SUPERINTENDING ENGINEER'S OFFICE,

V Circle, Madras,

Chepāk, 9th May 1889.

From Colonel W. H. Burton R.E.

To SUPERINTENDING ENGINEER, V CIRCLE,

THE Chief Engineer
P. W. Department.

SIR,

In returning your endorse-
ment No. 1940 C dated 16 April
1889, I have the honor to state
that the General Superintendent
P. W. Stores has filled in - the
Column "Estimated Cost if
obtained through the India
Office" in the Statement. But
as no dimensions of the joists
are given the price of a 21' x 12" x 6"
Rolled Iron joists recently
received from England has
been entered - and a Rolled
Steel girder is in all probability

25 per cent dearer - if of equal
weight.

I have the honor to be

Sir

Your most obedt servant

W H Burton

Colcl.

Superintending Engineer
5th Circle

H.L. 15 May

The local purchase of woodstubs rolled beams is sanctioned, but the remark that they are to replace teak beams of the same dimensions is not understood.

A copy of letter no 897 of 9th May 1889 from the SE & Circle will be furnished to the SE & Circle.

Qued 12.5.89

the means length?

A teak beam 21' long would surely be more than 12' deep or 6" thick
