19TH JULY 1889, No. 1245, JUDICIAL.

GOVERNMENT OF MADRAS.
JUDICIAL DEPARTMENT.

READ—the following papers:—

From Colonel C. A. PORTEOUS, Inspector-General of Jails, to the Chief Secretary to Government, dated Ootacamund, 6th June 1889, No. 168.

I have the honor to forward copy of correspondence which has taken place between the Superintendent of the District Jail, Tanjore, and the officer in medical charge thereof, regarding three leper prisoners in confinement in the said jail, and request orders thereon.

2. It is impossible to segregate them all so entirely as to prevent contagion to other prisoners.

ENCLOSURES.

From D. A. McCREADY, Esq., Superintendent, District Jail, Tanjore, to the Inspector-General of Jails, Ootacamund, dated Tanjore, 1st June 1889, No. 865.

Three prisoners suffering from leprosy have been admitted into the jail, they are kept in a block by themselves, each in a different cell, they bathe separately and are kept in their cells without any work, no suitable labor being available for them.

2. On the 16th May 1889, I addressed the medical officer on the question of taking steps to have these prisoners removed, if possible, to the Leper Hospital. Copy of my letter, No. 776, is herewith forwarded, with the reply to the same from the District Surgeon (in original.)

3. I beg also to forward nominal rolls of these prisoners, and request you will, if necessary, kindly address Government on the subject.

4. You will observe that two of the prisoners are sentenced to short terms of imprisonment.

From the Superintendent, to the Medical Officer, District Jail, Tanjore, dated Tanjore, 16th May 1889, No. 776.

There being three prisoners said to be suffering from leprosy, I invite your attention to the necessity of reporting to Government such cases as it may be thought expedient should be treated in the Leper Hospital; this was done on 17th February 1888 in case of No. 3763, Chockalingam: vide Madras G.O., No. 354, dated 11th February 1888, Judicial Department.

From the Acting District Surgeon, Tanjore, to the Superintendent, District Jail, Tanjore, dated Tanjore, 31st May 1889, No. 55.

With reference to your letter, No. 776, dated 16th May 1889, I have the honor to report that there are three convicts suffering from leprosy, viz., first, convict, No. 4658, Rungansendapurian. This individual suffers from patches of anaesthesia, said to be suffering from for the past six months, unable to bend the last two fingers of left hand; complains of no sensation over elbows and knees, the pinna of right ear is slightly thickened, and further states that he has shooting pains all over the body, especially in the extremities and over the small of back.

Second, convict, No. 4629, Rettamalay. This man suffers from leucodemic patch on the lower lip as well as in palms of hands and dorsum of feet, these white patches are surrounded with dark areola with loss of sensation, said to be of one year's duration, and unable to bend the middle finger of left hand, and further suffers from gleet.

Third, convict, No. 4682, Sengamallen. This convict suffers from incipient stage of tubercular leprosy, he is unable to bend the fingers of left hand, has a large anæsthetic patch of skin with loss of pigmentary matter over the left forearm, similar discolorations exist all over the body. The alæ of nose is slightly thickened, the voice is nasal, the posterior nares appears to be obstructed, the feet are swollen and senseless; further suffers from excruciating pain in the left thigh.

Under these circumstances, it would be advisable to segregate them entirely from the other prisoners if it could be arranged, but if there be no such accommodation available, I request that you would be good enough to take such steps as to remove them to Leper Hospital, Madras.

Reference, dated 26th June 1889.

With reference to the recent escape of a convict leper from the Leper Hospital, Madras, the Government considers that a criminal ward should be established there. The Surgeon-General will report at a very early date whether any of the hospital buildings can be adapted for the purpose, and, if so, what establishment, &c., will be required.

(Signed) A. G. CARDEW,
Under Secy. to Govt.

To the Inspector-General of Jails.

" Surgeon-General with the Government of Madras.

From G. BIDIE, Esq., M.B., C.I.E., Surgeon-General with the Government of Madras, to the Chief Secretary to Government, dated Ootacamund, 12th July 1889, No. O-375.

With reference to G.O., No. 2117, of 26th June 1889, I have the honor to submit to His Excellency the Governor in Council copy of a letter from the medical officer in charge of the Leper Hospital, Madras, in which he reports that one block, consisting of two wards capable of holding 16 beds, can be given up for the use of criminal leper patients.

2. This accommodation will probably suffice for some time to come, but instead of the building being enclosed by a wall as suggested by Dr. Cook, I would propose a fence in the shape of a palisade, so as not to obstruct thorough ventilation, which is so necessary in the case of lepers.

3. As regards warders for the inmates, it is suggested that they be allowed in the same proportion as for jails, and that, as far as possible, leper warders be employed, as according to present prevalent opinion, close and continued association with people suffering from the disease involves some risk to the healthy.

ENCLOSURE.

From Surgeon-Major H. D. COOK, M.B., Surgeon, First District, in charge, Government Leper Hospital, Madras, to the Secretary to the Surgeon-General with Government, dated Madras, 5th July 1889, No. 34.

With reference to your No. 3528, of 1st July 1889, forwarding No. 2117 of 1889 from the Under Secretary to Government of Madras, I have the honor to inform you that one of the blocks consisting of two wards capable of holding 16 beds can be set aside exclusively for the use of criminal leper patients. I consider an establishment of four unarmed warders or watchmen sufficient to guard the block—two by day and two by night—and these patients could be placed to a certain extent under jail discipline. There are five criminal leper patients in the hospital at present.

2. If the Government desire, this block might be enclosed by a wall, so as to keep the criminal leper patients entirely apart from the others; the Executive Engineer in this case might be asked to submit a plan and estimate.

2178
2

ORDER—dated 19th July 1889, No. 1245, Judicial.

The Government is of opinion that a criminal ward should be at once established at the Leper Hospital for the reception of leper convicts, and approves of the proposal of the Surgeon-General with Government to constitute the block referred to in the foregoing correspondence into such a ward. The fence suggested by the Surgeon-General should be erected as soon as possible by the Public Works Department, who will be requested to treat the work as a very urgent one and to give it priority. The Government approve of the proposal to employ leper warders, so far as possible; perhaps some of the inmates of the hospital may be willing to accept the service. The entertainment of three warders is sanctioned. The proposed rates of pay should be reported.

2. Under section 541 of the Criminal Procedure Code, the Government is pleased to direct that all convicts certified by the medical officer of the jail to which they are committed to be lepers and sentenced to imprisonment for periods exceeding three months or sentenced to transportation and pronounced unfit to be transported, shall be confined in the criminal ward of the Leper Hospital, Madras. The three lepers referred to in the foregoing letter from the Inspector-General of Jails should be transferred thither, so soon as the necessary arrangements for their secure guarding are complete. The medical officer in charge of the hospital will inform the Superintendent of the District Jail, Tanjore, when he is ready to receive them. A report should also be made to Government to enable the transfer of the convict referred to in G.O., dated 11th July 1889, No. 1193, from the Penitentiary to the criminal ward of the hospital to be ordered.
