22ND APRIL 1889, No. 1075 W., PUBLIC WORKS.

1549

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers:—

From J. HANNAN, Esq., Superintending Engineer, II Circle, to the Chief Engineer, Public Works Department, dated Bezvada, 5th March 1889, No. 2529 K.S.

I have the honor to forward herewith, for your approval and sanction of Government, an estimate, amounting to Rs. 6,540, for constructing a road dam at Lakshmipuram on Tsallapally road in the Bandar taluk.

No. 1492 C.

MEMORANDUM.

The plan and estimate for constructing a road dam at Lakshmipuram are returned to the Superintending Engineer, II Circle, for revision in communication with the Kistna District Board.

2. The rates allowed appear excessive and, from a comparison with the schedule for the Kistna Eastern division, a saving in rates of Rs. 1,980 might be effected.

3. The design for the work seems unnecessarily expensive and is not approved; retaining wall and revetment appears unnecessary, but an apron is required.

4. It is not necessary to floor the whole of the dam with concrete; ordinary metalling should do for the work. The culverts may be built as designed.

5. The Superintending Engineer is reminded that all Local Fund plans and estimates must be as carefully scrutinized as those framed under his direct orders; and that they should not be sent on to the Chief Engineer until the Superintending Engineer is satisfied that the design and estimate are thoroughly satisfactory, and full explanation should be given whenever striking differences in rates are found necessary.

(Signed) H. R. MEAD, Colonel, R.E.,
Ag. Chief Engineer, P.W.D.

21st March 1889.

From J. HANNAN, Esq., Superintending Engineer, II Circle, to the Chief Engineer, Public Works Department, dated Bezvada, 8th April 1889, No. 49 K.S.

With reference to your memorandum No. 1492 C. of the 21st March last, I have the honor to resubmit the estimate for Lakshmipuram road dam, and to state that the work has already been completed.

2. The rates entered in the estimate are not excessive as will be seen from the data herewith forwarded. The rates entered in pencil in the abstract estimate, I presume, are taken by you from the Kistna Eastern schedule, which cannot be taken as a guide, as the rates entered in it are the average rates in the division, and this dam is located some 56 miles from Bezvada and materials had to be conveyed this distance, 11 miles of it being land carriage.

3. I did not and do not approve of the design for the road dam; but, as it was already constructed, it could not be modified.

4. I am sorry to say that Local Fund works all over the Kistna district are being carried on in anticipation of sanction and without proper authority.

5. With reference to para. 5 of your memorandum under reference, I have the honor to state that all Local Fund plans and estimates are being properly checked and scrutinized in this office.

ORDER—dated 22nd April 1889, No. 1075 W., Public Works.

With his earlier letter above recorded the Superintending Engineer, II Circle, submitted for approval and sanction an estimate of Rs. 6,540 for constructing a road dam at Lakshmipuram on the Tsallapally road, Kistna district. As the rates appeared excessive and the design unnecessarily expensive, the estimate was returned to the Superintending Engineer for revision in communication with the Kistna District Board.

2. In reply the Superintending Engineer reports that the work has already been completed, and he explains that the high rates were due to the cost of the carriage of the materials required for the work.

3. This information and explanation should have been afforded by the Superintending Engineer when he first submitted the estimate, sanction to which does not now appear to be necessary.

4. The papers will be communicated to the Local and Municipal Department in view to the issue of the necessary orders with regard to the practice that now obtains in the Kistna district of carrying out Local Fund works in anticipation of sanction, or scrutiny of the estimate and design in the Public Works Department.

(True Extract.)
