

No. 1745 of 21st May 1887

To

For favor of remarks.

To W.

It is presumed, that the material sold is largely produced from what would otherwise be quarry waste, and is a bye-product, the cost of which is not accurately ascertainable.

2. If Govt. are satisfied that the rate is a sufficient one, a special order, such as is contemplated in Code para 185I Note (I) line 1, is necessary.

3. The sale at the reduced rate without Govt. sanction was clearly irregular.

In the circumstances reported, the sale of broken stone to the Engineer at Amas 13 is sanctioned.

TO

THE CHIEF ENGINEER

P. W. Department
FOR IRRIGATION.

DOWLAISHWERAM, 9th May 1887

Despt. 16th May 1887

SIR,

(1) The quarries at Dowlaishweram supply the various Government Works with broken stone for concrete at annas 12 per cysd which rate pays the quarries well and they have been for some time past supplying the Local Fund Engineer with similar material at annas 13 per cysd.

(2) The Engineer objects to this and says that under 1851 of the ^{P.W.} Code the rate charged to Local Funds should be 24 per cent on the 12 annas charged to Departmental works. If this be insisted on the Local Funds will

refuse to take the material and so
a source of very fair profit to the
quarries will be lost.

(3) It is impossible to tell what such
material does cost exactly but I
have no doubt whatever that 13
annas a cubic yard does give quite
24 per cent profit on actual cost and
I therefore have the honor to request
that the Examiner may be instructed
to withdraw his objection.

I have the honor to be
Sir
Your most obedt. servt.
C. P. Walsh
