No 2181 C 17th Dec 85

Referred to the Supg Engineer IV Circle for favour of early opinion whether, in the event of the necessary allotment of funds being made, the new bridge over the Sholadi river, with its approaches, could be finished during the present working season.

It is observed that the site chosen for the new bridge is some considerable distance up stream from the existing bridge, and that a new piece of road will be required on each side of the river.

The entire sum which will be necessary to complete the new bridge, with the approaches to it, should be reported.
