GOVERNMENT OF MADRAS.
LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From C. J. WEIR, Esq., Officiating Under Secretary to the Government of India, Department of Finance and Commerce, to the Chief Secretary to the Government of Madras, dated Calcutta, 24th January 1888, No. 371.

I am directed to acknowledge the receipt of your letter, No. 1201 M., dated the 16th November last, recommending the grant from Municipal funds of a carriage allowance of Rs. 100 a month to the Executive Engineer, Cuddapah Division, while in charge of the Cuddapah water-supply project in addition to his ordinary duties.

2. In reply, I am to say that an allowance sufficient for the maintenance of a horse is admissible to the Executive Engineer to enable him to perform the work connected with the town water-supply project; but the grant of any allowance in excess of the amount necessary for this purpose would be opposed to the spirit of the Resolution of June 1882 quoted in paragraph 2 of your letter. The carriage allowance of Rs. 100 a month proposed by His Excellency the Governor of Madras seems, therefore, excessive, and the Governor-General in Council considers that the requirements of the case will be met by the grant of a horse allowance of Rs. 25 a month, which is accordingly sanctioned.

Ordered that copy be forwarded to the Public Works Department.

ORDER—dated 13th February 1888, No. 136 M., Local and Municipal.

Communicated to the Chairman, Municipal Council, Cuddapah.

With order

3RD FEBRUARY 1888, No. 107 M., LOCAL AND MUNICIPAL.

GOVERNMENT OF MADRAS.
LOCAL AND MUNICIPAL DEPARTMENT.

READ—again the following papers:—

G.O., dated 1st May 1886, No. 411 M., Financial.

ABSTRACT.—Referring to the Public Works Department, for inquiry and report, paragraph 9 of the Sanitary Commissioner's letter reporting on the project of water-supply in Dindigul, and stating that, if the proposal made therein be not found feasible, the Municipal Council will be asked to report on the scheme of bringing water from Koduvanar.

G.O., dated 22nd November 1886, No. 1172 M., Financial.

ABSTRACT.—Awaiting the result of the experiment now being made of the Dindigul water-supply project, and directing the Sanitary Commissioner to furnish the Superintending Engineer, VI Circle, with the report required in paragraph 7 of his letter.

G.O., dated 12th January 1887, No. 27 M., Local and Municipal.

ABSTRACT.—Recording, pending the result of the experiment at Dindigul water-supply scheme, letter from the Sanitary Commissioner furnishing the information required by the Superintending Engineer, VI Circle.

READ—also the following:

(through the Sub-Collector of Madura), dated Dindigul, 29th No. 119.

I have the honor to report the result of the experiment sanctioned in G.O., Mis. No. 1126 M., dated 10th November 1886.

2. I took charge at Dindigul on 29th September, and found that a large centrifugal pump and engine had been procured from Negapatam. With the piping supplied, I found it impracticable to get nearer the bottom of the well than $2\frac{1}{2}$ feet. The bottom of the well is not level, being considerably deeper in the middle than at the sides. The water in the well (measuring at the side) stood at 13 feet 9 inches.

3. The pump emptied the well down to $2\frac{1}{2}$ feet from the bottom in less than an hour; and it then became apparent that water was pouring freely into the well through cracks in the stones on all four sides, evidently by percolation from the adjoining tank.

4. Mr. Crole (paragraphs 8 and 11 of his letter printed at pages 2 and 3 of G.O., 1st May 1886, No. 411 M., Financial) believed the pumping-shaft to be hermetically sealed by a case "of solid masonry pointed with Portland cement;" but it appears that cement was only applied for about 2 feet below the usual water-level, that being the greatest depth to which the pulsometer then in use could sink the water.

5. The free percolation of the filthy tank water into the well vitiates the whole experiment both as to quantity and quality. However, as the pump had been procured and fitted up at a great expense, and with much trouble, I caused the well to be
