Conservancy Establishment

The — required in the Negapatam division during 1886-87, sanctioned.

7TH JANUARY 1887, No. 24 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following papers :—

From G. T. WALCH, Esq., Superintending Engineer, I Circle, to the Chief Engineer, Public Works Department, dated Dowlaisweram, 23rd November 1886, No. 2028 G.D. :—

I have the honor, herewith, to submit a proposition statement in the prescribed form for sanction for the increase of river conservancy establishment in the Godáviri district.

2. The two superintendents and the eight lascars who were sanctioned several years ago have been employed in the Godáviri Eastern and Western divisions on the river embankments, for which they were sanctioned. The superintendent and the lascar now applied for are specially required for looking after the first 17 miles of the Gowtami right bank and of the Vasista left bank, in the Godáviri Central division, which do not lie quite close to canals. These embankments have hitherto been looked after by an establishment paid from an estimate specially sanctioned for the purpose from the amount allotted for river embankments, but this seems to me not to be the proper course to adopt.

No. 217.

Note by the Chief Engineer for Irrigation.

The establishment in question is, I think, necessary, and if the general principle of charging such expenditure to Establishment is accepted, the proposals should be sanctioned.

2. I think, however, that the principle is of very doubtful soundness; the work done seems to me to come more legitimately under the head of "Works" and I see no reason why it should not continue to be so charged.

3. I have always been of opinion that a large quantity of our existing conservancy establishment should be charged to "Works"; all those in fact who are engaged in actual maintenance, such as bankers, &c., and in working of sluices, locks, &c., only such men as superintendents being charged to "Establishment."

4. I am much more disposed to restrict the debits to Establishment than to extend them; but of course if it be accepted as a general principle that such charges as those under consideration come under that head, the particular proposal in question is correct.

(Signed) J. PENNYCUICK, Lieut.-Col., R.E.,
9th December 1886. Offg. Chief Engineer for Irrigation.

Office note from the Examiner, Public Works Accounts, to the Secretary to Government, Public Works Department, dated Madras, 17th December 1886, No. 654.

Your office note No. 4406 C., dated 10th instant.

The classes of Irrigation employes chargeable as "Establishment" are given in Code paragraph 20, but I am unable to say what their functions and duties are.

2. For the conditions under which establishment may be charged to Works, see Code paragraph 935 ; but I doubt if these rules are meant to apply to conservancy establishments, or any establishments entertained as part of the regular staff of a project or scheme in full operation.

ORDER—dated 7th January 1887, No. 24 W., Public Works.

The conservancy establishment mentioned in the statement submitted by the Superintending Engineer, I Circle, may be charged to Works, in accordance with previous practice.

2. The note by the Chief Engineer for Irrigation will be communicated to all Superintending Engineers, who will report whether any portion of the petty establishments employed in their circles, and now charged to the head "Establishment" can legitimately be charged to "Works."
