PROCEEDINGS OF THE MADRAS GOVERNMENT

Read the following paper

From the Venerable the Archdeacon of 26th April 1887 No 23

With reference to G.O. 5th April 1889 No 28 dealing with the question of repairs to a school house at Comibatom I have the honor to state that there appears to be a confusion between two school buildings at that station.

2. There is one in the Compound of All Souls Church. This was erected by private subscriptions and with the sanction of Government by G.O. 9th of August 1881 No 1967W. This building is used for a Sunday School and other Church purposes but from its situation it is unsuited for a day school. For the repair of this building Government by G.O. No 123, 22nd August 1888 sanctioned Rs 131

The other building, and the one now under consideration is opposite the District Court, and is the one on which the sum of Rs 955.14.10 was spent in 1884.

3. The Chaplain of Comibatom informs me that it would be extremely difficult to re-organise the school at present, and impossible in the present condition of the building

4. Under these circumstances, as the building is the property of

of the Secretary of State, would the Government be
pleased to direct that it should be taken over by
the D.P.W. to prevent further serious dilapidation.
5. The sum of Rs 118 being accumulated
rent less Rs 5.6.5 charged as Municipal Tax, has
been paid into the Treasury to the credit of Government as
directed by the order.

Order, 11 May 1887 No 39
Recorded

2. The proposal made in para 4 will be considered
in the Public Works Department.

Enclosure/
1 Encl.

No. 219 D of 23
May/89

With reference to your Memo No. 343 dated 28th ultimo on endorsement C.D. No. 219 D dated 23rd May 1889 regarding the school house opposite the District Court, Coimbatore, I have the honor to report that the building consists of only one room the inside measurement being 44'-10" ^{long} by 15'-10" broad. The roof has a very steep pitch and is almost similar to a Gothic roof. Owing to this it is very difficult, in fact, almost impossible, to put tiles on in such a manner that they will remain for any length of time without slipping off. At present more than half the roof is without tiles, although it was repaired in 1884. This is owing to the

the pitch being too steep. The walls appear sound and the floor is in fair order. The ventilation at the floor level, is not good, for there is only one door, and the sills of the windows are 5'-2" above the floor, so it is impossible to get a draft of air, at the floor level, through the room.

3 If the building is to be maintained I would recommend, that the whole of the present roof should be taken down and replaced with an ordinary roof the existing timber if sound being used as much as practicable; that an additional door should be opened at one of the windows; and that the sills of the windows be lowered to about three feet, or two and a half feet above the floor.

4 There is a verandah 4 ft wide on the front side formed by the roof extending down to pillars, but there is no verandah on the other three sides. The present verandah must be removed in case a new roof is put up. So it may be necessary to provide for an ordinary verandah in front and on the other sides if it should be decided that the building is to be maintained for

for a school.

5 The windows are glazed, but there are no shutters of any kind to protect the glass, so the result is that a good deal of the glass is now broken. I may say in short, that the whole building must be ~~renewed~~ ^{renewed} except the walls & floor.

I have the honor to be
Sir

Read the following: -

Proceedings in the Ecclesiastical Dept No. 39 of 11th May 1889.

From the Supr Engineer IV Circle No. 273 Encl of 19th June 1889.

FOR ORDERS.

I should like to be simply satisfied
until the Residents make up
their minds as to what to do.
5 Apr 89 No 28 Ecc. Dept. If
it is wanted for any other purpose
than a school, the question
arising it can be taken up

W.S.
6/6/89

It would appear from
the Deed of Conveyance that the
building has been conveyed to
Government on the condition
that it is to be used for a
school. It is not now required
for this purpose, and the
question arises whether, if it is
taken over by the P. W. Dept
it can be otherwise ^{utilized} appropriated.

It would moreover appear
from the Executive Engineer's report
that a large expenditure will
be necessary to render the
building fit for occupation -
