Meteorology.

Returning, with remarks, plans and estimates connected with certain meteorological works at Kurnool and Bangalore.

funds as per Government of India, Revenue and Agricultural Department, Meteorology No. 1—27-39, dated Simla, 27th October 1881, a certain sum having been allotted for the construction and starting of each new observatory by the Meteorological Reporter to the Government of India.

2. As regards Bangalore, the expenditure incurred for construction and inauguration was debited under the head "21, Education, Science and Art" prior to the reorganization of the department in 1875.

3. In reply to paragraph 2 of the above memorandum, application has been made to the Resident, Mysore Government, for sanction of the expenditure of erecting a new barometer room and enclosure at Bangalore.

---

Order—dated 31st August 1887, No 1229, Public.

The plans and estimates (received with letters, Nos. 271 and 279, dated 18th and 21st May 1887,) will be returned to the Meteorological Reporter to Government, with the remark that the expenditure in connection with the Kurnool anemometer staging should be met from Imperial funds, and that the Madras Government cannot be responsible for expenditure on the barometer room at Bangalore rendered necessary by the requirements of the local Bowring Hospital.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

Read—the following papers:—

From Miss E. ISIS POGSON, F.R. Met. Soc., Meteorological Reporter, Madras, to the Chief Secretary to Government, dated Madras, 18th May 1887, No. 271.

Under instructions from the Meteorological Reporter to the Government of India, and with reference to the enclosed correspondence, forwarded for information, I have the honor to request the favor of special sanction of the Government of Madras for the construction of a small masonry room for the Bangalore Meteorological Observatory, at a probable cost of Rs. 320, and also for a further sum of Rs. 95 for wooden posts and iron bars for the enclosure. The plan and estimate of the proposed barometer room are forwarded herewith.

---

From Miss E. ISIS POGSON, F.R. Met. Soc., Meteorological Reporter, Madras, tot he Chief Secretary to Government, dated Madras, 19th May 1887, No. 277.

In continuation of this office letter, No. 271, of the 18th instant, the undersigned has the honor to forward herewith three copies of letters which should have been annexed thereto.

---

From Miss E. ISIS POGSON, F.R. Met. Soc., Meteorological Reporter, Madras, to the Chief Secretary to Government, dated Madras, 21st May 1887, No. 279.

As the Meteorological Reporter to the Government of India informs me that the construction of masonry buildings does not fall within the category of works of petty constructions, &c., provided for in his budget, and he has no funds at his disposal to meet such calls, I have the honor to forward herewith a plan and estimate, amounting to Rs. 300, for the construction of an anemometer staging at Kurnool, and to request the favor of special sanction of the Government of Madras, and provision of funds for the erection of the same.

2. The Meteorological Observatory at Kurnool was started on the 3rd of February 1883, but the difficulty of procuring a suitable structure for the anemometer and wind vane has prevented these instruments from being used hitherto.

3. The Collector of Kurnool is the local Superintendent in charge of the Kurnool Meteorological Observatory, and as he states that it is doubtful whether the roof of the cutcherry would bear the weight of the wood-work and instruments, it is proposed to build a suitable brick building at the side of the cutcherry, which will be far more durable than any construction of wood-work.

---

From Miss E. ISIS POGSON, F.R. Met. Soc., Meteorological Reporter, Madras, to the Chief Secretary to Government, dated Madras, 11th August 1887, No. 387.

In reply to memorandum, No. 2165, dated 23rd June 1887, I have the honor to state that the cost of the erection of the Kurnool Observatory was met from Imperial
