-9-6
From which it will be seen that the gross earnings during the year under review amounted to	26,502-12-1
And the net profit will be this amount less the expenditure on Land & Kilns	16,063-4-3
Rs	10,439-7-10

4. So far the operations of the Subdivision have been a success financially and it is not proposed to make any material change in the rates at which the materials will be issued. But in order to secure uniformity in practice and to prevent the growing tendency to the introduction of a number of meaningless descriptions of materials in the accounts the accompanying Statement (E) shewing the several descriptions of material that will be supplied and the rates at which they will be issued together with the detailed Data from which these rates have been arrived will with your approval be published for general information and guidance.

5. In his Notes of Inspection of Decr 1877 para (2) the late Chief Engineer for Irrigation suggested that all quarry rubbish including small rough stone and broken stone for concrete should be excluded from the Stock accounts of the Quarries. There is no doubt that the Quarries are much congested with the storage of this Quarry rubbish, and the Quarrying of really good building stone is much hampered thereby. The receipts from these descriptions of material are however by no means inconsiderable. Small rough stone for River works being charged 1 Rupee and stone broken small for Concrete 12 annas per Cubic yard. and it will be seen from Statement E, showing the Principal materials supplied during the past official year and the requirements of next that if the quarries discontinue entirely the supply of these descriptions of material there will be either a loss on the operations or the rates for other materials must be raised.

6. With the view to relieving the quarries of this rubbish the term concrete will be abolished, and all this description of material will in future be issued under one head viz: "small rough stone" (which may be utilised by the Executive Officers either as concrete or for river defences) and will be issued at one uniform rate of 12 annas per Cubic yard. There will then be no inducement to the old habits of the Quarry Establishment to fill up the quarries with concrete stone and there will be a considerable inducement to the issue of [illegible]

rough stone for river works &c which at present remains for years in the quarries.

7. With the exception of this temporary congestion the Quarries at Dowlaishweram are now in first rate working trim and not much more than the completion of the existing system of tram lines will be required. But in order to meet the increasing demands for stone it is intended to improve the tramlines at the Yerrampallem Quarries so as to enable a locomotive to be worked on them. These Quarries as you are probably aware contain the very best building material in the neighbourhood.

8. As regards the administrative working of the present system for the preparation and supply of materials for the Delta works it is with considerable reluctance that I am obliged to report that it is most unsatisfactory. Had it not been for the extreme good nature and obligingness of the Executive Engineer of the Eastern Dn who has to supply materials for the other two Divisions as well as for the numerous works in his own Division the bouleversement which commenced this time last year in connection with the supply of material for the Completion Estimates would long ere this have been complete. The present arrangement may have worked when the whole of the Delta was under one Superintendent of Works & before the Completion Estimates were taken up all over the Delta. But now it is simply impossible as each Executive Engineer has quite as much work as he can attend to without the supply of materials to other Divisions. And I would very respectfully submit that the arrangement is not only unfair to each of the Executive Officers concerned but places the Superintending Engineer in an entirely false position

9. I have postponed as long as I could bringing this matter to your notice but the time has arrived when either immediate steps must be taken for the entire separation of the preparation and supply of material from the execution of the works, or else each Division must prepare its own material, otherwise very considerable modifications in the grants of allotments will have

made and the completion of the works delayed.

10. I would recommend that if a suitable Officer is available a temporary Executive Division be formed with the Workshops and Quarries as two Subdivisions. The necessary Establishment could be paid from the earnings of these institutions so long as the Delta works are under construction, after they are completed the existing arrangement might be reverted to.

11. Whether a temporary Division is authorized or not the charge of the Quarries & Kilns which must be worked impartially and uninterruptedly throughout the whole year must be entirely separate from the Head Quarters Subdivision of the Eastern Division. and pending the approval of Government I have directed Mr Mathews who is at present in charge of the entire Subdivision to be relieved of all works except the Quarries the Lime Kilns and the cement works. and Ramanah Naidu the Anicut Superintendent to assume charge of the Head Quarters Subdivision.

12. I have therefore to request sanction for the formation of the Quarries into a separate and distinct Subdivision. And until a Subordinate of some standing and experience is appointed to the Head Quarters Subdivision that Ramanah Naidu be permitted to act as Sub-Divisional Officer.

13. Besides the repairs of the Anicuts and Head Works and the Conservancy of the River in their immediate vicinity which it is proposed to take up systematically several new buildings have to be constructed at Head Quarters and I request that the extra Subordinate now applied for be posted at an early date.

I have the honor to be,
Sir,
Your most obedient St.
R. Montgomerie Lt Col. R.E.
Supg Engineer 1st Circle.

ENCLOSURES. Nil

D. Ramannah Naidu — Anicut Superintendent in charge Anicut Sub Division — Requests that necessary orders may be obtained for the increased pay and Sub Division allowance to —

B

A. W.

Please look through these papers: & the draft order, at head of which there is only quoted E. I.'s Note dated 23-1-85.

36

It seems to me that some other paper should be quoted, as otherwise the delay of 6 months will appear due to the Secretariat Office, which is not the case.

2-8-85

The only other papers in this file, which can be quoted at the head of the draft order, are —

O. R. to C. No. 248 D. d/ 2.2.85
Do., from C. No. 17 d/ 10.4.85
Memo to S.E. I No. 801 C d/ 16.4.85.

There will still be much apparent delay.

From a note in the file, it would appear that the reply from S.E. I to No. 801 C d/ 16.4.85 has

---

Eastern Division Office
hweram 30th March 1885
Despd. 3rd April 1885

1-73 E.W.

Forwarded to the Chief

---

been received and is under disposal separately – but it has not yet reached [illegible]

No & date of that reply might be quoted at the head of this order also, to show that it was waited for.

Cu
4.8.85

C.A.W.

Who is responsible for the delay of more than 6 months.

4.8.85

W

E.I.'s memo. of 23.1.85 and enclos., were sent to C for check with O.N. of 2.2.85, No 248 D.

The papers were returned by C with his O.N. of 15.4.85, No 17.

In the interim the C was in corresp with S.E.I. with respect to certain details –

A further reference was made to S.E.I on 16.4.85 (No 801 C) to which reply has apparently only now been received at Madras.

In the tabular statements submitted by the S.E.I circle

2/

temporary establt. for 1884-85, & 1885-86, & for extra permanent establt. required for the addl. subdivision were all mixed up, & this required rectification.

The delay may therefore be mainly attributed to S.E.'s office.

42

The E. I's memorandum No: 9 E. W. dated 23rd January 1885 was sent to C for check on the 2nd February 1885 with 248 D. The memo was not returned by C till 10th April 1885 – vide his office note No: 17 of that date, in which he disposed of the comparative statement referred to in the E. I's memo along with two other statements connected with the same Godavari Eastern Division.

In his office note No: 764 dated 27th January 1885, he brought to notice that he was in correspondence with the S. E. I Circle for certain information regarding some items in the Comparative statements and in para 2 of his office note No: 17 he stated that the details were only since furnished and forwarded a copy of the statement of details. This was the cause perhaps of the delay by C.

W
30/7

[illegible]

Dys. 99/7.
Sec: 30.7.85 R. 7-8-85

S. A. W.

Here are Nos: 801 C d/ 10-4-85 and 9 E. W. d/ 23-1-85 referred to.

You will observe from the file that when E. I's memo No: 9 E. W was received, it was not passed through the Budget Section but was only partially disposed of by forwarding it to C for check as regards "present scale" of the proposition statement for a small office establishment referred to at the close of para 1 of the E. I's memo. The main proposals by E. I. to introduce the Quarry and Anicut Sub Divisions and to appoint Anicut Superintendent to the Anicut Sub Division with pay increased to Rs. 150, were left undisposed of and when the proposition statement was returned by C with two other statements for the same Division with his office note No: 17 d/ 10th April 1885, no reference whatever to E. I's memo was made by C. The 3 comparative statements referred to in the C's office note were returned to S. E. I Circle for revision. They were revised and one statement for all temporary establishment required for the whole Dn. is now received and it is under disposal

The E. I's proposal to introduce anicut and quarry sub-divisions in lieu of the present Head Quarters Sub Dn. and to appoint Anicut Suptt to the Anicut Sub Division increasing his pay to Rs 150 requires disposal.

To enable the necessary draft on the subject being submitted for approval, orders are solicited on the following point. The E. I. proposes to appoint Anicut Suptt D. Ramanna Naidu to the Anicut Sub Division. This is against the Code rules. In para 327 the charge of a Sub Division can only be held by an Assistant Engineer or an Upper Subordinate. D. Ramanna Naidu belongs to Conservancy Establishment. It is therefore necessary that D. Ramanna Naidu should be brought into the Upper Subordinate Establishment before the Sub Divisional charge can be allowed to him as proposed by E. I.

Submitted for orders of D. W. on this point.
