

No. 4847N.

Trichinopoly 4th February 1887.
D 5/.From Major A. C. Smith, P. E.
The Superintending Engineer,

6th Circle.

To Col. J. O. Staked, P. E.

The Chief Engineer

P. W. D.

Sir,

ENCLOSURE.

I have the honor to inform you that at the request of the Executive Engineer, Tinnevely Division, the General Superintendent of P. W. Works, Madras, was asked by this office for a supply of some chips of white rubber vulcanized, which, it was believed, would be available there, as generally many pieces of rubbers used for pipes and other instruments may become rotten and useless; but the Superintendent has stated that the rubber is not

not available in his store. The Executive Engineer on being informed of the Superintendent's reply, urges this office to permit him to buy it in the local market; but as the purchase is prohibited under para 842 of the P. W. Code unless with the sanction of Government, I have the honor to request that you will be good enough to authorize the purchase, and to include its cost in the Divisional contingent bill.

2. I would further inform you that the Executive Engineer states that the sorts of rubbers generally supplied from the Stationery Office do not suit the purpose he requires.

I have the honor to be

^(Sd)
Your most obedient servant.

Aldwinth Major A. C.

Superintending Engineer 6th C-

To
The Superintending Engineer
6th Circle.

Sir,

With reference to your
N^o 558 T.N dated 7th Instant
I have the honor to forward
another sample piece of the
description of rubber required.

2. With regard to the quality of
valcanized rubber supplied from
your office, I beg to report that

(a) It is too hard and tears the paper.

(b) It makes the paper dirty by
spreading the pencil when rubbed.

(c) It gives a yellowish color to the
paper when rubbed upon it.

With

3. With regard to the quality of sample piece of the sort forwarded with your Memorandum and alluded to in para 2 thereof, I have to report as follows:—

- (a) It possesses the same hardness as the other rubber supplied from your office does
- (b) It takes a long time to rub out and does not do so clearly.
- (c) It is however, of superior quality to the other rubber from your office.

4— In order to test the accuracy of the foregoing remarks, trial should be made of these rubbers with a plan containing pencil lines which have been drawn some days previously.

I have the honor to be
Your Most Obedt Servant.
(Signed) A. J. Russell
Executive Engineer.

No. 620.T.N

Trichinopoly
30 March 1887
D/318

Forwarded to the Chief Engineer
enclor 3. P.W. D with reference to his Memo-

-randum N. 490.C dated 10th Febru-
-ary 1887. The only sorts of rub-
-bers usually supplied from
the Stationery office are
those marked A & B (samples here-
-with attached). These the Exe-
-cutive Engineer condemns. The
sort marked C is the one, which
he requires, which he now asks
sanction to purchase. The quan-
-tity required of this sort is 2 lbs,
and the price is about 3 Rs per lb.

2. The rubbers A & B on being
tested in this office also, were
found to be inferior in quality.
I entirely agree in the Executive
Engineer's condemnation.

Thos. J. Collett
Superintending Engineer, Trich.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper from

the Superintendent of Stationery, Madras, dated
5th May 1887, No. 170.

With reference to your endorsement
dated 21st April 1887, forwarding for remarks
Proceedings of the Madras Government, Public
Works Department Current No. 1065 W dated
16th April 1887, on letter from the Superintend-
ing Engineer, VI Circle, I have the honor to
observe that rubbers similar to samples
returned herewith. marked A and B are not supplied by this
office. That marked C is vulcanized rubber
and appears to be of the same sort as that
supplied by this office, and could be supplied
to the Executive Engineer, Tinnevely, if indented
for. A sample of the rubber available
is enclosed for information.

Order, dated 18th May 1887, No. 615.

The letter from the Superintendent
of Stationery will be communicated to the Public
Works Department.
