GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General
Establishment.

READ—the following paper:—

No. 55 E.W.

Note by the Chief Engineer for Irrigation.

The following is the establishment that will be required for the Periyár Works—
see Statement III, page 7, of the Periyár report:—

	On the Hills.	On the Plains.	Total.
Superintending Engineer	1	...	1
Executive Engineer	1	1	2
Assistant Engineers	2	3	5
Mechanical Engineer	1	...	1
Sub-Engineer	1	1	2
Supervisor	1	1	2
Overseers	5	6	11

Most, if not all, of this establishment will be required in the course of the official year, and I would suggest that Government may be asked to sanction its entertainment as it is required. I suppose it will be made up partly from officers transferred from other provinces and by temporary appointments, some of the temporary men appointed being employed elsewhere in the place of men on the permanent list transferred to the Periyár.

2. The establishment appointed will be, of course, at the disposal of the Superintending Engineer for employment on the hill or in the plains as he thinks best.

3. At present the following establishment is employed on the Periyár:—

1 Superintending Engineer. 2 Assistant Engineers.
1 Executive Engineer. 2 Overseers.

Up to March they were employed on the hill, since that they have been at work in the plains near Madura; they all belong to the permanent establishment, and their transfer to the Periyár has crippled the work in the other divisions, as the permanent establishment is not large enough to allow the services of four officers and two upper subordinates being taken away from their ordinary duties. As this is the case, I would suggest that, as soon as possible, temporary men may be appointed in their place.

4. In Colonel Pennycuik's Note, dated 7th January 1888 (paras. 5 and 6), printed in G.O. No. 69 L., dated 30th January 1888, the following establishment in addition to that already on the works is asked for in this month (June):—

2 Upper subordinates for work on the hill.

For the second division in the plains—

1 Executive Engineer,

3 Upper subordinates,

1 Assistant Engineer,

and these should all join as soon as practicable.

Arrangements have been made, I believe, for an Executive Engineer and two Assistant Engineers to join in July. It is to be regretted that one of them cannot join at once to take over the work of demarcation, &c., that has been commenced in the plains. I have directed, until the Executive Engineer or one of the assistants join, that the Executive Engineer, Mr. Taylor, in charge of the hill division (who will probably move his party up to the hill before the end of the month), should leave one of his assistants in charge, so that the work in the plains may be properly handed over as soon as another assistant joins.

5. I request that arrangements may be made for the posting of the five upper subordinates required as soon as possible, three of them should join before the end of the month. I would propose they should consist of—

1 Sub-Engineer,

3 Overseers,

1 Supervisor,

6. When more establishment is required application will be made; but as suggested in para. 1, sanction of Government is asked for the whole establishment required, so that they may be appointed by the Chief Engineer as required without the necessity of special sanction being required in each case.

OOTACAMUND,
12th June 1888.

(Signed)

H. R. MEAD, Colonel, R.E.,
Chief Engineer for Irrigation.

To the Chief Engineer, Public Works Department.

ORDER—dated 16th June 1888, No. 1798 W., Public Works.

The formation of the second Periyár division should be proceeded with at once. The Government are now in correspondence with the Government of India in regard to providing officers of the engineer establishment for the works. The Chief Engineer will arrange for posting the requisite upper subordinate establishment as soon as possible.

2. The office establishment required for the project has been sanctioned in G.O. No. 1791 W., dated 16th June 1888.

(True Extract.)

Captain, R.E.,
Under-Secy. to Govt., P.W.D.

K
Establishment is not large
enough to allow the services
of 4 officers and 2 Upper
Subordinates being taken away
from their ordinary duties.
As this is the case I would
suggest that as soon as
possible temporary men
may be appointed in their
place.

4. In Colonel Pennycook's
note dated 7 January 1888
(paras 5 & 6) printed in G.O. No
69, S. dated 30 January 1888
the following Establishment
in addition to that already
on the works is asked for in
the month, June.

2 Upper Subordinates for work on
the Hill.

For the 2^d Division in the plains

1. Executive Engineer
 1. Asst. Engineer
 3. Upper Subordinates
- and these should all join
as soon as practicable.

Arrangements have been
made I believe for an Executive
Engineer and 2 Asst. Engineers
to join in July. It is to be
regretted

regretted that one of them
cannot join at once to take
over the work of demarcation
or that has been commenced

until the Executive Engineer
or one of the Assistant
join, that the Executive Engineer
Mr Taylor in charge of the
Hill Division (who will probably
move his party up to the Hill
before the end of the month)
should have one of his Apts
in charge, so that the work
in the plains may be properly
handled over as soon as
another Assistant joins.

5. I request that arrangements
may be made for the posting
of the 5 Upper Subordinates
required as soon as possible
3 of them should join before
the end of the month.
would propose they should
consist of

1. Sub Engineer
- 1 - Supervisor
- 3 - Overseers.

6 - When more Establishment
is required application will
be made but as suggested

in para 1, sanction of Govt
is asked for the whole Establish-
ment required so that they
may be appointed by the
1798
Chief Engineer as required
without the necessity of
special sanction being
required in each case.

With regard to office
Establishments &c the proposition
stated in the statement called for from
the Supt of works has not
yet been received, it is requested
that in anticipation of the
detailed sanction required
that the Supt of works may
be authorized to entertain
a Draughtsman and 2 clerks
and 4 Lascars for the Division
on the plains at a cost not
exceeding Rs 150 a month.
