Some new machinery & pumping has been fitted up at Guindy and the Supt of the Workshops has submitted an Estimate (& pattern & other necessary works) for the H.P. but no funds have been allotted.

It is important that the tube Wells be put in before pumping is regularly Commenced at Guindy as the back thirst of the works after each Strike of the pumps causes a freak for the machinery, & if a break down occurs it will be difficult to get matters straight.

The Est is under 500 Rs

Memo

The Supdg Engr V Circle is requested to ~~take into consideration~~ consider the question of providing without delay a valve & other works necessary for the Sandy Water Works - without a valve it is likely that the pumping machinery may be seriously injured - If the S.E. is unable to allot funds for the purpose, early application for the same should be made to this Office.
