N^o 453 W. 15-2-89.

In my letter N^o 3608 W dated 14.11.88 a proposal was laid before the Govt. the sanction of the Govt. of India was requested for the grant of a Periyar allowance of Rs 150 per mensem to Col. Pennycook R.E. Supd. Engineer in charge of the project works; but circumstances have since occurred which necessitate modification of the proposal made by this Govt.

2. In April next a vacancy in the office of Chief Engineer 1st class & Secretary to Govt. will have to be filled, and the choice of this Govt. would fall on Col. Pennycook as the officer most entitled by seniority & merit to succeed to it. His services however are ~~very~~ much special & urgent in connection with the Periyar project. The Govt. of India will be unable to spare him from it until the close of the next working season i.e. till about 1890; and till then

To
The Secretary to the
Government of India,
P.W.D.

Sir,

In my letter N^o 3608 W dated 14th November 1888, the sanction of the Government of India was requested for the grant of a Periyar allowance of Rs 150 per mensem to Colonel Pennycook R.E. Supd. Engineer in charge of the project works; but circumstances have since occurred which necessitate modification of the proposal made by this Government

2. In April next a vacancy in the office of Chief Engineer 1st class and Secretary to Government will have to be filled, and the choice of this Government would fall on Colonel Pennycook as the officer most entitled by seniority and merit to succeed to it. His services however are much special and urgent.

urgent importance in connection with the Perigar project (as the Govt of India will readily understand) that he cannot possibly be spared from it until the close of the next working season i.e. till about March 1890; and till then the Government will make a temporary arrangement for filling up the Chief Engineer'ship.

3. Meanwhile it must be admitted to be a hardship that because he has made himself indispensable in connection with a work of such magnitude and importance to the State, Colonel Semyenich should have to forego entirely the rank and emolument attached to the appointment for which he is designated by his position in the department and by his qualifications.

The Governor in Council therefore proposes in lieu of the recommendation made in my letter above quoted that while he remains in

charge

charge of the Perigar works he shall be granted the rank and pay of a Chief Engineer 2nd class. I am to point out that the charge involved in this arrangement will fall on Provincial funds and it will, I am to say, be gladly accepted by this Government.

Yours &c

H. R. M.
