The Supply Engineer
The water in Chakrafure has gone down again, as before as water is reduced to 7.00
Coolies will have to be employed in cutting a channel to 5.00 level to completely
drain the tank - this will probably have to run half a mile into the tank -
water level at Komanona end of Chakrafure tank is 11.50 - and I don't know
why it does not run off. There is no obstruction to its going down to 9.00 - There
Komanona Engineer states that there was very heavy rain on 19th, and the beam is in place
which 6' deep into the soil is hard red clay and gravel. Until the monsoon is over
do not think any one of the tanks can be drained thoroughly.

Rainfall. Nil
Price of food grains. Rice 10.5 annas,
Ragi 27 annas per masha.
