GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following paper:—

From A. P. MACDONNELL, Esq., C.S., Officiating Secretary to the Government of India, Home Department (Sanitary), to the Local Governments and Administrations, dated Simla, 28th April 1886, No. 5—122.

A case having recently occurred in which compensation was claimed for the destruction, by order of a Government medical officer, of the bedding, clothing, &c., belonging to certain individuals who occupied quarters in which a man had died of cholera, the Governor-General in Council considers it desirable, in order to prevent the unnecessary destruction of property and the submission of claims for compensation, that some definite instructions should be laid down for the guidance of officers in such cases. His Excellency in Council is accordingly pleased to direct that the procedure prescribed for adoption among European troops, as given in the rules* appended to this circular, shall, with the addition of the foot-note, in future be carefully observed.

* Nos. 56 and 57.

2. It should be impressed upon all Government officers that if destruction of property is ordered as calculated to cause infection, and inquiry subsequently shows in any particular case that such destruction was not absolutely necessary, but that purification would have sufficed, the officer ordering such destruction must be held responsible for the loss occasioned thereby to the owners of the property.

ENCLOSURE.

Purification of Bedding and Clothing.

56. The straw of the barrack bedding used by persons attacked prior to admission into hospital will be burnt. The stuffing of mattresses and pillows used by cholera patients in hospital will be opened out, exposed to the air, and beaten, and, when practicable, submitted to a dry heat of not less than 250° Fahrenheit for at least an hour (in an oven or otherwise*) before being used again; the remainder of the barrack and hospital bedding, clothing, &c., and such of the clothing worn by patients on their admission as is not liable to injury thereby, shall be boiled, exposed to the air, beaten and afterwards washed with soap and water.

Cots and punkah fringes which have been used by cholera patients, or in wards set apart for them, should also be subjected to the action of boiling water when they are no longer required for such cases.

Such articles of a soldier's kit as cannot be treated in the above manner will be removed to hospital and there fumigated and exposed to the air and sun for a week, beaten and brushed.

Burning only to be resorted to when purification cannot be at once carried out.

* Or if means are not at hand to enable this to be done, it should be boiled.

57. When circumstances are such that the above processes of purification cannot be at once carried out, such articles as body linen, bedding, cots and punkah fringes may be burnt; but with proper arrangements the necessity for this destruction will rarely arise.

To the Chief Secretary to Government, Madras.

ORDER—dated 11th May 1886, No. 953, Public.

Communicated to the departments of the Secretariat and to all heads of departments for information and guidance.
