GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following papers:—

Note by the Chief Engineer for Irrigation.

No. 2973 T.

The accompanying proposition statement of establishment required for the Tank Restoration Scheme for the current official year after 1st January 1889 is submitted to Government for sanction, together with a statement of the required Survey establishment, chargeable to "Works."

2. The Tank Restoration Party in each district deals, in the course of a year, with a considerable number of works, mostly insignificant, in a small area, and this is notably the case in Madura, Chingleput and North Arcot. It is much more difficult to utilise grants under these circumstances than on a few large works in a small area, or on a number of small works spread over a large area, and in order to increase the power of utilising the allotments for the current and future years, it is proposed to start a sixth party, and also to place extra establishment at the disposal of the Superintending Engineer, I Circle, for a commencement of Tank Restoration operations in the Godavari Eastern and Western divisions, where the near completion of the delta works will enable the Executive Engineers to supervise the investigation as well as the execution of Tank Restoration work.

3. It is not proposed to dislocate the arrangements of the Executive Engineers, Godavari Eastern and Western divisions, by allotting to them a special grant thus late in the present official year, and actual execution of works in those divisions will not therefore be begun until April next, but the sixth party might be set to work at once, in order that a certain outturn of estimates may be obtained by the beginning of next official year for the division concerned to begin work upon at once.

4. It is proposed that the sixth party should begin work in Bellary district, and in this proposal the Board of Revenue has expressed its concurrence. If the services of Mr. Amrito Lall Roy Chowdry are again available on his return from privilege leave, he might be placed in charge of the party. Otherwise it will be necessary that one officer should be in charge of No. 6 Party as well as of No. 3, which would be possible though inconvenient, as No. 3 Party will before long move to Cuddapah.

CHEPÁK,
28th November 1888.

(Signed) S. D. PEARS,
for Ag. Chief Engineer for Irrigation,
Tank Restoration Scheme.

To the Chief Engineer, Public Works Department.

PROPOSITION STATEMENT showing the Special Establishment required for the Tank Restoration Scheme for January and February 1888-89.

19TH DECEMBER 1888, No. 3978 W., PUBLIC WORKS.

From the Examiner of Public Works Accounts, dated 7th December 1888, No. 2713.

ORDER—dated 19th December 1888, No. 3978 W., Public Works.

The statement of special establishment required for the Tank Restoration Scheme during January and February 1889 is sanctioned.

2. The proposal to form a sixth Tank Party to work in the Bellary district is approved. Mr. A. L. Roy Chowdry, Executive Engineer, has already been posted to the Ganjam division, and no other officer's services are available at present for the charge of the new party. It must therefore, as suggested by the Chief Engineer for Irrigation, be placed under the orders of the Executive Engineer, No. III Party.

3. The Chief Engineer for Irrigation will submit early proposals with respect to the upper subordinate establishment required for No. VI Party.

4. The statement of work establishment submitted with the paper above recorded will be disposed of in the Irrigation Branch.

5. The sanction accorded in para. 1 of these Proceedings has been registered as Provincial No. 49 W. of 1888-89, and classified as Establishment, Temporary.

"	"	"	1246	"	11th	"	"

Letter to the Chief Commissioner of Burma, No. 1291, dated the 12th March 1887.
Resolution in this Department, No. 1372, dated the 16th March 1887.

Resolution—

The resolutions read above have shown in detail, for each province, the modifications introduced in the distribution of revenues and expenditure, which was defined in 1882.

It was explained in Resolution No. 4150, dated 5th October 1882, that—

"In order to avoid any misunderstanding in this matter, the Governor-General in Council is, therefore, pleased to re-affirm the rule that expenditure coming under a head which is either wholly Imperial or wholly Provincial, or in fixed proportions partly Imperial and partly Provincial, shall be borne accordingly either wholly by Imperial or wholly by Provincial, or by Imperial and Provincial in the proper proportion, without reference to its effect on revenue. In other words, the question of the incidence of any charge on Provincial or Imperial revenue must in case of dispute or doubt be determined solely with reference to the head in the accounts under which such charge should properly be classified."

It is probable that when any such questions arise during the currency of the existing contracts, their decision will be even more simple and direct. The assignments made to the several provinces rest upon the careful investigations of the Finance Committee, and their reports, with the subsequent correspondence arising upon them, will be sufficient to show, in the case of any question arising with reference to any items of revenue or expenditure, whether the class to which the doubtful item belongs, is or is not included in the Provincial contract.

According to the distribution hitherto observed, it is laid down that "extraordinary unclassified items exceeding Rs. 10,000" are Imperial.

Occasional difficulties have arisen in regard to the treatment of similar extraordinary items of receipt by sale of lands or houses or other such Government property not being lands or houses included in the reservation to be presently mentioned. It seems desirable, therefore, to declare that as such extraordinary items (extraordinary, that is, not in the sense of exceeding Rs. 10,000 in amount but in the respect that they arose outside the ordinary course of business procedure) are not included in the calculations on which the assignments are based, they are to be regarded as *prima facie* Imperial. Provincial Governments do not ordinarily claim the right of disposing of valuable Government property in aid of current revenues; but as such transactions

3978
4

occasionally occur, it is necessary to provide that, when they do occur, they shall be presumed to lie outside the Provincial contracts. This reservation is not meant to apply to sales which are really part of a project of expenditure, such as the sale of a Government office, or a Government site, in order to furnish funds towards the purchase or erection of another intended to take its place; a transaction of this kind is within the ordinary course of business procedure, and would come entirely within the Provincial account.

As regards interprovincial adjustments, the same rule as has hitherto applied will continue in operation; it is quoted as follows:—

"The Governor-General in Council has, accordingly, resolved that charges of all kinds, including Pensions, Salaries, Absentee allowances, and Contingencies incurred by one Provincial Government on behalf of another, or by a Provincial Government on behalf of the Imperial Government, or by the Imperial Government on behalf of a Provincial Government, shall be defrayed by the Government on behalf of whom they are incurred, saving that in order to save trouble, such adjustments must be confined to items which are either recurring or exceed Rs. 100.

"This decision will not involve any change in the existing procedure of the public accounts, in which the transactions in question will be finally recorded, as now, where they occur, and not transferred to the accounts of other provinces.

"The desired relief to the disbursing Governments will be afforded through a clearing account, to be kept by the Comptroller-General outside the public accounts."

But both in regard to these and in regard to the recurring contributions of Imperial to Provincial or of Provincial to Imperial, which have been made from time to time in adjustment of the transfer of particular classes of charges or receipts from one account to the other, it is to be remembered that the starting-point for adjustments under the new contract is the actual position of such payments or receipts upon March 31st, 1887; that is to say, the assignment under the new contract, being based upon accounts, which include all such payments and receipts as those of the province in which they actually take place, covers the actual payments and receipts as they stand upon the date thus mentioned. Consequently, all mutual claims of Provincial Governments in respect of recurring charges brought upon each other's accounts before 31st March 1887 cease to have effect under the new contract, and the recurring items which have hitherto been adjusted between Provincial and Imperial will in the same way cease on 31st March 1887. Interprovincial adjustments are required only in the case of new charges imposed by one Government on another after 31st March.

In the case of the Punjab no new contract is made, and it is consequently necessary to regulate its provincial account as if the current account of adjustments was still continued.

The amount of these adjustments in the statements of the first three quarters of 1886-87 was:—

	RS.
Pensions of other Governments paid by Punjab	56,570
Pensions of Punjab paid by other Governments	29,725
Net for nine months	26,845
or for the whole year	36,000

This amount, therefore, will have to be credited to the Punjab by debit to Imperial, in compensation for the charges thrown upon it by the exclusion from interprovincial adjustment of pension charges imposed by one Government upon another before March 31st, 1887.

Order—

Ordered, that this resolution be communicated to the several local Governments and Administrations, to the Comptroller and Auditor General, and to the several Accountants-General and Comptrollers.

28TH NOVEMBER 1887, No. 743 I., PUBLIC WORKS.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

Irrigation.
Establishment.

READ—the following paper:—

No. 149 I.

Note by the Chief Engineer for Irrigation.

The accompanying two statements, one showing the upper subordinate and office establishments and the other the survey establishment employed during the current year in investigating the requirements of Tank Restoration Works, are submitted to Government for approval and sanction.

2. Before the abolition of the Tank divisions, on the 1st March 1887, it was decided that the surveyors whose salaries were charged to Works should be transferred to the ordinary divisions noted in the margin for the purpose of completing the surveys of the minor basins on which they were engaged, their cost being met from the ordinary grant for Works. The Superintendent of Works, Tank Restoration Scheme, accordingly transferred to these divisions the surveyors, draughtsmen and clerks required for the purpose, and forwarded to the Superintending Engineers concerned lists of the men transferred for employment on the survey work. There was misapprehension on the part of some of the Superintending Engineers regarding the appointment of these men, the result being a considerable delay in the resumption of the survey work. In Coimbatore, work was not resumed till 28th March, from which date only salaries were disbursed to them. A claim for pay for the first twenty-seven days was subsequently preferred by the men to the Superintending Engineer, IV Circle, but was disallowed by him on the ground that, under paragraph 935, clause 2 of the Public Works Code, all Work establishments should cease on the stoppage of the works concerned. In his office note, No. 483, dated 25th August 1887, the Examiner of Public Works Accounts states that these men are not entitled to the pay claimed, this decision being based on the surmise (1) that the men were thrown out of employ on the 28th February and (2) that the Executive Engineer, No. II Party, had no authority to transfer them for duty to Coimbatore division.

The facts are that the men in question were specially retained under the orders of the Superintendent of Works, Tank Restoration Scheme, when all other temporary hands were dismissed, and the Executive Engineer, No. II Party, in transferring the men to Coimbatore acted under the orders of the Superintendent of Works, Tank Restoration Scheme. The surveyors were distinctly told that their services were retained, and the delay in putting them to work was no fault of theirs, but was due to misapprehension on the part of the Superintending Engineer, IV Circle. It is therefore considered that the men are fully entitled to pay from the 1st March 1887. The amount of arrears of pay due is Rs. 548-11-3, as shown in the margin, and its payment is recommended for sanction. The amount has been included in the present statements.

From 1st to 27th March 1887.

Name.	Rank.	Rate of pay.	Amount.
Mr. K. R. Ashe	Surveyor	Rs. 100	Rs. 100 0 0
T. G. Ruthna Moodelly	Do.	100	87 1 6
Mr. J. Dewie	Do.	80	87 1 6
" Johnson	Do.	80	69 10 9
" Grayson	Do.	80	69 10 9
Singarevelu Moodelly	Do.	80	69 10 9
A. V. Ramachandra Iyer	Do.	40	43 8 9
Muthugopurtha Moodelly	Draughtsman	40	34 13 6
Singarevelu Moodelly	Do.	40	34 13 6
A. Subramania Iyer	Do.	20	17 6 9
Total			548 11 3

4. The men transferred from the old Tank divisions were retained until the establishment sanctioned in G.O., No. 1103 W., dated 21st April 1887, was organised when the services of those who could not be provided for in the new establishment were dispensed with. The parties which were formed on different dates were all at work on the 1st June. The cost of the establishment employed up to that date is Rs. 7,307, or Rs. 2,549 less than the amount sanctioned for the period 1st March to 31st May; of this sum, Rs. 2,761 are chargeable to Establishment and the balance, Rs. 4,546, to Works.

5. As it is considered that the men transferred to Works as in previous years, their pay has been charged to Works and subjected to the same regulations, the balance of Rs. 4,546 under Establishment in accordance with his suggestion.

5. As it is considered desirable that deserving men and men working in difficult localities should get more than others, the following scale of surveyors, costing Rs. 1,260 per mensem, or Rs. 20 less than the amount sanctioned in G.O. No. 1103 W., dated 21st April 1887, for 16 surveyors at Rs. 80 each is proposed:—

3 Surveyors, Rs. 100 each
9

3	Surveyors, Rs. 100 each	...	...	...	...	...	...	...	...	Rs.
9	" " 80 "	...	...	...	...	...	...	...	...	300
4	" " 60 "	...	...	...	...	...	...	...	...	720
		...	...	...	...	...	...	...	...	240
										<u>1,260</u>

As it is difficult to get correct amount of its work, the amount sanctioned in 1901, for 10 surveyors at Rs. 80 each is proposed.

...	...	240
Total ..		1,260

6. As it is difficult to get competent men willing to work in the Karnool district on account of its unhealthy climate, it is proposed to increase the pay of three surveyors from Rs. 80 to Rs. 100 each, one surveyor from Rs. 60 to Rs. 80, one draughtsman from Rs. 50 to Rs. 70, and another from Rs. 40 to Rs. 50 a month with retrospective effect from the date the men joined the party.

7. Provision has been made for...

posted to No. II Post...

7. Provision has been made for the difference of pay of a Sub-Engineer recently posted to No. II Party, and that of the supervisor in whose place he was transferred. from two to three, and for forming

8. After providing the amount required for increasing the number of sub-parties from two to three, and for forming a new party in the North Arcot division from 1st December next, as sanctioned in G.O., No. 2936 W., dated the 5th instant, there is a saving of Rs. 342-8-1 under Establishment and an excess of Rs. 1,707-7-5 under Works, or a net excess of Rs. 1,365. A saving of about Rs. 1,000 from the amount provided to meet the cost of the establishment for the Central office for Tank Restoration Scheme is anticipated. No specific appropriation is necessary to meet the balance as the full amount provided for forming the new party and for increasing the number of sub-parties will not be required. It is probable that some, if not all, of the men who may be appointed will not join their duties till some time after 1st December next.

CHEPÁK,

Order—dated 28th November 1887, No. 743 L, Public Works.

The statements submitted by the Chief Engineer for Irrigation, showing the establishment employed and to be employed during the current year in investigating the requirements of Tank Restoration Works, are approved as corrected, and, under the circumstances explained, the payment of Rs. 642-11-3, the arrears of pay, from 1st to 27th March last, due to the establishment posted to the Coimbatore division is sanctioned. The increase of pay proposed to the men employed in No. III Party is also sanctioned from the 1st December 1887.

5TH NOVEMBER 1887, No. 2936 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment

READ—the following papers :—

No. 69 E.W.

Note by the Chief Engineer for Irrigation.

In G.O., No. 922, Financial, dated 20th August 1887, communicated in G.O., No. 2360 W., dated 2nd September 1887, it is directed that a programme of operations under Tank Restoration in 1888-89 for an outlay of 6½ lakhs should be prepared.

2. To enable this amount to be expended, it will be necessary to increase the establishment now employed in the preparation of estimates, and, I think, also to give further establishment to the Superintending Engineer to whom the execution of the works is entrusted.

3. At present there is the following establishment employed in investigation in the four districts, namely :—

No. 1 Party, Madura district.
No. 2 „ Chingleput „
No. 3 „ Kurnool „
No. 4 „ Coimbatore „

Each party consists of an Executive Engineer provided from the permanent establishment with two temporary upper subordinates, four surveyors, two draftsmen, four clerks, 35 lascars. The cost of each party, exclusive of the pay of the Executive Engineer, is estimated at Rs. 14,100 per year, and, of this, Rs. 6,000 is charged as Petty to Works, the remainder, Rs. 8,100, is charged to temporary establishment.

4. In the office of the Chief Engineer for Irrigation, there is an Executive Engineer in charge from the permanent establishment, and six clerks, seven draftsmen, seven messengers, &c., the cost of which, with contingencies, is Rs. 10,700 a-year, chargeable to temporary establishment, and Rs. 4,000 for the cost of lithographing, printing, &c. The total establishment is therefore as follows :—

5 Executive Engineers belonging to the permanent establishment.
4 Parties chargeable to temporary establishments provided for in the Provincial Irrigation budget.

	Rs.
For four Parties ...	32,400
For establishment attached to office of Chief Engineer for Irrigation.	10,700
Total ...	43,100
Petty establishment chargeable to Works ...	24,000
For lithographing, printing, &c. ...	4,000
Total ...	28,000
Grand Total ...	71,100

It is considered that an extra upper subordinate with two surveyors, one clerk and fifteen lascars should be added to each party. The cost of this being—

	RS.
1 Upper subordinate	100
2 Surveyors	160
1 Clerk	25
15 Lascars	90
Travelling allowance and contingencies	95
Per month per Party ...	470
Per year " ...	5,640
For four Parties ...	21,560

Of this, Rs. 10,560 will be chargeable to temporary establishment, and Rs. 12,000, being the pay of the two surveyors and 15 lascars, to petty establishment chargeable to Works. It is considered that the Executive Engineers, now that they have their establishments in fair working order, should be able to work an additional sub-party to the two they now have. I would also propose that an additional party should be started in a fifth district, but, as there is no Executive or Assistant Engineer available, that it should be placed under charge of a selected temporary upper subordinate for the present, and that he should carry out, in the first place, the grouping, and eventually be placed under the orders of one of the Executive Engineers in charge of one of the Parties.

5. As this is proposed, it is necessary that the district for this fifth party to work in should be accessible from one of the present parties. One of the following districts that have been surveyed by the Revenue Survey Department and the maps published might be selected:—Nellore, Bellary, Tinnevely, North Arcot. The first three districts are not accessible from any of the head-quarters of the present Parties; as this is the case, I would propose that North Arcot should be selected as the fifth district to be taken up; this is fairly accessible from St. Thomas' Mount, the head-quarters of No. 2 Party. I would propose the following strength and pay for this No. 5 Party for the present:—

	RS.
1 Temporary upper subordinate in charge	200
2 Do upper subordinates, at Rs. 100 each	200
4 Surveyors at Rs. 80 each	320
1 Draftsman	50
2 Clerks at Rs. 25 each	50
34 Lascars	204
Travelling allowance and contingencies	236
Per month ...	1,260
Per year ...	15,120

Of this, the four surveyors and thirty of the lascars would be chargeable to Works as petty establishment, the amount being Rs. 6,000.

6. The following is an abstract of the total cost of the above proposed establishment, showing the amounts chargeable to temporary establishments and to Works—

	RS.
5 Executive Engineers from permanent establishment. (Amount chargeable to temporary establishment to be provided for in the Provincial Irrigation budget.)	
4 Parties, each of three sub-parties	42,960
For establishment attached to the office of Chief Engineer for Irrigation	10,700
For No. 5 Party	9,120
Total ...	62,780

	RS.
Petty establishment chargeable to Works	36,000
Do. do. for No. 5 Party	6,000
For lithographing, printing, &c.	4,000
Total ...	46,000
Establishment charge at 23 per cent.	10,580
Tools and plant charge at 1½ per cent.	690
Total ...	57,270
Grand Total ...	1,20,050

against Rs. 71,000 now sanctioned

7. With a grant of 6½ lakhs for Tank Restoration, this would leave Rs. 5,29,950 for Works and Establishment and Tools and Plant charges, and of this amount Rs. 4,25,663 would be available for works.

8. With regard to strengthening the establishment to carry out the works, I consider it necessary that Superintending Engineer should be given more assistance, and would propose that in the five districts in which the work has to be carried out an additional temporary overseer should be allowed. The cost of this would be charged to Provincial as on the expenditure on Tank Restoration, establishment charges are paid to Provincial. Should the above be approved of, I would propose that sanction be given to increase the establishment for investigation as above sketched out from the 1st December this year; this is necessary in order that there should be sufficient estimates prepared by the working season that begins, it may be said, in March. The expenditure of Rs. 4,25,663 on works is a large amount, and Superintending Engineers will not be able to spend this amount unless they are given sufficient sanctioned estimates early in the year. I do not consider it is any good increasing the establishment before the 1st December, the monsoon would not allow good progress in investigations being made. The extra cost of this establishment is about Rs. 8,000, and can be met from savings in the grant for establishment and works for the Tank Restoration Scheme.

CHETAK,
20th October 1887.

(Signed) H. R. MEAD, Colonel, R.E.,
Chief Engineer for Irrigation.

To the Chief Engineer, Public Works Department.

Note by the Chief Engineer, Public Works Department.

The proposals made by the Chief Engineer for Irrigation have my approval. I am prepared to recommend that Superintending Engineers' hands should be strengthened to any extent that may be necessary to enable them to expend the grants made for works.

(Signed) J. O. HASTED, Colonel, R.E.,
Chief Engineer, Public Works Department.

ORDER—dated 5th November 1887, No. 2936 W., Public Works.

The arrangements proposed by the Chief Engineer for Irrigation to increase the establishment now employed in investigating the Tank Restoration Scheme are approved, with effect from 1st December 1887.

2. A fifth Party will be started in the North Arcot district, under the charge of a temporary upper subordinate for the present, as suggested by the Chief Engineer for Irrigation.

No. 89.

Your office note No. 1838 C., dated 9th May 1888.

A revised proposition statement of temporary establishment for the tank restoration scheme for 1888-89 is herewith forwarded. The provision for upper subordinates is omitted, as requested. The designation of the three men for whom Rs. 12 each are provided has been altered from "draughtsmen" to "copyists," as they are intended solely to be employed in copying plans,—a work on which it will be waste of money to employ draughtsmen.

2. As the last clerk of each of the first four parties may also be employed on drawing, the words "or assistant draughtsman" have been added to his designation.

3. As the drawing work in the No. V party, which has been started this year is more than one man can do, an additional draughtsman on Rs. 30 has been provided for.

4. It is requested that sanction to the proposed scale of establishment may be accorded with retrospective effect from 1st March 1888, the previous sanction having expired on that date.

ENCLOSURE.
PROPOSITION statement showing the special establishment required for the Tank Restoration Scheme for 1888-89.

N. 1/2

Note by the Chief Engineer
for Irrigation

The accompanying proposition
Statement of Establishment required
for the Tank Restoration Scheme
for the current official year after
January 1st 1889 is submitted to
Government for sanction, together with
a statement of the required Survey
Establishment, chargeable to "Works".
2. The Tank Restoration Party in
each district deals, in the course of a
year, with a considerable number of
works, mostly insignificant, in a small
area, and this is notably the case in
Madras, Chingleput, and North
Arcot. It is much more difficult
to utilize grants under these circumstances
than on a few large works in a

small

o

on all areas, or on a number of small
works spread over a large area, and
in order to increase the power of
utilizing the allotments for the
current and future years, it is proposed
to start a Sixth Party and also to
place extra establishment at the
disposal of the Superintending Engineer
& Circle for a commencement of Tank
Restoration operations in the Godavari
Eastern and Western Divisions, where
the near completion of the Delta
works will enable the Executive
Engineers to supervise the investigation
as well as the execution of Tank Restoration
work.

3. It is not proposed to dislocate
the arrangements of the Executive Engineers
Godavari Eastern and Western Divisions
by allotting to them a special grant
thus late in the present official year,
and actual execution of a work in

those Divisions will not therefore
be begun until April next, but
the Sixth Party might be set to
work at once, in order that a certain
outturn of Estimates may be obtained
by the beginning of next official year
for the Division concerned to begin
work upon at once.

4. It is proposed that the Sixth
Party should begin work in Bellary
District and in this proposal the
Board of Revenue has expressed
its concurrence. If the services of
Mr. A. M. S. Sall Roy Chowdhry
are again available on his return
from privilege leave, he might be
placed in charge of the Party.
Otherwise it will be necessary
that one officer should be in
charge of a B. C. Party as well
as of a B. S., which would be
possible though inconvenient as

No 3 Party will before long move
to Gueddalah.

The statement of
Special establishment
required for the Pauls
Restoration Scheme during
January & February 1889
is sanctioned.

2. The proposal to form a sixth Tank party to work in the Bellary Dist. is approved. Mr A. L. Ray Chowdry, Executive Eng., has already been posted to the Gouiam division, and no other Officer's services are available at present for the charge.

of the new Party. It must
therefore, as suggested by
the Chief Engr for Iran,
be placed under the orders
of the En. Engr No III Party.

3. The Chief Engr for
Immigration will submit
early proposals with respect
to the upper subordinate
estate required for No
II Party.

4. The statement of
works estate submitted
with the paper above
recorded will be disposed
of in the Immigration Branch.

5. The sanction accorded
in para 1 of these Pros. has
been registered as Prov
No 49 W of 1900-01. &
classified as Estate
Temporary.
