Office of the Supdt. Engineer, Circle.
Camp. Madura 2d. April 1887.

D/Ltd

From.

Lt. Col: J. Pennycuick R.E
Supdt. Engineer, Circle.

To

The Chief Engineer
P.W.D.

Sir,

Under the circumstances set forth below, I have the honor to request that the Examiner, P.W. Accounts ~~now~~ may be directed to admit the claims of V. Aravamutha Iyengar, Superintendent of the Lower Coleroon Anicut in the Tanjore Dt. to pay from 1st to 25th November /86, and to Travelling Allowance for his journey from Bangalore to the Anicut, via Madras & Tanjore.

2. From Aravamutha Iyengar's statement it is observed that although he was relieved from the State Railway Surveys on the 4th November /86, yet the Engineer in Chief paid him only up to the 31st October /86, saying that the Budget allotment was only

up to the latter date, and that the remaining 4 days can be counted in the joining time -

3. He took three days for preparation and on the forenoon of the 9th November /86 reported himself to you at Madras, and as directed in your No 3956C of 11th idem he reported himself to the Executive Engineer Tanjore, on the 15th idem (14th being Sunday) taking 4 days for his journey from Bangalore to Tanjore, Via Madras. But from the 15th to the 23rd he was kept awaiting the receipt of the Supt. Engrs orders by the Executive Engineer and the Sub-Dn. Officer's order by the Ag. Supdt., and so he finally assumed charge of his appointment on the afternoon of the 25th -

4. The Examiner has disallowed the claim of the Superintendent to pay & Travelling Allowance for the period in question, on the ground that full pay having been admitted to the substitute, it requires the sanction of Government.

I have the honor to be
Sir
Your most obedient servant.

J. Pennycuick Lt Col R.E.
Supt. Engineer, Circle.

Your O. N. No. 1304 C. dated 7th. April 1887.

Aravamuthu Iyengar was an Anicut Superintendent on Rs. 50 per mensem. He was appointed in E. W's. memorandum No. 325 C. dated 17th. February 1885 a temporary Upper Subordinate on Rs. 80 per mensem and posted for duty on Railway Relief Works. On completion of the works he reverted to his permanent appointment. Pay was disallowed from 1st. to 25th. November as it was admitted to his substitute for the same period, vide Pay and Acting Allowance Code Section 4. If Government consider that pay should be passed to the Anicut Superintendent from 1st. to 25th. November, under the circumstances explained by the Supg. Engineer it will be admitted as an additional charge under the special orders of

Remarks by Sup erintending Engrs

Supdg: Engr. I Circle — The Crowbars should be simple pieces of 1¼" round bar, 5½' long, sharpened at one end and quite plain at the other - the Mamooties are not to exceed 7 lbs, sketches of those most in vogue in the Circle forwarded. The number of Instruments required will depend on the work to be laid out.

" " II " — The Crowbars to be 4' to 5' long, steeled, and the Mamooties 6 lbs in weight with the handle almost parallel to the blade as the English made Mamooties are not properly shaped. The Pickaxes should be steeled and the stone breaking hammers should weigh 3 lbs and be entirely of Steel. The other articles specified are:- Measuring rods 10', Measuring Tape 50', Chain 100', Levelling Instruments Dumpy 10" and Cash box, small wooden.

" " III " — The Crowbars to be 14 lbs, the Mamooties English, 5 lbs, and the Sledge Hammers 8 lbs. Of the Hand Hammers 250 to be 2 lbs weight and 100, 1 lb. - Of the Pickaxes 350 should be English 7 lbs, and 50 Country 5 lbs. The Picks should be 5 lbs weight, the Jumpers Steel 6'×1¼" 15 lbs, and the Levelling Instrument a Dumpy Level. The Chain and Tape to measure 100' each.

" " IV " — Of the Mamooties 300 to weigh 4½ lbs ach, and 50, 5 lbs. - of the Pickaxes 300 to weigh 5 lbs each and 50, 6 lbs. The Jumpers should be cast Steel, and the Stone breaking hammers 2 lbs Cast Steel. The Tapes to be Chesterman's 100', and the Chain 100' with arrows - Beyond being of a light serviceable form no special pattern of Tools is required.

For every 1,000 laborers a wrought Iron Cash Chest should be provided and a Chest of the size known as the Ganges Canal pattern for every 3,000. Each District to be urnished with 2 Chests of each size. The following to be held in Reserve for issue to each District:- 2 ten inch Dumpy levels, 4 sets of Levelling Staves, 2 sets plotting scales, 2 metal straight edges, 4 metal 18 rolling parallel rulers, 1 case of plain Mathematical In truments 1st Class and 1 2nd Class and 2 color boxes of tin with 6 colors in each brushes and 6 China Saucers.

" " V " — The Crowbars to be about 15 lbs and the Mamooties 4 lbs weight - The full supply to be obtained in the country - Indian made tools being more suitable than English.

" " VI " — The Crowbars to be about 12 lbs and the Mamooties similar in pattern to those in use by the people of the Dt - the patterns vary very much chiefly in the angle at which the blade is set with regard to the handle - The Picks should be light about 6 lbs - The Tapes & Chains to measure 00', and the Rods 9' - Of the measures 2 sets are for issuing grain and 2 for Curry stuff.

P. W. DEPARTMENT.

No. 2453 C dated 8th. December 1883.

CIRCULAR MEMORANDUM.

With reference to the Famine Code for the Madras Presidency which has recently been published for general information in the Fort St. George Gazette, and copies of which have been separately distributed to officers of the Public Works Department, the Chief Engineer desires to draw attention to certain provisions of the Code, which should be carefully studied in anticipation of the occurrence of famine, with a view to such preliminary arrangements being made as are specifically laid down in the Code.

2. It will be observed that famine relief works are classed under two main heads:-

(a) Professional Agency Works.

(b) Civil Agency Works.

Public Works officers are more especially concerned with class (a) works, and the arrangements for the execution of these demand their more immediate attention.

The nature of class (a) works is explained in section 18 Chapter I, and the rules under which they are to be carried out will be found detailed in Chapter IV.

In

In section 27, Chapter I, it is laid down that the P.W. Department should constantly maintain in their several Budgets a number of (a) works for each District, sufficient for four years' ordinary labor. This matter should be kept in view in the submission of future Budgets, and generally throughout the year; estimates being submitted for sanction from time to time, - so that the list of works available for famine relief may contain as many duly sanctioned projects as possible, and the waste of money inseparable from the execution of ill-considered schemes, taken up on emergency, may be avoided.

6 The adequacy of the scheme of works thus laid down should be specially reported on by Superintending Engineers in a separate memorandum, to be submitted as soon as possible after the issue of the P.W. Budgets. It will also be noticed in the Circle Administration Reports.

7 Superintending Engineers will at all times have on record the data for framing the task work table referred to in section 51, so as to be in a position to afford the requisite information to the Civil Authorities whenever called on.

8.. The provision of an ample supply of tools and treasure chests for both (a) and (b) works is a matter regarding which preliminary arrangements are necessary, vide section 110 of Code. Certain quantities of tools from the last famine are now in store in various Districts. Superintending Engineers will ascertain the quantities of each kind in stock, and will then submit indents on the General Superintendent P.W. Stores for the balance of probable requirements. It should be distinctly specified on the indents that the articles are required for famine relief purposes. The articles indented for

will

will, after [illegible] by Government, be procured by the General Superintendent either locally or from England, and will be kept in stock at Madras for issue when an emergency may arise. There will be nothing to prevent such tools being issued at any time for works in progress, provided they are immediately replaced. The authorised stock for famine relief purposes which will be laid down, on complete information being received in compliance with the present orders, should always be maintained The General Superintendent P.W. Stores will be answerable that this is done.

9. It may happen that the local stock of tools will in time so far deteriorate as to be unfit for use, or may be disposed of under distinct orders of Government. Superintending Engineers should keep this in view, and arrange for the balance being maintained in the General Stores at Madras. To admit of this being done, the General Superintendent will issue to Superintending Engineers annual lists of famine tools in stock distributed against Districts. Superintending Engineers will thus have an opportunity of correcting excesses or deficiencies.

10. Attached, as an Appendix to this Circular, is a statement shewing the number and description of tools which the several Superintending Engineers consider necessary for a thousand laborers on famine relief works. It will probably be found useful in framing indents. The number and description of tools will of course vary in practice with the composition of the gangs and the kind of work to be performed.

But,

But, as a general guide for making preliminary arrangements, the table given on page 61 of the Code may be consulted with advantage.
