Establishment.

Read—the following paper :—

From the Superintending Engineer, VI Circle, dated 12th March 1889, No. 2614 T.J.
,, ,, ,, VI ,, ,, 16th ,, ,, ,, 2647 T.J.

From W. HUGHES, Esq., Superintending Engineer, VI Circle, to the Chief Engineer, Public Works Department, dated Trichinopoly, 30th March 1889, No. 2 T.J.

In reply to your memorandum, No. 1573 C., dated 25th March 1889, I have the honor to offer the following explanation :—

Vaigai Bridge.—The employment of the temporary clerk on Rs. 15 and five lascars is sanctioned up to the end of the present month, when orders have been given to dispense with the clerk and one lascar. As, however, their pay will be audited only in April, the Madura division officer applied to have their salary for one month included in the establishment statement for next year. The remaining four lascars will be required for the whole year, as there will be other work for Assistant Engineer, Mr. Smith, when the bridge is finished. I cannot say when this will be. It will depend upon whether you sanction the estimate for dressed stone parapets which will be submitted to you in a few days.

2. *Madura Division office and Dindigul Sub-division office.*—The temporary clerks on Rs. 30 and Rs. 20 are absolutely indispensable. The permanent establishment of the division office is only that of a second-class office, while the accounts are so onerous that two of the best clerks are fully employed in assisting the accountant. There are between 500 and 600 estimates to be worked out next year, and there will probably be not less than 300 works in progress at one time. Fully three-fourths of the works are in the Dindigul sub-division, where even with the temporary clerk on Rs. 20 it is very difficult to get the office work done. The irrigation grants alone are Rs. 1,32,808, on roads and buildings (allowing Rs. 15,000 for the Vaigai bridge and Rs. 10,000 for the palace and other works in Madura) the expenditure will be probably Rs. 40,000. It is not, however, the magnitude so much as the number of works which makes the difficulty in the offices. The Draughtsman on Rs. 20 may be dispensed with at the end of September, by which time he will have copied more estimates than can be put in hand next year.

3. *Tinnevelly Division.*—In reply to an inquiry from this office, the Executive Engineer reports: "I cannot definitely say how long the services of the temporary Draughtsman will be required, because his work depends more on the sub-division officers and overseers sending the sketches of site plans, &c., which they send whenever they go to the locality, and this they do when they have no important works to inspect, take levels for preparing estimates, &c. The work turned out by the Draughtsman up to date may be half what he has to do." It is evident from this that

a reply cannot be given to para. 4 of your memorandum. If you think a Draughtsman not required for the whole year, I would suggest that sanction for six months may be given. As regards the continued employment of a clerk on Rs. 15 for the Thenkarai sub-division the Executive Engineer reports that the work of the sub-division office is much more than one clerk can do, as the sub-division contains all the works of the Srívaikuntham Anicut system which necessitates considerable references to the Revenue and other departments regarding their maintenance and proper regulation of water.

4. *Tanjore Division.*—I consider it is necessary to have assistant clerks in both the Tanjore and Máyavaram sub-divisions. There is large number of works in both sub-divisions and a very extensive correspondence. All the time that I have known the division the sub-division clerks have been overworked and have been able to carry on the work only by getting assistance from overseers' clerks, volunteers and others. The employment of volunteers has been lately forbidden in this circle, and this makes it more difficult than ever for the sub-division clerks to get the work done.

5. *Trichinopoly Division.*—The reason given for the demand for an extra clerk for the Musiri sub-division is that the area of the sub-division has been much increased of late. It now comprises the whole of Trichinopoly district north of the Coleroon, an area of 2,400 square miles. The sub-division officer finds it necessary to take his clerk into camp with him, as in many places there is a difficulty about arranging for the receipt and despatch of letters, and there would be much delay in correspondence, if the clerk were left at head-quarters. It is apparently chiefly in order to have some one to put up papers and arrange for their despatch from the office that a second clerk is considered necessary. If sanction is given at all, it should be for the whole year.

6. I have corrected the portion of the statement of establishment which refers to the Madura division, leaving the rest for your disposal.

From W. HUGHES, Esq., Superintending Engineer, VI Circle, to the Chief Engineer, Public Works Department, dated Trichinopoly, 2nd April 1889, No. 15 T.J.

In my letter No. 2 T.J., dated 30th March 1889, I omitted by oversight to reply to para. 6 of your memorandum No. 1573 C., of 26th March 1889. When the Ramnad division was constituted in 1885, two temporary clerks were allowed for the Superintending Engineer's office and were subsequently dispensed with in the reduction of February 1887.

2. Subsequently, the Superintending Engineer, finding his office overworked, applied for the services of one temporary clerk: please see para. 6 of his endorsement printed with G.O., No. 1004 W., dated 28th March 1888.

3. The extra clerk is still required, but may be dispensed with when the Ramnad division is abolished in September next.

Office note from the Examiner, Public Works Accounts, dated 25th April 1889, No. 534.

Enclosure.

1250

ORDER—dated 11th May 1889, No. 1250 W., Public Works.

The temporary establishment required in the VI Circle during 1889-90, as detailed in the statement annexed, is sanctioned.

2. The Government does not consider that sufficient cause is shown for the entertainment of an additional clerk in the Trichinopoly division. The demand is accordingly disallowed.

3. The services of the individuals whose retention has been sanctioned for a limited period should be dispensed with on the dates specified in the proposition statement.

4. The Superintending Engineer will report whether the number of works in progress in the Madura Division has increased since 1887-88, and if so, by how many.

5. The sanction accorded in para. 1 of the Proceedings has been registered as Provincial No. 6 W. of 1889-90, and classified as Establishment, Temporary.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following papers :—

No. 362 M.D.

Report by the Superintending Engineer, VI Circle, on the revised estimate for constructing a bridge across the Vaigai river near Madura, Rs. 3,21,460.

In G.O., No. 358 W., dated 9th February 1886, a second revised estimate, amounting to Rs. 2,46,600, was sanctioned for this work subject to certain alterations suggested by the Chief Engineer, and the work was commenced by the Local Fund Department. But after an expenditure of Rs. 35,613 (including the arrears due) by that department the work was transferred to the Public Works Department, and the work was taken over by this department in November 1886 as per G.O., No. 2281 W., dated 10th September 1886. On taking over charge of the work a further revision as regards design and rates was found necessary and the present estimate was accordingly prepared.

2. The difference between the sanctioned estimate and the revised one is Rs. 74,860, which is chiefly due on the following items :—

	RS.
1. Increase rate	21,725
2. Extra work owing to change of design	
3. Draining foundation	1,000
4. Iron railings	1,141
5. Railway sidings	5,500
6. Compensation for land	5,000
7. Tools and plant and machinery	14,188
8. Establishment	26,306
Total ...	74,860

Item No. 1—Is due mainly to the heavy rates charged by the Railway Company for carrying stones to the bridge site and to the high rate paid to the contractor both for stone and lime, as, under the agreement by the District Board, a large quantity of materials had to be accepted from the contractor. A fresh agreement is being made, by which the rates are somewhat reduced. The first of these causes is the most serious, the rate agreed upon between the District Board and the South Indian Railway being one anna per ton per mile in addition to the cost of constructing the necessary siding and branch line, which brings the total cost up to about one anna and a half per ton per mile, the ordinary rate charged by the rules of the company for stone in truck-loads being six pies per ton per mile.

The distance charged for being eight miles, the cost of carriage amounts to about Rs. 5 per hundred cubic feet (solid) of stone. It would have been infinitely cheaper to have laid down a light railway with hand-worked trucks.

The rate for brickwork has had to be considerably increased, as the material which it was originally proposed to use for bricks was utterly unsuited to the work, and some difficulty has been experienced in getting good material.

Item No. 2.—The height of the piers and abutments were reduced by 2½ feet, and rise and thickness at crown of arches increased by 1½ feet and 6 inches respectively; the spandril arches were omitted and concrete filling in spandrils substituted; the breadth of the foot-path reduced from 3 to 1½ feet; and other alterations suggested by the Chief Engineer in his note printed in G.O., No. 358 W., of 9th February 1886.

4

Item No. 3.—The excess is mainly due to the large amount of fuel required for the large pulsometer, which is a most extravagant machine. Arrangements are being made to replace this by centrifugal pumps.

Item No. 4—Provided for as suggested in paragraph 5 of Chief Engineer's note referred above.

Item No. 5.—This is in accordance with the agreement between the railway officials and the District Board, that the former should construct sidings at Tiruparankundrum and at the bridge for conveyance of stone, the cost of labor and earthwork being defrayed by the latter. The estimate made by the railway officials of the cost of constructing the siding has been greatly exceeded, and no explanation of the excess has been given by them.

Item No. 6.—The amount allowed in the original estimate is found insufficient, as Rs. 14,429 has already been paid, and a further sum is required to pay for the yearly rent of the land over which the siding at Tiruparankundrum is constructed, and it is therefore increased to Rs. 15,000.

Item No. 7.—Before the work was taken over by this department, a sum of Rs. 18,721 on machinery and Rs. 1,091 on tools were spent by the District Board. In addition to the amount spent on machinery, a sum at the rate of $1\frac{1}{2}$ per cent. on the estimated amount is allowed to cover the cost of tools paid by District Board and any required by this department.

Item No. 8.—The excess is due to the provision made at 23 per cent. on the estimated amount.

3. With regard to centerings the design has been slightly modified so as to suit the increased rise of the arch adhering to the general arrangements originally made, as the contract for providing the timber in scantlings has already been given out, and some of it has already been sawn up. The design proposed is, in the opinion of the undersigned, rather more expensive than is necessary, but so much has been done towards preparing the timber that it is not desirable to alter it.

4. The contingencies and petty supervision were reduced to 5 per cent. on the estimate. It will be seen that the excess is almost entirely due to the action of contracts entered into by the District Board or to insufficient provision in the original estimate, both causes beyond the control of this department.

5. The estimate is recommended for sanction.

(Signed) J. PENNYCUICK, Lieut.-Col., R.E.,
Superintending Engineer, VI Circle.

MADURA,
8th July 1887.

From Lieutenant-Colonel J. PENNYCUICK, R.E., Superintending Engineer, VI Circle, to the Chief Engineer, Public Works Department, dated 23rd September 1887, No. 609 M.D.

With reference to your memorandum, No. 484 D., dated 26th ultimo, I have the honor to return the revised plans and estimate of the Vaigai bridge at Madura, obtaining the countersignature of the President of the District Board.

2. I also enclose herein the proceedings of the District Board, Madura, No. 107, dated 10th September 1887.

ENCLOSURE.

Proceedings of the District Local Board, Madura, dated 10th September 1887.

Proceedings No. 107 *of* 1887.

Read letter No. 525 M.D., dated 1st September 1887, from the Superintending Engineer, VI Circle, forwarding a revised estimate for Rs. 3,21,460 for constructing the bridge over the Vaigai at Madura.

Resolution.—Sanctioned; but the Board hope that this is the last estimate. They further are of opinion that at least the Madura Municipality should be called upon to pay its quota of the revised estimate as it is a municipal work in reality.

125

Mis. No. 1506.

Forwarded to the Superintending Engineer, VI Circle, for information.

2. The estimate and plans are returned duly countersigned.

(Signed) E. TURNER,
President.

15th September 1887.

Note by the Chief Engineer, Public Works Department.

Recommended for sanction.

2. The revised estimate is Rs. 74,860 in excess of that sanctioned in G.O., No. 358 W., dated 9th February 1886, of which more than one-third is due to the provision of establishment charges according to the rules.

3. The original provision for tools and plant and machinery was Rs. 8,000, but the District Board had expended nearly Rs. 20,000 on this account before the work was taken over by this department. The excess on this head is Rs 14,188.

4. The agreements made by the District Board with the Railway Company for carriage of stone and with the contractors have led to considerable excesses. The carriage rate is very high in addition to cost of sidings and increased compensation for land. The agreements entered into by the Board were the subject of correspondence with the Government Solicitor, and it is hoped that it may be possible to work at lower rates in some instances.

5. In excavating foundations it was found that, owing to the soil, some of the piers had to be carried down to a greater depth than proposed. This has led to increased expenditure in masonry and also in baling.

6. The main feature in alteration of design is the increase in the rise of arches, 60 feet span, from 12 feet to $13\frac{1}{2}$ feet, a decided improvement which adds comparatively little to the cost.

7. The Superintending Engineer states in his report that the foot-paths have been reduced to $1\frac{1}{2}$ feet in width from 3 feet. The plan, however, still shows two paths of 3 feet in width. It is considered that one path of 3 feet would be preferable to two of $1\frac{1}{2}$ feet.

(Signed) J. O. HASTED, Colonel, R.E.,
Chief Engineer, Public Works Department.

24th August 1887.

ORDER—dated 17th October 1887, No. 2763 W., Public Works.

The third revised estimate, amounting to Rs. 3,21,460, for constructing a bridge over the Vaigai river, near Madura, is sanctioned in supersession of the estimate of Rs. 2,46,600, sanctioned in G.O., No. 358 W., dated 9th February 1886.

2. The excess of Rs. 74,860 is explained in the papers above recorded.

3. Attention is drawn to paragraph 7 of the note by the Chief Engineer, Public Works Department.

4. This sanction has been registered as Local, No. 28 W. of 1887-88.

(True Extract.)

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following letter from W. HUGHES, Esq., Executive Engineer, Madura Division, to the Superintending Engineer, VI Circle, dated 3rd October 1887, No. 490 S.E.:—

I have the honor to bring to your notice that, while the expenditure in Madura is more than in most 1st-class divisions, the grants for this year being about Rs. 3,00,000 for works, the office establishment is only that allowed for a 2nd-class division. Of the four clerks two are fully employed in assisting the accountant,* leaving only two to deal with an onerous mass of correspondence. The accountant and clerks work on an average some nine hours a day, including nearly all Sundays and holidays. I am also temporarily without a storekeeper. It appears to me, under the circumstances, impossible to expect the members of the office to endure this strain for very long without some one getting knocked up, and if such a misfortune happens, a rapid accumulation of arrears will be inevitable. It would be an advantage also and facilitate the despatch of correspondence if I could take a clerk into camp with me. At present I cannot do so. For all these reasons I beg that you will let me have at least one good clerk in addition to the present staff.

* The average number of vouchers to be checked and forwarded to the Examiner has recently been 220 and there are 18 work vouchers for major works to be prepared.

In the office of the South sub-division, I am informed that the clerks work 12 hours a day. Only one clerk is allowed by Government, but some of the subordinate clerks are called in to assist. The sub-division officer informs me that the records prior to the last year and-a-half are in the greatest confusion, and as there are a great many old accounts to settle and old references to be looked up, much current work is unavoidably in arrears; and if even all arrears could be cleared off, there would still be more to do than one man can manage. Besides, the present sub-divison clerk is reported to be slow and inefficient, though willing. I should be much obliged if you can let me have an active and capable man in his place and sanction the employment of a temporary clerk on Rs. 15 for nine months.

No. 677 M.D.

Submitted to the Chief Engineer, Public Works Department, with a request that, under the circumstances explained in the above letter, he would be good enough to sanction the entertainment of two temporary clerks on Rs. 30 and 20 for the Madura division and the Periyakulam or South sub-division offices, respectively.

2. A proposition statement showing the required temporary hands is enclosed.

3. It is undoubtedly true that the work in the Madura division is heavier than that of any other in the circle, and the present Executive Engineer and the Sub-Engineer in charge of the Periyakulam sub-division are doing their best to remedy the shortcomings of their predecessors.

6

4. I am satisfied, by personal knowledge, that the establishment asked for is wanted.

5. The vacancy in the post of storekeeper referred to in the first paragraph of the above letter has been filled up.

THECKADY,
14th October 1887.

(Signed) J. PENNYCUICK, Lieut.-Col., R.E.,
Superintending Engineer, VI Circle.

ORDER—dated 5th November 1887, No. 2935 W., Public Works.

The entertainment of two clerks on Rs. 30 and 20 is sanctioned for six months as proposed.

2. This sanction has been registered as Provincial No. 38 W. of 1887-88, and classified as Establishment, Temporary.

Establishment.

Read—the following letter from J. HANNAN, Esq., Superintending Engineer, II Circle, to the Chief Engineer, Public Works Department, dated Bezváda, 28th January 1888, No. 406 G.L. :—

I have the honor to request you will be good enough to grant me a general permission to appoint a temporary clerk, 5th class, 1st grade, and a temporary lascar on Rs. 6 to work under temporary upper subordinates, who have already been, and will be, appointed to this circle, from, or subsequent to, the date on which such upper subordinates join the several divisions of this circle. These appointments will be duly intimated to the Examiner in the weekly returns. These appointments will cease from the date on which such upper subordinates quit the divisions concerned.

2. In making the above appointments, I beg to bring to your notice that the supernumerary permanent clerks will be first provided for.

To the Examiner of Public Works Accounts, dated 2nd February 1888, No. 433 C.
From the Examiner of Public Works Accounts, dated 11th February 1888, No. 1055.

Order—dated 16th February 1888, No. 537 W., Public Works.

Superintending Engineers are authorised to appoint a temporary clerk, 5th class, 1st grade, and a temporary lascar on Rs. 6, for employment under each temporary upper subordinate sanctioned. It will be understood that the establishment is not to be engaged unless absolutely necessary, and that it must be dispensed with when no longer required. Supernumerary hands must in all cases be first absorbed.

TRICHINOPOLY,
27th February 1888.

(Signed) J. W. RUNDALL,
Superintending Engineer, VI Circle.

10

Submitted to the Chief Engineer, Public Works Department, for sanction.

2. The five upper subordinates in the Ramnad division are working under the Executive Engineer's direct orders, there being no sub-divisions; consequently the work in the division office is heavier than would be the case if there were sub-division establishments. The additional clerk on Rs. 15 now applied for is absolutely necessary.

3. The continued employment of the temporary clerk on Rs. 30 in the Madura division office is recommended for the reasons given in the Executive Engineer's letter, No. 490 S.E., dated 3rd October 1887, printed with G.O., No. 2935 W., dated 5th November 1887. As it is proposed to spend nearly a lakh on irrigation works next year in the Dindigul sub-division, and there will be a very large number of works in hand, the office work will be greatly increased, and the services of an extra clerk on Rs. 20 per mensem are indispensable.

4. The establishment asked for is the same as at present sanctioned. The necessity of employing a special Executive Engineer in charge of the bridge will probably not exist after 30th November; but as it is uncertain when the arches will be finished, and what reductions can be made when the Executive Engineer leaves, establishment for the whole year has been asked for.

5. The services of the temporary clerk are indispensably necessary in order to get the records of the Tinnevelly division into proper order, and the temporary draftsman is required for completing the plans of the Government buildings and lands.

6. An extra clerk on Rs. 15 for the Superintending Engineer's office is also applied for. The office is in correspondence with seven Executive Engineers and four Collectors. Current and routine work is very heavy, and I consider an extra hand is needed. The present establishment frequently work extra hours.

Letter from A. S. Russell Esquire, Executive Engineer, Tinnevelly Dn. to the Superintending Engineer, 6th Circle dated Palamcottah 19th July 1887 No 1226 -

I have the honor to forward herewith an application for temporary Establishment required for this Division for 6 months, and to request that you will be good enough to obtain the sanction of Government to the same -

2. In the application I have applied for the services of 2 temporary Draftsmen on Rs 40 each, and 1 temporary Clerk on Rs 30, for 6 months, the former two to assist in the preparation of the plans, estimates &c as detailed in the accompanying list, and the latter to get the records of the Division office into proper order -

3. From the accompanying list it will be seen that a large number of Estimates are lying over for want of Draftsmen to prepare the plans and estimates - In former years, a temporary Draftsman has usually been sanctioned for this Division, and work is now so much in arrears both in the Division office and Sub-Dn. Office, Tenkasi, that I consider the Draftsmen now applied for absolutely necessary -

4. The records of the office are in very bad order & several days are now often required to obtain a complete file - To remedy this state of things, the additional clerks applied for is required -

---

submitted to the Chief Engineer P. W. D. in continuation of this Office No $\frac{2614 T.9}{12-3-89}$.

2. The temporary Clerk now applied for is proposed to be employed in the North or Mnsiri Sub Dn. office, where the office work has considerably increased, owing to the recent reconstitution of the Sub Dn. The work is now too heavy for one Sub Divisional Clerk. It is requested therefore that the additional temporary C. now applied for may be sanctioned.

Supplemental

Statement of propo-sition for temporary Establishment required during 1889-90.

C. No. 3181.
& 3183.

Note.

The accompanying letter from the S. E. VII Circle is in reply to this office memo: No. 1573 C.d/26th March 1889, in which the S. E. was asked to explain more fully the necessity for the temporary establishment applied for by him.

Vaigai Bridge. In the proposition statement received with the S. E's letter No. 2614 T. J. d/12th March 1889, provision was made for 1 clerk on Rs 15 and 5 Lascars on Rs 6 each for 12 months.

The S. E. now explains that the clerk and 1 lascar will be required for only one and that the remaining 4 lascars ~~remaining~~ will be required for the whole year. The statement will now be corrected accordingly.

approved.

Madura Divn. The S. E. reports that the temporary clerks on Rs 30 and 20 are absolutely indispensable and explains that two of the best clerks are fully employed in assisting the Accountant. In a Second class Division 1 clerk is generally deputed to assist the Accountant; but as the S. E. reports that the accounts are so onerous as to render the employment of two men fully, it is suggested to fer the matter to the Examiner for opinion.

The S. E. while admitting that the grant to the Division for 1889–90 will be below Rs 1,75,000, explains that it is not the magnitude, so much as the number of works, that causes the difficulty in these offices. This explanation should no doubt be admitted, but it is remarked that the S. E. does not now adhere to the explanation given when the proposal for the entertainment of these clerks was first brought up vide G. O. No: 2935 Wd/ 5th November 1887. 37

The explanation then given was that the grant for the Divn was about Rs 3,00,000 while the establishment allowed was that for a second class Division. When it is now pointed out to the S. E. that the grant has since been reduced to Rs 1,75,000, he states that it is not the magnitude, but the number of works that should be considered.

I think this is a sound argument, & might have been put forward before.

The permanent establishment of the Division was carrying out the work without temporary hands prior to November 1887 and it is not explained that the then state of circumstances has now changed. If no further reference to the S. E. is considered necessary, the proposal may be sanctioned; but if it is intended to scrutinise the statement more closely the S. E.

may be asked to report whether the number of works in the Division prior to November 1887 has since increased and if so by how many.

Refer this question to the S E.

As regards the draughtsman on Rs 20 whose employment for the whole year was proposed in the statement, the S. E. now states that his services will be dispensed with at the end of September. The necessary correction will accordingly be made in the statement.

Approved.

38

Tinnevelly Division. As regards the draftsman on Rs 35 required for this Division the S. E. quotes the E. E's report which runs as follows. " I cannot definitely

3/ 38

say how long the Services of the Draftsman will be required because his work depends more on the sub Division Officers and overseers sending the sketches of site plans, and which they send whenever they go to the locality, and this they do when they have no important works to inspect, take levels for preparing estimates &ca. The work turned out by the draftsman up to date may be half what he has to do." It is doubtful whether in the circumstances stated by the E. E. the Draftsman has sufficient work in hand as his work depends more or less on his being furnished with sketches &ca by the

Sub Dl officers and overseers which is only occasional. The S. E. instead of giving his final opinion on the subject says "If you think a draftsman not required for the whole year I would suggest that sanction for 6 months be given." This is not a question to be decided by the Chief Engineer; but as the S. E. suggests that sanction may be accorded for 6 months, the statement will be corrected accordingly, if approved.

Approved.

Temporary clerks for the Tenkarai sub Division of the Tinnevelly Divn and for the Tanjore & Mayavaram Sub Divns. The explanation furnished for the necessity

32 39 39

of these clerks may, if approved, be accepted.

The employment of these clerks may be sanctioned.

Temporary clerk on Rs 15 for the Musiri Sub Division of the Trichinopoly Division. As regards the necessity for this clerk the S.E. explains that the area of the sub Division has been much increased of late and that when the Sub Dn officer takes his clerk into Camp, there should be someone at the Head Quarters to put up papers and to arrange for their despatch from the Office. The entertainment of a clerk for the mere purpose of putting up papers and despatching them does not seem quite necessary, as it is apparent that

125 m

The clerk appears to be required & the appt. may be sanctioned.

the clerk has no other work to do. Orders are solicited as to whether the entertainment of this clerk may be sanctioned.

Approved.

Clerk on Rs 15 for the S. E.'s Office. The S. E. reports that the services of this clerk will be dispensed with when the Ramnad Divn. is abolished in September next. The necessary correction will therefore be made in the statement.

Submitted for orders.

1573C

C. Nos: 2521 & 2545.

Note. 1250

In the accompanying statements the S.E. VI Circle applies for the temporary establishment required during 1889-90. The establishment for the Ramnad Division is absolutely necessary; but in the case of other Divisions which have been permanently organised, the demands seem very excessive and therefore need some special justification. The only explanation given by the S.E. as to the necessity for the retention of the establishment is that the amount of work to be done is the same as last year. This explanation is not satisfactory and it is therefore proposed to call for a full explanation from the S.E.

Madura Division. In G.O. No: 1376 W a/19th May 1887 sanction was accorded to the entertainment of 1 clerk on Rs 15 and 5 lascars on Rs. 6 each in connection with the Vaigai Bridge work in the Madura Division. This bridge should have

2/ 125c

d/ 26th March 1889

now very nearly reached completion and as there is no grant for the wor in the next year's budget, it ma also be assumed that the work will be completed by the end of the current official year. Even if the bridge remains incomplete in the beginning of the next offi year, it is not likely that the wo thereon will continue for more than 2 or 3 months. The S. E. applies for sanction to the retentio of this establishment during 1889-90, but does not state the period for which it will be required, nor does he make any remark as in the case of the Ram Division.

In G. O. No: 2935 W d/5th Novembe 1887 sanction was accorded to the entertainment of two clerks on Rs 30 & 20 on the strong representat of the then Executive Engineer that the grant for the Divisio was about Rs 3,00,000 while the establishment allowed was the for a second class Division. The grant for the Division in 1887- was, as reported by the E. E, ab Rs. 3,25,000 and the current yea grant is only about Rs. 2,25,000 1 lakh less than that of 1887 There is also no probability of the grant for 1889-90 being more than Rs. 1,75,000. As the state f circumstances has altered since 887-88, the office work in the Division should be carried out by the permanent establishment. It is therefore suggested that the S. E. be asked to explain why the permanent establishment f the Division cannot get through the work, the grant for the Divisio having considerably fallen down.

The S. E. also proposes the ontinued employment of the drafts-man sanctioned in connection with the Tank Restoration estimates vide G. O. No: 3082 W d/2nd October 1888. This may be allowed; but it is advisable to ask the S. E. to report whether there are many more Tank Restoration estimates which render the continued employment of the draftsman necessary.

Tinnevelly Division. The S. E. brought to notice that there were several plans and estimates remaining to be prepared in the Division and applied for 2 draftsmen on Rs 40 each, sanction to which was accorded in G. O. No: 2289 W d/25th August 1887. ~~It is [illegible]~~ He now applies for 1 draftsman on.

d/ 26th March 1889

It is probable that the plans and estimates which were said to be in arrears in August 1887 would have now been completed. It is therefore proposed to ask the S. E. what estimates are yet in arrears and why they could not be got up by the permanent establishment.

The clerk on Rs 15 required for this Division is intended for the Tenkarai Sub Division and sanction to his entertainment for 8 months was ~~sanctioned~~ accorded in G. O. No: 2619 W. d/24th August 1888 on the representation that the sub-divisional work was so very heavy that 1 clerk was unable to keep up with it. The S. E. now applies for his continued employment for the whole of 1889-90, which if sanctioned will make other sub-divisions in the Circle seek for the same indulgence. G. O. No: 128 W d/18th January 1889 and C. No: 2545 will prove the above statement. It is therefore proposed to ask the S. E. to explain fully why additional clerks are required for sub-divisions, while most of the largest sub-divisions in the Presidency get on without extra establishment.

Tanjore Dn. The two clerks required for this Division are intended for two ~~divisions~~ sub-divisions. Sanction

3/ 1250

to the entertainment of these clerks for February and March 1889 was accorded in G. O. No: 128 W d/18th January 1889, but the S. E. now applies for their retention during the whole of 1889-90. This will need the same explanation as in the case of the sub-divisional clerk for the Tinnevelly Dn above referred to.

Trichinopoly Dn - The S. E. newly applies for an additional clerk on Rs 15 in the Musiri Sub Dn. If in the circumstances explained by the S. E. the services of this clerk are absolutely necessary, the S. E. should state the period for which he is really required and not apply for his entertainment for the whole year.

S. E's office. The S. E. applies for the continued employment of 1 clerk on Rs 15 whose entertainment was first sanctioned in G. O. No: 1004 W d/ 28th March 1888. The S. E. will be asked to explain fully the necessity for retaining him.

36

No. 1573C d/ 26th March 1889

Memorandum.

With reference to the proposition statements for temporary establishment required during 1889-90, received from the S. E. VI Circle, the undersigned has the honor to ~~observe that~~ inquire whether the clerk on Rs 15 and 5 lascars on Rs 6 each, applied for on account of the Vaigai Bridge in the Madura Division, will ~~not~~ be required for the whole of the next official year, ~~as~~ the bridge should ~~have~~ now be very nearly ~~reached completion and~~ completion, as there is no grant for it in ~~the~~ next year's budget.

2. The temporary clerks on Rs. 30 and 20, originally sanctioned in G. O. No: 2935 W d/5th November 1887 on the representation that the grant for the Madura Division was about Rs. 3,00,000 while the office establishment was that ~~of~~ allowed for a second class Division, ~~will~~ should not now be necessary, as the grant for the Division has considerably

43

37

43

decreased

decreased since 1887-88, and as there is no probability of the grant for 1889-90 being more than Rs. 1,75,000

3. In G. O. No: 3082 Wa/2nd October 1888, sanction was accorded to the entertainment in the Madura Division of a draftsman on Rs 20 for copying Tank Restoration estimates. It should be explained whether ~~there are many new estimates and~~ this work ~~why they~~ cannot now be ~~got up~~ done by the permanent establishment.

4. As regards the draftsman on Rs 35 required for the Tinnevelly Division, ~~a list of~~ the number of plans and estimates which are in arrears and which cannot be ~~got through~~ completed by the permanent staff should be ~~submitted~~ reported.

5. One clerk on Rs 15 for the Tenkarai Sub-Division, two clerks on Rs 10 each for the Tanjore and Mayavaram Sub-Divisions, and 1 clerk on Rs 15 for the Musiri Sub-Division cannot be sanctioned for the whole year. The undersigned will be prepared to recommend to Govt. the employment of these clerks for a few months, if the S. E.

125

127

will report the period for which they are absolutely required and explain why the present Sub-Divisional clerks cannot manage the work without extra establishment as is done in most of the largest sub-divisions in the Presidency.

6. The employment of a clerk on Rs 15 for the S. E's office cannot be recommended unless full explanation is furnished as to the necessity for his retention.

7. In offices which have been permanently organised, work should ~~always~~ be carried out by the permanent staff, and only in cases of absolute~~ly~~ necessity, which should be fully explained, application should be made for a limited number of temporary hands,

8. It is requested that close scrutiny be exercised before proposition statements for temporary establishment are sent forward for sanction, as without such scrutiny they are liable to attain to alarming dimensions.

~~9~~ 8. The S. E's proposition statements will be held back until receipt of full information ~~herein called for~~ on the points above mentioned.

To
The S. E. VI Circle.

Office of the Supdt. Engineer II circle
Trichinopoly. 30' March 1889.
Despd. 2d/4/89

From

W. Hughes Esqr.
Supdt. Engineer II circle.

To,

The Chief Engineer
P. W. D.

Sir,

In reply to your memo No. 1573e dated 25' March 1889, I have the honor to offer the following explanation:-

Vaigai Bridge. The employment of the temporary Clerk on Rs 15 and 5 Lascars is sanctioned up to the end of the present month, when orders have been given to dispense with the clerk and one lascar. As however their pay will be audited only in April the Madura Division Officer applied to have their salary for one month× included in the Establishment statement for next year. The remaining four lascars will be required for the whole year as there will be other work for Assistant Engineer Mr. Smyth when the bridge

× This has not been done for the statement provides for 12 months

43

~~39~~

72

is finished. I cannot say when this will be. It will depend upon whether you sanction the estimate for dressed stone parapets which will be submitted to you in a few days.

Madura Division Office & Dindigul Sub-Division Office - The temporary clerks on Rs 30 and Rs 20 are absolutely indispensable. The permanent establishment of the Division Office is only that of a 2d Class Office while the accounts are so onerous that two of the best clerks are fully employed in assisting the accountant. There are between 500 and 600 estimates to be worked out next year and there will probably not less than 300 works in progress at one time. Fully three fourths of the works are in the Dindigul Sub-Division, where even with the temporary clerk on Rs 20 it is very difficult to get the office work done. The irrigation grants

alone

alone are Rs 132,808: On roads and buildings (allowing Rs 15,000 for the Vaigai Bridge and Rs 10,000 for the Palace and other works in Madura) the expenditure will be probably Rs 40,000. It is not however the magnitude so much as the number of works which makes the difficulty in the offices. The Draughtsman on Rs 20 may be dispensed with at the end of September by which time he will have copied more estimates than can be put in hand next year.

Tinnevelly Dn. In reply to an enquiry from this office the Executive Engineer reports "I cannot definitely "say how long the services of the temporary "Draughtsman will be required because "his work depends more on the Sub-"Division Officers and Overseers sending "the sketches of site plans &c which they "send whenever they go to the locality "and this they do when they have no "important works to inspect, take levels "for preparing estimates &c. The work "turned out by the Draughtsman "up to date may be half what he "has to do". It is evident from this that a reply cannot be given to para 4 of your Memorandum. If you think a Draughtsman not required for the whole year I would suggest that sanction for 6 months may be given. As regards the continued employment of a Clerk on Rs 15 for the Thenkarai Sub-Division the Executive Engineer reports that the work of the Sub-Division office is much more than one Clerk can do, as the Sub-Division contains all the works of the Srivaikuntam Anicut System which necessitates considerable references to the Revenue and other Departments regarding their maintenance and proper regulation of water.

Tanjore Division. I consider it is necessary to have assistant clerks in both the Tanjore and Mayaveram Sub-Divisions. There is large number of works in both Sub-Divisions and a very extensive Correspondence. All the time that I have known the Division the Sub-Division Clerks have been overworked and have been able to carry on the work only by getting assistance from Overseers' Clerks, Volunteers and others. The employment of volunteers has been lately forbidden in this circle and this makes it more difficult than ever for the Sub-Division Clerks to get the work done.

Trichinopoly Division. The reason given for the demand for an extra Clerk for the Musiri Sub-Division is that the area of the Sub-Division has been much increased of late. It now comprises the whole of Trichinopoly District North of the Coleroon an area of 2400 Sq. Miles. The Sub-Division Officer finds it necessary to take his Clerk into camp with him as in many places there is a difficulty about arranging for the receipt and despatch of letters and there would be much delay in correspondence, if the clerks were left at Head Quarters. It is apparently chiefly in order to have some one to put up papers and arrange for their despatch from the office that a second clerk is considered necessary. If sanction is given at all it should be for the whole year.

I have corrected the portion of the statement of Establishment which refers to the Madura Division leaving the rest for your disposal.

I have the honor to be
Sir
Your most obedient Servant

J.Hughes
Supdt. Engineer II Circle.

1. The ~~statement~~ of temporary establishment required in the VI Circle during 1889–90 as detailed in the statement annexed is sanctioned.

2. The Government does not consider that sufficient cause is shown for the entertainment of an additional clerk in the Trichinopoly division. The [illegible] demand is accordingly disallowed.

Recd

~~2~~ 3. The services of the individuals whose retention has been sanctioned for a limited period should be dispensed with on the dates specified in the proposition statement.

~~3~~. 4. The Suptg Engineer will report whether the number of works in progress in the Madura Division ~~[illegible]~~ ~~November 1887 has been increased~~

has since 1887-88 increased, and if so, by how many. ~~The circumstances which necessitated such increase should also be explained.~~

4.5. The sanction accorded in para 1 of the Proceedings has been registered as Provincial No: 6 W of 1889-90 and classified as Establishment; Temporary.

I am glad to see that these appts. are scrutinised so carefully, but I don't think sufficient cause is shown for the clerk in Trichinopoly newly asked for, and I would disallow him. A para can be added & the draft need not be sent to me again.
