PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper:—

Letter from the President District Board,
Nilgiris dated 3rd September 1889 No 484:—

The Head Assistant Collector in communication with the late Executive Engineer Nilgiri Division suggested the substitution of iron piping for the bamboo duct which at present leads water to the Gudalur Hospital cistern from its source on the Hill above the hospital and further recommended that the cistern itself should be covered in.

2. The following extract from the Head Assistant Collector's letter No 2265 dated 27th October 1888 explains why he advocates this sanitary improvement.

"A far better plan however would be if the water to the cistern were conveyed

by pipe instead of bamboo and the top of the
"cistern were covered over this would ensure
"the cistern which is about 5 feet deep, being
"kept full instead of limiting it to about 6 inches
"as when I saw it. It would also prevent
"the ubiquitous washerman from checking
"the supply to the cistern as he would be sure
"to do when he could no longer avail himself
"of the supply of the cistern itself."

3. A further consideration urged was
the unhealthiness of Gudalur which rendered
it especially desirable to protect from
pollution a system which supplied drinking
water not only to the Hospital and Police
but also to the general public.

4. Influenced by these facts, the District
Board at a meeting held on 17th April 1889
approved an estimate submitted by their
own Engineer, amounting to Rs 536 for piping
the system from source to cistern and
agreed to bear a moiety of the cost in
consideration of the benefit conferred upon
the

the Police lines, in immediate charge of
the Public Works Department ^{by} whom further
the Board considered the work should be
executed.

3130

5. On receipt of the foregoing resolution,
the executive Engineer furnished a revised
estimate amounting to Rs 910 and expressed
his readiness to undertake the work provided
the Board would defray half the estimated
cost plus 25 per cent on outlay for supervision
and $1\frac{1}{2}$ per cent as charges on account of
Tools and Plant, amounting to Rs 566-7-7
in all.

6. The Board at a meeting held on
the 21st August 1889 sanctioned the
revised charge (Rs 566-7-7) - Vide copy
of Resolution enclosed - as under the
rules the charges for supervision and
Tools and Plant are payable to the
Public Works Department when any
work is entrusted to them unless
they consent to carry out the work
without

without such payment. The rules permit only 1 per cent as charges for Tools and Plant but it will be remembered that a special rate for this District was conceded in G.O. dated 28 February 1887 No. 399 L.

7. Under these circumstances I have the honor to request that Government will be pleased to approve the proposed work, the execution of which is most desirable in the interests of improved sanitation and to sanction the necessary allotment from the General Balance for which an application in the prescribed form is submitted.

8. Funds to the extent of Rs. 900 are available under "Reserve" and it is of course open to the Board to sanction the necessary funds from this source but I have preferred, if Government have no objection to indent upon the General Balance, as the almost entire exhaustion of the Reserve in connection with this project.

3130
so early in the year will necessitate frequent applications to Government later on for allotments from the General Balance on account of minor items with which Government are ordinarily not troubled.

Order thereon dated 15 October 1887 No. 2389 L.

The allotment applied for is sanctioned and the Accountant General is requested to place the amount at the disposal of the Public Works Department.

2. With reference to para 4 of President's letter, he will be referred to G.O. dated 14 June 1887 No. 1055 L. in which the contribution to the Public Works Department for tools and plant has been fixed at $1\frac{1}{2}$ per cent on the value of the estimates.
