READ—the following letter from Brigadier-General E. FAUNCE, Quartermaster-General, to the Secretary to Government, Military Department, dated Ootacamund, 20th May 1887, No. 1896 A.:—

I have the honor, by order, to forward, for sanction and transfer to the Public Works Department for disposal, the estimate, plan, &c., below-mentioned, which have been approved by the Commander-in-Chief. The plan and estimate have been countersigned:—

Revised estimate, amounting to Rs. 1,140, for constructing three line gear rooms for the Royal Artillery new stables at St. Thomas' Mount in lieu of the estimate of Rs. 1,542 for six such rooms sanctioned in G. O., No. 2561 W. of 2nd November 1885 — M. D. No. 6517 of 18th idem.

The Executive Engineer's report attached to the estimate explains why now only three line houses are required and why a revised estimate for them is requisite.

No. 3005, Military.

Approved and transferred to the Public Works Department for disposal.

NOTE OF REMARKS.

1. The accompanying revised estimate provides for constructing 3 Line gear rooms for the Royal Artillery new stable at St. Thomas' Mount in lieu of the estimate of Rs. 1642, for 6 such rooms sanctioned in G.O. No. 2581 of 23 November 1885. The present revised estimate for 3 Line gear rooms is Rs. 1140, or Rs. 402 less than the amount of the original estimate.
2. The revision of the estimate is due to the substitution of new materials and the reduction in the number of the rooms originally provided namely from 6 rooms to 3. It is explained that there were some indigenous buildings which were intended to be demolished and whose materials were proposed to be utilised in the construction of the 6 gear rooms, but

the demolished buildings were sold the estimate had to be revised providing the usual rates for new material. The necessity for the reduction in the number of rooms is explained to be due to 3 adjacent buildings being used as Line gear rooms. The new materials now to be used are brick in clay, new teak wood, new battens door & windows & tile roofing.

4. The foundation & the superstructure are to be built of brick in clay except on top of wall & flat arch work brick in Chumam.
5. Plastering to drain to be of 2 coats with hydraulic mortar and tarring complete, and plastering to walls of the building is to be of 1 coat Chumam & 2 coats of white wash.

6. Flooring is to be of 8 inches square bricks on a bed of 3 inches concrete & tar pointing complete.

7. All wood work is to be of teak and the scantlings of timbers are correct, except the ridge piece which may, subject to your approval, be reduced to 3"x8" instead of 5"x8" which seems little in excess.

8. Roofing is to be of teak reaper flat.

The Est provides for 4"x7" but the plan has not been altered

flat and pan tiles, chumam borders & tarring lower course of tiles.

9. The rates are fair.

10. Contingencies and Superintendence are charged separately at 2 & 3 percent respectively.

11. The estimate and the comparative statement have been countersigned by the Quarter Master General and approved in the Military Department.
