7th August 1886, No. 758, Political.

GOVERNMENT OF MADRAS.

POLITICAL DEPARTMENT.

Order—dated 7th August 1886, No. 758, Political.

In Proceedings of the Political Department, under date the 13th August 1883, No. 586, it was directed that all future communications to His Excellency the Governor of the French Settlements in India should issue from the *Political Department*, and the order quoted in the margin requires that all drafts relating to the boundaries of foreign or native States shall be sent to that department before issue.

G.O., No. 520, Political, dated 5th Oct. 1884.

2. His Excellency the Governor in Council considers it desirable to rule that *all* communications to Foreign Governments or Native States shall issue from the Political Department.

3. The merits of particular cases originating in departments other than the Political will frequently be best understood in those departments, where the subjects will probably have been considered in detail. The most convenient procedure will thus be for the department concerned to frame draft proceedings or a letter, as the case may require; and, after counter-initial in the ordinary course, to send the papers for issue in the Political Department, which would thus have the opportunity of revising, if necessary, the communication prior to issue, and of ensuring proper attention being accorded to it by Political officers and others either subordinate to, or in direct relations with, the Political Department of the Government.

To J. H. M. Shaw-Stewart Colonel R.E.
Secretary to Government
Public Works Department

Sir

I have the honor to state that from April last, I have entertained the services of Mr. C. Madava Row as my private Secretary. He passed his A. C. E. Examination from the Civil Engeneering College at Madras this year. As he is fresh from the College I am led to consider that his practical knowledge of Engeneering will be much limited; and with a view to make him most useful to my Estate in developing its Irrigation works, I think it will be beneficial if the Government can kindly allow him to attend the Sangam Project works for about 6 months to acquire practical knowledge in Hydraulic Engineering and office works relating to Public Works department.

I have the honor therefore to request that You will be so good as to obtain the permission of Government in this behalf and inform me at Your Earliest Convenience.

I have the honor to be
Sir
Your most obedient Servant

Second Circle – P.W.D. – Nellore Division

Report on the practical course of Mr. C. Madava Row in the late Sangam Project Division

Mr. C. Madava Row joined the Sangam Project Division at the end of August 1886. As the North East monsoon was approaching he was at once sent out to take notes and enquire into the methods of construction on the works in progress. He was thus employed up to the end of October, and his notes show that he endeavoured to make himself acquainted with the various subjects dealt with under Labor, Materials & Designs.

The monsoon having set in, I brought Mr Madava Row into my Office, and employed him in preparing Plans and Estimates for an Irrigation channel. This work comprised longitudinal & cross sections & estimate for excavating a Channel 4¾ miles long with a F.S. depth of 3½ feet of water & a bottom width varying from 24 to 3½ feet to irrigate 4265 acres. A combined bridge and Head Sluice of one vent 6 x 3½ feet, a large Syphon culvert of three 10 feet vents and a few small irrigation Sluices. These plans and Estimates for a work to be actually carried out were fairly well executed without any serious errors by the early part of January.

I then selected the most difficult minor channel (as far as the nature of

the

the ground was concerned) which I had to execute, and sent to Mr Madava Row to investigate and align it. This Minor channel as now investigated consists of a main branch 2 miles in length with 3 subsidiary branches $3\frac{7}{8}$, $\frac{3}{4}$ & $\frac{7}{8}$ miles long respectively. The duty of the Minor channel will be 1557 acres. Mr Madava-Row performed this work satisfactorily, but being new to the work took rather too long a time over it. He has only just completed it. The ground was difficult, uneven and rough with a heavy fall & thickly covered with scrub jungle in places.

For want of time and because Mr Madava Row held no official appointment, I was unable to place him in charge of any work, & could not therefore give him any practice in office duties. He has, however, been given every opportunity of acquiring information in construction, designing & Estimating & field work.

I am glad to be able to report that Mr Madava Row has, throughout, been assiduously attentive to his duties, and to the instructions I have given him from time to time.

Enclo. one

Sir,

With reference to your letter No. 372 D dated the 10th July 1886 to the Jaghirdar of Arni, & your endorsement No. 373 D of the same date, I have the honor to inform you that Mr. C. Madhavarow has now left the Sangam Project Division, after a stay there of about 8 months, with a view to his acquiring some practical knowledge in carrying out irrigation works.

2. The Executive Engineer — Mr. Malet, has taken considerable trouble in putting Mr. C. Madhavarow in the way of gaining a lot of very useful information regarding the design

and

and execution of irrigation works.

3. As it may be satisfactory to the Jaghirdar of Arni to know that Mr. C Madhavarow has made the best use of his time while undergoing a Course of practical training, I beg to enclose a report on the same by Mr. Inalet.

I have the honor to be

Dear Sir,

I have the honor to acknowledge with thanks the receipt of your office letter No. 1393 W Dd/ 23rd May 1887 together with the enclosures. I hear with pleasure from the Reports by the Superintending Engineer II Circle and the Executive Engineer Nellore District that Mr. C. Madhava Row has given ~~them~~ entire satisfaction to the officers under whom he was placed.

I feel very much thankful to the Govt. for having made arrangements to train Mr. C. Madhava Row in the late Sangum Project and I trust that Mr. C. Madhava Row will be of great service to me in future in improving the irrigation works in my estate.

I have the honor to be
