2-0 0 1-6

The channel through the pits at Basnaputti was opened and water lowered in the
 Konamona. There are however masses of weed & which have to be cut through
 to allow water to flow freely from one end of the Konamona to the other. There are
 probably no more work at the Gopalpore end for the coolies if it rains heavily
 during October and November.

Work in Konamona Section proceeding steadily.

The channel to lower water in Chatrapur Konamona has been opened. Hope,
 if water is not reduced much, that it will at least prevent any rise during the
 monsoon.

The piecework rates at ~~Konamona~~ are lower as some work done has not been measured.
 Prices of Food grains - 2^d class rice 11 Seers or up to - Ragi 20 Seers.

Rainfall - p. 146.

to Subdy Engineer.

Rainfall. 6th 0.35, 7th 5.14, 8th 0.37, 9th 1.22, 10th 1.32 = 9.00.

Price of good grain. Rice 2nd Sort 11. Price 2nd Sort 11. Price 2nd Sort 11. Price 2nd Sort 11.

During the heavy rain on 7th & 8th water in Chathapam dambara rose 2' (14-82) and the Kuthilanga
 also came down in flood, 8.70. at end of canal. The river crossed the river bank at end and
 breasted into the canal on 9th. On that night the bank at end of dambara also breasted and
 the water from the dambara flowed into the river. Water level on 10th dambara 11.25. Kuthilanga 6.60.
 Chathapam dambara level on 12th 9.79. Height of dambara about 5.00.
