From the Secy to Govt. Public Works Dept.

Return to Secy to Govt. Public Works Dept.

NOTE OF REMARKS. WCR
30.11.88

The estimate under review amounting to Rs 2405 provided for constructing a shed and Cook house for Native Caste patients in the General Hospital at Madras.

The building is to be thatched and the roof supported on cast iron columns. The space between columns are to be filled up with bamboo matting instead of walls.

The accommodation provided is two rooms each 15' x 15' with a 7' verandah all round, two corners of the verandah are to be enclosed to form two baths.

OFFICE OF SURGEON-GENERAL

WITH THE GOVERNMENT OF MADRAS,
Tuticorin
Fort St. George, 22nd October 1888.

9.2
No. 23

From G. Bidie Esq. M.B., C.S.E.,
THE SURGEON-GENERAL WITH THE

GOVERNMENT OF MADRAS,

Fort St. George,

To

THE Chief Secretary to Government
Public Department.

SIR,

I have the honour to forward for the consideration and sanction of the Right Honourable the Governor in Council a plan and estimate amounting to Rupees 2405 (two thousand, four hundred and five) for the construction of a shed at the General Hospital for the accommodation of native gentlemen and easterners who may wish to become in patients.

2. At present there is no place in the institution where such persons can remain under observation and treatment except in a general ward, and as the patients there are often of the lowest classes, it is needless to say that it is extremely repugnant to the feelings of a high caste patient to be placed in their neighbourhood. The possible presence of patients suffering from painful or unsightly diseases is also sufficient to prevent many men from applying for treatment at the

the General Hospital.

3. It occasionally happens too that the head of a department wishes to have a caste man in his office submitted to medical observation or treatment, and that the arrangement cannot be carried out as the Subordinate objects to residence in a common ward at the General Hospital.

4. There are very comfortable special quarters at the hospital where European officers and superior patients can reside and receive the necessary treatment and nursing, and it seems to me an anomaly that no such provision has been arranged for the natives of the country.

5. The proposed accommodation will afford space for 2 patients and allow of friends being in attendance to nurse them if desired. The building is to be a substantial thatched shed and is of a kind that has been found specially suited for hospital purposes. Considering its moderate cost and the great advantages it will afford to the native community, I trust it will be duly sanctioned and orders passed for its early completion.

I have the honour to be,
Sir,
Your most obedt servant,

Edie M.B., C.D.S.
Surgeon General with for

4 June 1870

the General Hospital.
