Sir,

Handed - 14.9.88. Exec. Engr. Rushikulya division. 19/9/88. Despatched 20.9.88.
I beg respectfully to submit this my 2nd representation for your favorable consideration & recommendation to Government my case has been already explained & brought to notice thro your kind aid and the Executive Engineer Rushikulya division who had strongly recommended my case, but now having received G. O. dated 21st August, stating that under the ruling of Government of India in G. O. No 854, that no leave or allowances can be granted to me for the injury, I received while going actually on duty. When I was employed on this Project I was under the impression I would be treated in the same manner when employed on the Sangum Project, but I am now given to understand I am not so as my pay is now charged to works and not to Temporary permanent Establishment though my pay is estimated & sanctioned for the year in the same way as it was at Sangum, yet I do not see why my pay is now charged to works, on what ever work I have been employed upon I have worked conscientiously to the satisfaction of my Superiors.

I beg to state it is very hard being employed in an unhealthy climate as the Ganjam district which is noted for malicious sickness -

(2) The machinery of the Rushikulya Project, is scattered in three sub-divisions besides having to visit to Gopalpore I have to travel about sixty miles in length & about 25 miles in breadth where the machineries is occasionally placed, and these machineries are to be inspected at least once a month by me, I am very liable to be attacked with malicious fever &c besides as a mechanic as the putting up & dismantling heavy machinery with common coolies that are used to brood beast in villages, they have never seen such heavy machinery in their life & cannot require to four men to do what one ordinary trained man can do elsewhere, and as the lengths of the machinery are always limited but heavy it requires the mechanic to be one of the coolies in fitting or dismantling having had long experience in putting up machinery and knowing how to manage with coolies I have been so fortunate, but if any spite is held by the coolie it is very likely to receive injury, many able and valuable Engineers have lost their lives in working at steam power which is always to be considered dangerous

So

So I beg that this very case maybe represented to Government, so that half pay be granted or some kind remuneration maybe given when actually sick or brought on the permanent Temporary Establishment, so as to get the same privileges of an effective member of the S.P. W. Except my service not being counted for pension as stated by Government of India in their Circular Order.
