GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Military Works.

READ—the following letter from Colonel M. PROTHEROE, C.B., C.S.I., Officiating Quartermaster-General, to the Secretary to Government, Military Department, dated Ootacamund, 5th June 1888, No. 2112A :—

Referring to G.O. No. 1288 W., dated 2nd May 1888, communicated under Military Department, No. 3548, of 30th idem, I am desired to point out that as the standard plan for Native Infantry places-of-arms, which provides for company bells-of-arms, has been found to be faulty, in consequence of its being deficient in light and space, His Excellency the Commander-in-Chief would recommend that the new places-of-arms for Native Infantry at Bellary may be constructed in wing barracks, so as to be adapted for the arms and accoutrements of wings of the type of those at Perambúr and Secunderabad, plans of which were furnished to Government with this office letter, No. 2768-A, of 6th August 1887.

2. From correspondence which passed last year between this office and that of the Quartermaster-General in India, there seems reason to believe that the question had been raised in Bengal as to whether wing places-of-arms, such as those existing in some stations in this Presidency, would not provide more satisfactorily for the storage of arms, &c., of Native Infantry regiments than bells-of-arms on the standard plan. It is not, however, known whether wing or regimental places-of-arms have been approved for adoption in Bengal.

No. 3992, Military.

Forwarded to the Public Works Department, with reference to Proceedings of Government, No. 1288 W., dated 2nd May 1888, with the remark that the Government in the Military Department concur in the recommendation of His Excellency the Commander-in-Chief.

(By Order.)

OOTACAMUND,
14th June 1888.

(Signed) A. KENNEY-HERBERT, Brigdr.-Genl.,
Secretary to Government.

ORDER—dated 25th June 1888, No. 1896 W., Public Works.

Communicated to the Superintending Engineer, III Circle, who will obtain from the Superintending Engineer, V Circle, plans of the wing barracks at Perambúr, and prepare from them estimates for the proposed new places-of-arms for the Native Infantry Regiment at Bellary.

(True Extract.)

Captain, R.E.,
Under-Secy. to Govt., P.W.D.

Military Works.

READ—again:—

G.O., dated 24th August 1887, No. 2269 W., Public Works.

G.O., dated 7th March 1888, No. 767 W., Public Works.

Read the following Proceedings of the Government of Madras, Military Department, dated 24th February 1888, No. 1354.

Read the following letter from the Quartermaster-General, to the Secretary to Government, Military Department, dated 22nd February 1888, No. 838 A.

I have the honor, by order, to report, for the information of Government, that a portion of the roof and side walls of the east end of the hospital of the Native Cavalry Regiment at Bellary fell down on the 13th instant.

2. Although no warning had been received of its unsafe condition, fortunately no patients were in that portion of the building, so that no one was injured by the accident.

3. The whole building has been vacated on the recommendation of the Executive Engineer, who seems to think it almost certain that it will have to be condemned entirely and replaced by a new one, though he has delayed a definite report to that effect pending further examination of the walls.

4. Recent reports also go to show that the places-of-arms of the Native Infantry Proceedings of Government, No. 5593, dated 12th September 1887, are in the same state of decay as those of the Native Cavalry * to which they are similar in construction and age.

* No. 2269 W., dated 24th August 1887.

5. It seems to the Commander-in-Chief desirable therefore that immediate consideration should be given to the necessity of replacing all the places-of-arms of Native Regiments at Bellary with new buildings, the probability of a new hospital having to be provided for the Native Cavalry being also kept in view.

6. The very small grant for original works in the budget for 1888-89 precludes any possibility of funds to meet such an extensive demand as that above indicated being made available from ordinary sources, His Excellency therefore recommends that no time be lost in bringing the facts, as to the decayed state of most buildings of the Native Regiment at Bellary, to the notice of the Government of India in view to the grant of a special allotment for the commencement of the necessary work in the current year.

7. Though the hospital of the Native Infantry Regiment at Bellary contains sufficient accommodation for the sick of the Native Cavalry Regiment also, it will be essential to provide for the erection of a new hospital for the Cavalry, if the present one is condemned, in anticipation of the early location at Bellary of a second Native Infantry Regiment, the sick of which would require the space now made available for the sick of the Cavalry in the existing Native Infantry hospital.

Order—dated 24th February 1888, No. 1354, Military.

Communicated to the Public Works Department for favor of the necessary action at an early date.

(True Extract.)

(Signed) A. KENNEY-HERBERT, Brigdr.-Genl.,
Secretary to Government.

Order—dated 7th March 1888, No. 767 W., Public Works.

Communicated to the Superintending Engineer, III Circle, who will report the approximate cost of each of the buildings required, in view to an application being made to the Government of India for a special grant of funds. Immediate attention should be given to this subject.

(True Extract.)

(Signed) W. L. C. BADDELEY, Captain, R.E.,
Under-Secy. to Govt., P.W.D.

G.O., dated 12th March 1888, No. 811 W., Public Works.

Read the following letter from A. H. GARRETT, Esq., Executive Engineer, Bellary Division, to the Superintending Engineer, III Circle, dated Bellary, 20th February 1888, No. 2819.

I have the honor to inform you that on my return from camp on the 15th instant I received a letter from the Deputy Assistant Quartermaster-General saying that the roof of the followers ward in the Native Cavalry hospital had fallen in.

2. Fortunately no one was in the ward at the time, or they would undoubtedly have been killed.

3. On visiting the hospital on the 16th instant, I found that the accident had been caused by one of the hip-rafters giving way. These hip-rafters are formed of two pieces of palmyra wood nailed together. The soft wood inside had been completely riddled by white ants. The hard outside portion forming a mere shell which prevented the dangerous condition of the rafter from becoming apparent on inspection.

The sketch in the margin is a cross section of the rafter in which the portion damaged by white ants is shaded.

4. All patients in the hospital had been moved into the verandahs, which are of more recent construction than the main building. The surgery, however, was occupied. This room is situated at the north end of the building, the followers ward being at the south end.

There are hip-rafters in the surgery similar to those which were in the followers ward, and on that account I considered the surgery the most dangerous room of all, and advised that it should be vacated at once.

The state of the palmyra couples in the other rooms can be seen from inspection, as the rafters are of single pieces of palmyra wood and the ravages of white ants are not concealed, as they are in the hip-rafters. But it is, of course, impossible to say from inspection whether the ends of the rafters embedded in the walls are sound or not, and for the present at any rate it will be advisable that no portion of the hospital be occupied except the verandahs.

5. This morning I had a ladder sent down to the hospital, in order to make a closer examination of the hip-rafters in the surgery. With a large knife I was able to ascertain that the inside of the rafters had been eaten by white ants just like the

hip-rafters in the followers ward, and the roof of this room might in consequence give way at any moment.

READ—also the following papers:—

Proceedings of the Government of Madras, Military Department, dated 21st March 1888, No. 2024.

ABSTRACT.—Referring letter from the Quartermaster-General forwarding, with suggestions, correspondence inquiring whether an estimate for a new Native Cavalry hospital, Bellary, should be submitted or an estimate for re-roofing only.

No. 1330 C.

Referred, with advertence to the correspondence marginally noted, to the G.O. No. 767 W., dated 7th March 1888. Superintending Engineer, III Circle, for very early remarks on the question raised in para. 2 of the Quartermaster-General's endorsement.

2. In G.O. No. 767 W., dated 7th March 1888, the Superintending Engineer, was asked to report the approximate cost of a new building for the Cavalry hospital.

(By Order.)

22nd March 1888. (Signed) W. L. C. BADDELEY, Captain, R.E.,
Under-Secy. to Govt., P.W.D.

From Colonel H. SMALLEY, R.E., Superintending Engineer, III Circle, to the Chief Engineer, Public Works Department, dated Bellary, 27th March 1888, No. 2735.

With reference to G.O. No. 767 W., dated 7th March 1888, I have the honor to forward a statement showing the approximate cost calculated from plinth areas of the new Military buildings required at Bellary according to Quartermaster-General's letter recorded in the above.

2. The only objection to re-roofing the present Native Cavalry Hospital is that the walls are stone in mud. Nevertheless, the building is in other respects a satisfactory building, and worth repairing thoroughly.

3. New places-of-arms for the Native Infantry have been approximately estimated for on the standard plans, dated September 1883, and on the present plan which is considered preferable, though more costly.

ENCLOSURE.
Approximate Estimate.

Particulars.	Amount.
<i>Present Cavalry Hospital.</i>	RS.
Re-roofing with teak rafters and Mangalore tiles, demolishing top courses to the depth of one foot and rebuilding with stone in chunam	5,500
A new hospital for 30 men on standard plan	36,000
New Cavalry saddle-rooms on plan lately approved, 1 for each troop = 6 at Rs. 4,500	27,000
New Infantry places-of-arms on standard plan, 1 for each regiment = 3 at Rs. 12,000	24,000
New Infantry places-of-arms on present plan but built with stone in chunam and with roof of Mangalore tiles, 3 for each regiment = 6 at Rs. 10,000	60,000

23rd March 1888. (Signed) A. H. GARRETT, Executive Engineer.

27th March 1888. (Signed) H. SMALLEY, Colonel, R.E.,
Superintending Engineer, III Circle.

From the same officer, dated 19th April 1888, No. 104.

With reference to your memorandum No. 1509 C., dated 10th April 1888, I have the honor to state that the letter from the Military Department bearing your endorsement No. 1330 C., dated 22nd March 1888, has not been received in this office.

2. As regards the inquiry by the Military Department whether an estimate for a new Cavalry hospital should be submitted or an estimate for re-roofing only, I would beg to refer you to paragraph 2 of my letter No. 2735, dated 27th March 1888 wherein I have stated that the only objection to re-roofing the present Cavalry hospital is that the walls are stone in mud; nevertheless, the building is in other respects a satisfactory building and worth repairing thoroughly.

3. Beyond this I am unable to give further information without referring to the letter in question from the Military Department.

ORDER—dated 2nd May 1888, No. 1288 W., Public Works.

As the Superintending Engineer, III Circle, is of opinion that the Native Cavalry hospital at Bellary is worth repairing thoroughly, a detailed plan and estimate for the work should be prepared at once.

2. Detailed plans and estimates for the under-mentioned works should also be submitted as soon as possible:—

New Cavalry saddle-rooms, approximate cost	RS. 27,000
New Infantry places-of-arms on standard plan, approximate cost	24,000

3. Meanwhile, the Government of India will be addressed on the subject of a grant of funds for the works:—

(Here enter No. 1289 W., dated 2nd May 1888.)

(True Extract.)

(Signed) J. O. HASTED, Colonel, R.E.,
Secretary to Govt., P.W.D.To the Superintending Engineer, III Circle.
" Military Department.

LETTER—to the Secretary to the Government of India, Military Department, dated Ootacamund, 2nd May 1888, No. 1289 W.

In forwarding a copy of the Proceedings of this Government marginally noted, relative to the urgent necessity which exists for renewing several of the military buildings at Bellary, I am directed to request that the Government of India may be moved to sanction a special allotment of funds to admit of the under-mentioned works being put in hand during the present official year:—

Re-roofing and thoroughly repairing the Native Cavalry hospital,	RS.
approximate cost	5,500
New Cavalry saddle-rooms, approximate cost	27,000
New Infantry places-of-arms, approximate cost	24,000

2. I am to add that it is not possible, without detriment to other pressing requirements, to appropriate funds for these works from the limited assignment made by the Government of India for military works in this Presidency in 1888-89.

(Signed) J. O. HASTED, Colonel, R.E.,
Secretary to Govt., P.W.D.Exd. F. R. Bantleman.

Military Works.

READ—the following papers :—

From Brigadier-General E. FAUNCE, Quartermaster-General, to the Secretary to Government, Military Department, dated Ootacamund, 18th July 1887, No. 2501 A.

On the inspection of the 2nd Madras Lancers at Bellary by the General Officer Commanding in April 1887, the barracks, places of arms and saddle rooms in use with the regiment were reported to be in a state of such "decay" that no other word describes their present condition.

2. The roofs are said to be sagged, the windows and door arches to be for the most part supported by old worm-eaten palmyra wood, and the saddle racks at all sorts of angles in consequence of the present condition of the walls, which, being of mud faced with stone, fail to hold them firmly.

3. The date of erection of these places of arms is stated in the returns to be "unknown," but they must be very old, the date of erection of the adjoining guard-room being 1815, and as they are described as of "mud faced with stone in clay," His Excellency the Commander-in-Chief would suggest that their condition be brought to the notice of the Public Works Department in view to its deciding whether they, and the adjoining places of arms of the Native Infantry, are worth such complete repair as they would seem to require, or whether it would not be preferable to replace them gradually by new buildings.

No. 4338, Military.

Transferred to the Public Works Department.

(By Order.)

OOTACAMUND,
20th July 1887.

(Signed) A. KENNEY-HERBERT, Brigdr.-Genl.,
Secretary to Government.

From C. J. PETERS, Esq., Superintending Engineer, III Circle, to the Chief Engineer, Public Works Department, dated Bellary, 18th August 1887, No. 894.

With reference to your endorsement, No. 375 D., of 21st July 1887, on letter No. 2501 A., dated 18th July 1887, from the Quartermaster-General, bringing to notice the state of the barracks, * saddle rooms and places of arms of the 2nd Madras Lancers, I have the honor to report that these buildings are not worth the expenditure on repairs that would be necessary to put them into good order if that were possible. I believe you came to

the same conclusion when you inspected some of them on your recent visit. Estimates will therefore be prepared for building new ones, and, according to your suggestions, they will be put in hand as funds are available, and each new building will be placed in the space between two old ones, so that the work may proceed without demolishing the latter until new ones are ready.

ORDER—dated 24th August 1887, No. 2269 W., Public Works.

Communicated to the Military Department.

2. On receipt of the estimates promised by the Superintending Engineer, application will, if necessary, be made to the Government of India for a special allotment of funds for the proposed new buildings.

From

Colonel. M. Protheroe, C.B., C.S.I.
Offg. Quarter Master General.

To

The Secretary to Government,
Military Department.

Sir,

Referring to O.G. No. 1288 W
dated 2nd May 1888, communicated under
Military Department No. 3548 of 30th
idem, I am desired to point out that as
the standard plan for Native Infantry
places of arms which provides for Company
bells of arms has been found to be faulty,
in consequence of its being deficient in
light and space, His Excellency the Com-
mander in Chief would recommend that
the new places of arms for Native Infantry
at Bellary may be constructed in Wing
Barracks, so as to be adapted for the
arms and accoutrements of Wings, of
the type of those at Perambore and
Secunderabad, plans of which were
furnished.

furnished to Government with this
office letter No. 2762 A of 6 August 1887.

2. From correspondence which
passed last year between this office
and that of the Quarter Master General
in India there seems reason to believe
that the question had been raised in
Bengal as to whether Wing Places of
arms such as those existing in some
stations in this Presidency would not
provide more satisfactorily for the storage
of arms &c of Native Infantry Regi-
ments than Cells of arms on the standard
plan. It is not however known whether
Wing or Regimental Places of arms have
been approved for adoption in Bengal.

I have the honor to be,

Sir,

Your obedient servant,

W. B. Thorne Colonel,

Offg. Q. Master General.
