Q. B.

1105
No. 160

Executive Engineer's office,
West Coast Division,
1st April 1889.

From,

Colonel A. J. Fraser R.E.,
Executive Engineer,
West Coast Division,

To,

The Superintending Engineer,
Fourth Circle.

Sir,

In reply to an enquiry as to the effect of last monsoon on the cliff ~~sea~~ at Tangacherri referred to in Government Order No 660 W of 24th February 1888, the Chief Engineer, Travancore, writes as follows in his No 2502, dated 18th March 1889.

"I have recently inspected the Sea Coast near the Flag-staff at Tangacherri and am of opinion that there is not the slightest immediate risk of the sea encroaching as des-

-cribed

Described, indeed I can hardly under-
stand a report being made of such
a possibility.

The last monsoons seem to
have created no perceptible difference
in the beach line. If anything has
to be done eventually it may not be
for many years hence, to prevent the
stays of the flag-staff being under-
mined?

2. Having had an opportunity
of recently visiting the place when
at Quilon, I am much of the same
opinion as the Chief Engineer, but
think that a small sum, two or
three hundred rupees, may use-
fully be laid out in underpinning
a low wall, some 50 ft long, which
bars the entrance into an old bed
of the Coast Canal, and for which
the Travancore authorities will be ap-
plied to for an estimate.

I have &c

(sd) A. J. Fraser, Col. R.E.,
Executive Engineer
