S D.O. 9932.

India Office,
Whitehall, S.W.,
25th August 1888.

SECRETARY TO GOVERNMENT * P.W. DEPARTMENT, MADRAS. * 20 SEP.

Sir,

With reference to the following demand contained in Madras Public Works Indent No 6, dated 25th April 1888, forwarded with your letter No 1966 W. of the 2nd July, viz:-

| | |
|---|---|
| Hydraulic Test Pump for boilers with 25 feet of steel pipe, 2 bends, 2 T shut off cocks, with 2 pressure gauges up to 300 lbs. for the Presidency Public Works Workshops. | No 1 |

the estimated cost of which is shewn as £50, I have the honour to observe that for boiler proving purposes in India one of the two forms shewn on the annexed sketch has usually been provided. The prices of these, for 300 lbs pressure, range, as shewn on the sketch, from £6-6-0 for

The Secretary to Government
of Madras in
Public Works Department.

the

A Y 17053. 5 rms.—4/88. I. 969.

Supty Engr 5 Circle

the tripod form, (which is the one generally supplied), to £10-17-0 for the barrow form, and I have to enquire whether one of these would meet the requirements of the Presidency Public Works Workshops.

It is observed that the demand specifies steel piping with bends, but flexible piping is generally provided for use with boiler-provers, being more suitable.

I am therefore to request that you will inform me which description of tubing it is desired should be supplied. Information is also requested as to the purpose for which the 2 T shut off cocks are required, and whether by the items thus described three-way cocks are meant.

I am to ask that you will be good enough to return the sketch with your reply.

I have the honor to be, Sir,

Your obedient servant,

Chs. G. Shaw
