From Lt Colonel John Ewing

To The Secretary to Government

Sir
In forwarding here in the letter
No: 310 dated 12 August 1885 from
the Executive Engineer, Fort St George
Division - I have the honor to bring
to the notice of Government, that a
weigh bridge which was obtained
from England for this Depot at a
cost in England of £35, has not
yet been put up though it is now nearly
two years since it was received
here.

Vide No: 6588
dated 8 Decr 1882.

It has been lying since then
useless

useless and probably deteriorating.
and I should feel much obliged
by your causing instructions to be
issued in the P. W. D. to have the
Land put up as soon as possible.

At present all straw, forage,
Hay, grain &c which are required in
the Hind Lines have to be sent to the
Ranount Lines - a distance of a mile
and a half to be weighed and then
brought back, which is very in-
convenient and expensive as it
takes up the time of people, horses
and carts who might be much
more usefully and profitably
employed.

I would offer to put this
up myself, but its adjustment re-
quires some technical skill which
we do not possess at the Depôt - but
I fancy I am safe in saying that

the

the Cost of laying it and building
a little shed over it (which is
absolutely necessary to protect it
from the weather) would be under
a hundred Rupees -

I have the honor to be
Sir

Your most obedient servant
