Estimate for making — for the use of Bezváda and Sitanagaram quarries in the Kistna Eastern division, sanctioned.

1865

3

Insert the following as para. 1371*A* :—

1371A. When money due to a contractor, or other creditor is attached by a prohibitory order of a court and is afterwards paid into that court, the remittance should be accompanied by a letter setting forth the circumstances under which the payment is made, and asking the court to receive the money, and to sign and return the receipt which should accompany the letter. This receipt, which should be filled in before being sent to the court, should show that the payment is on account of an attached debt and should set forth, *inter alia*, the name and capacity of the actual creditor to whom the money is due by the department, on what account due, and the number and date of the court's order in accordance with which the payment is made. The receipt signed and returned by the court will then be attached to the contract certificate, or other bill, in which the particulars of the creditor's claims are recorded, and will be enfaced in red ink by a reference to that bill, the bill being correspondingly enfaced by a reference to the attached receipt of the court.

[No. 575—21-12-88.]

.....

Para. 1789. *Substitute the following for this paragraph* :—

1789. Ordinarily each manufacturing account will be charged, month by month, with all expenditure incurred upon it, including cost of land taken up, kilns, tools and machinery, and will be credited with the value of the out-turn month by month; but, with the sanction of the government, in special cases, when there is an expectation of continuous operations for a series of at least three years, a subsidiary suspense account, "land and kilns", may be opened, which will be debited with such large items of expenditure on land and kilns, and on expensive plant and machinery, and permanent buildings, as cannot be charged to current operations without unduly disturbing the cost of manufacture. This account will be relieved by periodical debits to the manufacture account, in accordance with the rules in para. 1791A.

1789A. Sanctions (in connection with manufacturing operations) for opening out quarries, taking up land, or for other extensive initial operations, and sanctions for the construction or purchase of permanent or durable buildings and machinery will be regulated by the ordinary rules relating to sanctions for original works, civil buildings; provided that all charges so sanctioned must be debited directly to the current manufacture account, unless they can be debited under the rules of para. 1791A to a duly sanctioned land and kilns account. Permanent buildings likely to have a permanent value, independently of the manufacture concerned, may however, to the extent of such permanent value, be debited to original works—civil buildings.

[No. 576—21-12-88.

2

1865

Insert the following as para. 1791*A* :—

1791A. The opening and the subsequent treatment of subsidiary land and kilns accounts will be regulated by the following rules :—

I. No land and kilns account will be opened without the sanction of the government, and such sanction will not be given unless it is shown that it is desirable to carry on, for general purposes, continuous manufacturing operations extending over a series of at least three years. Separate land and kilns accounts will not be allowed in connection with the manufacture of materials for a specific work, but such an account may be opened as a sub-head of the work account,

II. Subject to the condition that not more than 10 per cent. of the actual cost of the operations of any financial year shall consist of direct charges on account of objects, which, but for the restrictions of this rule might be charged to the land and kilns account,

(1) No debit to the land and kilns account will be allowed on account of any object separately costing rupees 500 or less.

(2) Without the sanction of the government in each case no such debit will be allowed on account of any object costing rupees 1,000 or less.

(3) Charges separately estimated to cost more than rupees 1,000 each may be debited to the land and kilns account with the sanction of the superintending engineer and the concurrence of the examiner.

NOTE 1.—The direct charges to manufacture referred to in the above proviso are meant to be quite distinct from the monthly debits in adjustment of charges originally debited to land and kilns account.

NOTE 2.—When the actual direct charges on account of land and kilns to a manufacturing operation are in excess of the limit prescribed for such charges in rule II above (viz., 10 per cent. of the actual cost of operations) only the excess over such limit will be debited to land and kilns, the balance remaining at debit of the manufacture.

III. Every proposal or application for sanction, to charge any item of expenditure to the land and kilns account must be accompanied by a definite proposal for the complete adjustment of the charge, by debit to the manufacture concerned, in a specified number of years, not exceeding the anticipated duration of the operations.

IV. The period within which the adjustment is to be completed will be stated in the sanction for the debit of the charge to the land and kilns account, and will be determined with reference to the character and permanence or probable duration of the building, plant, or other object concerned, but will in no case exceed fifteen years without the special sanction of the government.

3

V. The arrangement for the adjustment of each charge, as stated in the original sanction, will be binding, unless and until, it is actually modified with the approval of the government, or of other original sanctioning authorities, and will be enforced by the examiner, who will see that the necessary monthly debits to the manufacture account are punctually made in accordance with the sanctioned arrangement. The monthly instalments will begin in the year following that in which expenditure was first incurred, and will be fixed with reference to the actual expenditure standing at debit of land and kilns at the beginning of the year, the instalments for each subsequent year being similarly fixed with reference to the actual debit at the beginning of each year.

[No. 577—21-12-88.]

Appendix D, section iii, page 34, Rule IV. Insert the following as note (3) to this rule :—

(3).—Fees levied under the above rule are to be assigned to the chaplain's clerk when there is one, or when there is no clerk, to the officer searching the register; but no fees are chargeable when registers have to be searched and copies of entries have to be given on behalf of government officers for official purposes.

[No. 578—21-12-88.]

Appendix E. Substitute the following for the present heading of this appendix :—

APPENDIX E.—FURNITURE, &c., TO BE REGARDED AS FIXTURES AND TO BE SUPPLIED TO, AND REPAIRED FOR, THE MILITARY DEPARTMENT BY THE P.W.D.
