Sir,

In reference to the question in your No. 1235 G.D of 8-8-89 to the President, as to whether the width of road is settled, I have to say that it is 80 and a considerable portion, that is, from Samulcotta to Pulimer has already been made.

2 The question of width had been raised before and I explained the reasons, vide my No 247 of 29-11-88, to the President, on which Col Drake Brockman, the then Superintending Engineer agreed, vide G.O No 388 of 11-2-89.

3 The present road will have a very considerable traffic when finished, and, being in many

places in swampy ground, we shall always have trouble with a less width.

4. The cases referred to, in correspondence previous to this are very similar, namely:- a bank road being constructed through an irrigated and in some places marshy land.

5. I therefore beg that the width already settled and upon which the piece of road between Samulcotta and Pulimer (of which this estimate is a continuation) is made, may be sanctioned. — Specification as asked for is also herewith sent.

I have the honour
