No. 4

MADRAS, D. P. W.,

Bangalore, 9th September 1888.

From,

THE EXECUTIVE ENGINEER,

To,

^{Presidency Division}
Bangalore Water Supply
Investigation Project.
THE Chief Engineer. P.W.D.
Botacarnand.

SIR,

Enc. 1

In continuation of my letter No. 1 dated the 24th Ult. I now have the honor to submit a statement, showing the strength & cost of the Establishment required for the investigation of the two projects & preparation of the required estimates for the supply of water to the Cantonment & Troops at Bangalore.

2 The two surveyors are members of the permanent Mysore Staff whose services have been placed at my disposal; consequently the actual amounts of their pay & allowances have been entered.

3 I am allowing two months survey work for each project, but as far as I now can judge a shorter period will probably suffice for each.

4- Surveyor Appasaami holds 1st class Draughtsman's certificate & if necessary his services can be made available, so the amount

amount of his pay has been entered under this head; but I have received an application from one M. V. Rungavatha Pillay, who also holds a 1st class certificate & has good testimonials. He was transferred from the Madras P. M. S. to Mysore, at the instance of Colonel Le Mesurier and owing to a reduction of establishment & of his pay he has sent in his pension papers; so he is now without employment & if he is still so, when I shall be ready to begin the designs & estimates. His pay will only be Rs 50 per month.

5. The writer I propose to employ so long as the work is in progress, he will be required for copying estimates, checking calculations as well as for ordinary routine work.

6. I would invite attention to para 2 of my letter No. 1 of 24th Ellt. The Engr. Engineer Presidency Division declines to make any advances to me for contingent charges, now being incurred (i.e.) for fixing rain gauges, providing pegs, making borings, sinking trial pits &c &c. He also requires authority to include the pay of myself & establishment in the pay bill of his Division.

7. An indent for Instruments was sent to the Genl. Sup^t. P. M. Stores on

the 1st but up to date no reply has been received.

I have &c &c,
J. Lammie

Engr. Engineer
Bangalore Water Supply.
