ORDER—dated 22nd March 1884, No. 780 W., Public Works.

In the orders of the Government of India recorded with G.O., No. 1729 W., dated 14th July 1881, the sanctioned strength of the department was fixed at 47 Assistant Engineers and 185 Upper Subordinates of all grades, and these were distributed among the various circles as the circumstances of the department then seemed to require. The proposals which have since been made by Superintending Engineers for redistribution of establishments show that a re-arrangement of the staff to some extent is now called for, and the reports recorded at the head of these proceedings contain the views of Superintending Engineers as to the changes which should be made.

2. It has been assumed that no increase of the permanent establishment is admissible. The available numbers must thus be utilised to the best advantage, and any increase in one circle can be provided for only by a corresponding reduction elsewhere.

3. The Government will not do more than fix the total scale for each circle. This done, the detailed distribution to divisions will be left to Superintending Engineers, who are at liberty to make or alter postings as they may consider necessary.

4. The existing staff, permanent and temporary, is shown to be 53 Assistant Engineers and 210 Upper Subordinates, while the future requirements of all circles are put down at 45 Assistant Engineers and 219 Upper Subordinates; the net result being an addition of 1 Upper Subordinate to the existing staff.

5. The last column of the statement appended to these proceedings shows the revised scale of Assistant Engineers and Upper Subordinates of the permanent establishment which is in future to be considered the allotment for each circle. It is not intended that this scale should be immediately worked up to by sudden transfers of officers and subordinates between circles, but it will be gradually introduced as opportunity offers. Applications from Superintending Engineers for officers and upper subordinates, in excess of the scale now laid down, cannot be complied with unless supernumeraries are available. Additions to the staff can usually be made only by the appointment of temporary officers, on due cause being shown.

6. The proposals of the Superintending Engineer, IV Circle, for a territorial re-arrangement of the divisions of his circle will be separately considered.

MARCH.

Assistant Engineers and Upper
Subordinates of the Madras
Public Works Department

Sanctioning the redistribution of the —.

No. 5352.

Madras. J. P. D.
Bangalore 11th March 1886.

From

The Executive Engineer
To
The Superintending Engineer
5th Circle

Sir

The Examiner P.D. Accounts
in his Disallowance List No. 532
of 1885-86 on my Salary Bill for
February 1886 (He) requests
that orders of Government be
obtained for the retention of
the two Supernumerary clerks and
lascars attached to this Division.
With reference to this remark, I
have the honor to state as follows:—

2. These two clerks and two
lascars were employed under Messrs.
Kelly and Govinda Row. Mr.
Ravi Row Maide & 1 lascar under the
former, and Cooperaswamy Maide
& 1 lascar under the latter. On
the transfer of Supervisors Kelly &
Govinda Row; it is temporary transfer
as

Supervisors
P.W.D.

as still hoped, and understood
from this Division to the Red Hills
Tank Division, the clerks & lascars re-
mained in this Division. The Su-
pervisors have been removed, but
this did not, as Examiners seem to
think, in any way lessen the work
to be done by those of all ranks
left in the Division; it rather in-
creased it: and so the services of these
men were and are still necessary.

As one lascar has since resigned,
and his place not yet filled, there
remain 2 clerks and one lascar -
to which objection is now taken by
the Examiners. I have to employ
one clerk, viz. N. Narain Row Maidee,
who is now in Bangalore exclusively
on clerical labour connected with
the Madras Municipal taxes, as
owing to the numerous references on this
subject to the Municipality and the
amount of correspondence thereby invol-
ved, it is absolutely necessary
to

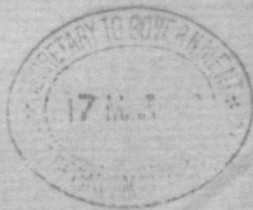

to do so.

3. The other clerk and lascar, I
would recommend to be also re-
tained in the Division, for em-
ployment in the Madras Sub Division,
where the work is very heavy, till such
time as the Supervisors above named
return to the Division.

4. I therefore request you will
be good enough to obtain the
sanction of Government for their
retention.

I have &c.
Wm. H. Dutton Esq. R. C.

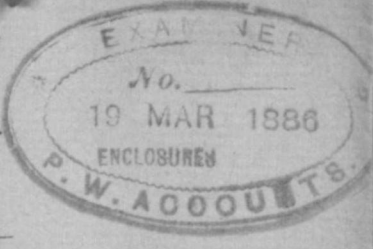

No. 5086

Submitted to the
Chief Engineer P. W. De.
partment.

Q. Under G. O. No. 780 of dated
22nd March 1884, the strength of
the Division is 2 Assistant En-
gineers and 7 Upper Subordinates
and

and there should be 9 clerks
 and 9 lascars. The total number
 of clerks including the two in question
 is 9. The clerks and lascar thus
 are not really supernumerary, tho^t
 one Upper Subordinate is due to the
 Division. It is requested that the
 Examiner may be instructed to pass
 the pay of clerks and lascars up to
 the sanctioned strength.
