PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper:—

From the Superintendent Geological Survey of India, dated
24th July 1889 A.D. 1345.

In reply to your letter of the 16th Instant (No. 434) on the subject of the artesian Boring made at Place's Garden, Kilacheri, Chingleput District, by the Rev. S. Dominic, Superior of the monastery at that place, I have the honor to inform you that, from my personal knowledge of that neighbourhood, I am of opinion that there is good reason for expecting that the boring, if continued, may tap an important water-bearing stratum below the great thickness of clays already passed through. I would therefore recommend the expenditure of a few hundred rupees in continuing the experiment till either a good head of water is met with, or the crystalline rocks are struck. Beyond this point further boring would be useless.

Mr. O'Donoghue's section and the board of specimens accompanying it are herewith returned. The latter reached me in a damaged condition. Many specimens had become detached and several could not be replaced as they had slipped far from their proper positions. Such a collection of specimens is really of no use. They are all far too small for safe determination of the rocks passed through. It is only when the specimens are of good size say 4" to 6" long as in two cases of

of the "Cores" or cylinders cut by a circular borer that they yield really valuable information.

In conclusion I would enquire if I might be furnished with particulars of the results obtained by Monsieur de Bloets in his deep boring in lower valley of the Vostelliar river. A section of this boring would be of great interest to me and a valuable record to keep in my office.

Order:—2 August/89 No. 487.

Mr Bruce Foote's letter will be

communicated to the Revd. the Superior.

2. The Government resolves to sanction a further grant of Rs(500) five hundred from the Provincial reserve in aid of the boring.

3. Separate orders will be passed in the Public Works Department on the last paragraph.
