

9TH DECEMBER 1886, Nos. 683, 684, MARINE.

GOVERNMENT OF MADRAS.

MARINE DEPARTMENT.

READ—the following papers :—

From the Secretary to the Government of India, Military (Marine) Department, to the Chief Secretary to the Government of Madras, dated Simla, 19th October 1886, No. 1175.

In reply to your letter, No. 493, dated the 3rd September 1886, I am directed to say, for the information of His Excellency the Governor in Council, that in consequence of the heavy extra trooping work in Burma this cold weather and also between Bombay and Karachi, it is improbable that a vessel of the Indian Marine will be available for the inspection of the lighthouses and out-ports on the Madras coast, and of the Laccadives, during January and March next.

2. I am therefore to suggest, for the consideration of the Madras Government that some portion of the inspection of the ports might be made by means of the railways, or the coasting steamers of the British India Steam Navigation Company, and that the remaining portion which cannot be so performed be undertaken in a small steamer to be chartered for the purpose, and for such time as may be necessary.

3. The Director of the Indian Marine will be asked to assist the Madras Government in procuring a suitable vessel, if such should hereafter be found to be necessary.

Telegram from the Secretary to the Government of India, Military Department, Simla, to the Secretary to the Government of Madras, Military Department, dated 23rd October 1886.

Paragraph three, my Marine letter, No. 1175, 19th October. The hire of the steamer will be an Imperial Marine charge.

No. 6719.

Transferred to the Marine Department.

(By Order.)

FORT ST. GEORGE,
27th October 1886.

(Signed) A. KENNEY-HERBERT, Lt.-Col.,
Secretary to Government.

From J. H. TAYLOR, Esq., Lieut., R.N.R., Port Officer, to the Chief Secretary to Government, dated Madras, 6th December 1886, No. 11419.

I have the honor to return the letter*
* No. 1175, Government of India, Military (Marine) Department, Simla, the 19th October 1886. from Government of India, and telegraphic continuation of the same, regarding a vessel for the inspection of the coasts, lighthouses and Laccadive trip.

2. I have inquired of the several departments, and find that, as the inspection party will consist solely of Colonel Hasted and myself, we are both satisfied that the Steamer *Madras*, now repairing at Cochin, will suit us very well, so that the great expense of hiring a steamer need not be incurred.

3. Mr. Willock informs me that the Salt Department does not require to be represented, the survey of it having been very lately completed; and Mr. Logan reports that the *Madras* will do very well for the Laccadive trip, but the dates which suit for the Marine Department do not fit in with the island arrangement and jamabandi. I proposed to utilise the vessel for Colonel Hasted and myself from the middle of January to about the middle of February, as the latter month is the latest when landing can be assured at the northerly ports of the Presidency, the month of March being subject to strong south winds.

4. I proposed letting Mr. Logan have the vessel from about the middle of February to the end of March, as he reports the inspection to last six weeks, but, as before observed, this unsettles his arrangements; he would prefer December and January. The *Madras* cannot be got ready before the beginning of January. Under these circumstances, the cheaper plan will be to ask the Government of India to hire a small vessel for the Laccadive trip, and leave the *Madras* to the Marine. By this method the expense of coal to the hired steamer will be reduced to a minimum, as she will be at anchor nearly all the time. A very small vessel would suffice, only sufficient to accommodate the Collector and a staff of clerks, &c. If these propositions recommend themselves to Government, I would respectfully suggest that the Government of India be asked to send a suitable vessel, as soon as one can be obtained. I would also beg early orders on the subject, and that Mr. Logan be communicated with direct to save time, as the season is advancing.

EXTRACT from a letter from W. LOGAN, Esq., dated 27th November 1886.

"I think the *Madras* would do very well for the Laccadive trip. But 15th February is a very late date for setting out, and is very inconvenient in two ways: first, because the islanders are as a rule over on the mainland then, and, secondly, because it dislocates jamabandi arrangements completely sending over an officer in February—March. December—January are the two best months for the trip."

ORDER—dated 9th December 1886, No. 683, Marine.

The Steamer *Madras* will, as proposed by the Port Officer, Madras, be left at the disposal of the Marine Department.

2. The following telegram will be despatched to the Director of the Indian Marine, Bombay:—

"Please hire small steamer for Collector, Malabar, for inspection of Laccadives during December and January. Reply by wire."
