GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following paper :—

Office note from the Examiner, Public Works Accounts, dated Madras, 10th May 1889, No. 627.

With reference to rule I (2) of the rules for regulating the rents to be charged for Government buildings, printed on page 2 of G.O., No. 2981 W., dated 22nd September 1888, it seems desirable that the Government should fix the number of years to be taken for arriving at the actual average cost of repairs.

2. Under rule I (2) the average cost of repairs is, in the first instance, to be specially estimated in each case by the Executive Engineer on the best data available and be approved by the Superintending Engineer, but this is only by way of commencement; and with reference to the latter part of the same rule it is necessary that the actual cost of repairs should eventually be compared annually with the amount assessed on this account in the rent and the rents revised when necessary, and for this comparison an average must be taken.

3. If the system of quadrennial repairs obtained in this Presidency, I would suggest that eight years be fixed for striking the average, because such a period would ensure the inclusion of two quadrennial periods, neither more nor less; but, as the quadrennial repair system is not adopted here, a slightly shorter period would perhaps be more convenient.

4. I should be glad if the matter could be settled at an early date to enable me to make arrangements for keeping the necessary records of expenditure on repairs.

ORDER—dated 22nd May 1889, No. 1367 W., Public Works.

Eight years will be fixed as the period for striking the average actual cost of annual repairs, referred to in the latter portion of rule I (2) of the Government of India Resolution printed with G.O., No. 2981 W., dated 22nd September 1888.
