*Proceedings of the Madras Government, Public Works Department,
18th September 1867.*

No. 437. Read the following letter from the Acting Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 9th September 1867, No. 2,802:—

1. I have the honor to submit, for the sanction of Government and entry in the Budget of 1867-68, an estimate for a small irrigation work in the North Arcot District, which promises to be remunerative to Government. The project
- 1 Estimate.
1 Plan.
1 Ayacut Statement.

consists of excavating a channel from the Palar river, and building an aqueduct for the irrigation of the villages of Seevaram and Seerunavalpet, and amounts to Rupees 3,625, an estimate and sketch plan for which are enclosed.

2. These villages are at present irrigated by two small tanks, which do not obtain a sufficient supply of water for the land which is under them, and by cutting a channel from the above river, three miles in length with a fall of two feet per mile, 62 Acres of Poonjah land and 124 Acres of land now lying waste, will be brought under Nunjah cultivation. The ryots will obtain spring water at the head of the cutting by a channel cut by themselves in the bed of the river, and in one or two places, appropriation for a short distance will be made of another village channel, by excavating a new course for the portion so appropriated.

3. The present area under cultivation amounts to 119 Acres, with an assessment of Rupees 439, and highest revenue in five years of Rupees 341. The conversion of 62 Acres of Poonjah and 124 Acres of waste land is calculated by the Revenue Department to yield an increase of 217 and 490 Rupees respectively, or 707 Rupees in all, being 19 per cent. on the proposed outlay.

4. The Acting Sub-Collector has recommended this project, and the Collector has on one or two occasions urged its execution, and fully approves of this application for its entry in the Budget lists to be submitted to Government.

No. 438. ORDER THEREON, 18th September 1867, No. 2,892.

IRRIGATION, No. 21.

	RS.
Highest revenue during the last 5 years...	341
Expected increase	707

As it appears from these papers, that the proposed new channel from the Palar river for the irrigation of the Seevaram and Seerunavalpet villages in the North Arcot District is likely to be highly advantageous and to ensure a return to Government of 19½ per cent. on the outlay, the Government sanction the estimate of Rupees 3,625 for entry in the Budget of 1868-69.

(True Extract.)

(Signed) J. H. M. SHAW STEWART, Major, R. E.,

Under Secretary to Government.

Sir,

I have the honor to submit for the sanction of Government and entry in the budget of 1867/68 an estimate for a small irrigation work in the North Arcot District which promises to be remunerative to Government. The project consists of excavating a Channel from the Palar River and building an aqueduct for the irrigation of the villages of Chevaram and Cherunavalpet, and amounts to Rupees 3625, an estimate and sketch plan for which are enclosed.

2 These villages are at present irrigated by two small tanks which do not obtain a sufficient supply of water for the land which is under them, and by cutting a channel from the above River, three Miles in length with a fall of 2 feet per Mile, 62 acres of poonjah land and 124 acres of land now lying waste, will be brought under poonjah cultivation. The ryots will obtain

spring water at the head of the cutting by a channel cut by themselves in the bed of the River, and, in one or two places, appropriation for a short distance will be made of another village channel by excavating a new course for the portion so appropriated.

3 The present area under cultivation amounts to 119 acres, with an assessment of Rupees 439, and highest revenue in 5 years of Rupees 541. The conversion of 62 acres of poonyah and 124 acres of waste land is calculated by the Revenue Department to yield an increase of 217 and 490 Rupees respectively, or 707 Rupees in all, being 19 per cent on the proposed outlay.

4 The Acting Sub Collector has recommended this project, and the Collector has on one or two occasions urged its execution, and fully approves of this application for its entry in the budget lists to be submitted to Government.

Superintending Engineer's office
V circle Madras

Bangalore 27th March 1888

From

Colonel H. M. Vibart R.E.
Supd Engineer V circle

To

The Chief Engineer
Public Works Department

Sir

With reference to your endorsement
No 320 C dated 24th January 1888 I have
the honor to state that the Executive
Engineer Presidency reports that there
are 18 bags of old records in his office
that it is probable if a search were made
among these, the documents required by
the collector of North Arcot might be found
but that not a single clerk in his office
can be spared to wholly devote his time
to the search and that if a clerk or two
were told off for this duty for an hour
or two daily it will take an indefinite
time for them to go through the old records
in

in question.

The Executive Engineer suggests that two clerks on Rs 15/- each per month be entertained for his duty for two months and that their pay be charged to works. I consider under the circumstances that the extra clerks should be allowed.

I have the honor to be

Sir

Yours Most Obedt Servant
