Sir,

With reference to G. 6 No 3826 W of 5th Instant, I have the honor to state that the office Establishment of No 1 Divn is so crippled by sickness that it is nearly impossible for the accounts to be prepared in proper time; the accounts it may be added are unusually troublesome owing to the large amount of work being done departmentally.

2. I am about to address you on the question of the office establishment of this Divn and will then make proposals for strengthening it.

Paras 6 & 7 [illegible]

Sir,

In continuation of my letter No 1375PR of 22d December 1888 I have the honor to enclose a list showing the names of the various clerks and draughtsmen employed in No I Periyar Division since its formation in September 1887.

2. It will be seen that to fill seventeen posts, thirty four men have been employed or appointed, and of these six men have resigned or been discharged on account of illness, and five never joined at all; taking the present season only twenty nine men have been appointed during a period of less than seven months.

(2)

3. The isolated position of these works and the slowness of communication causes great delay in obtaining qualified candidates in place of men who have to leave owing to sickness, and it frequently happens that a man who has applied for employment and whose name is on my register, on being offered a post, delays for some days to answer, and then declines to accept it, thereby causing fresh delay.

4 It occasionally happens that men are available on the spot, who though not qualified under ordinary rules, are capable of doing the work more or less efficiently, and I would suggest that I should be authorised in general terms to appoint unpassed men for a period not exceeding three months, without the necessity of applying for special sanction in each case.

5. This however will not by itself be enough to meet the case; the establishment is so constantly

crippled

crippled by sickness that it appears necessary that a permanent addition should be made to it. The Executive Engineer asks for three additional Clerks, but I do not consider so many to be necessary, and would suggest two more on Rs 35 and Rs 25 respectively; this will probably bring the average strength actually present to about what it should be.

6. In connection with this matter, I enclose a Statement of men employed on office duties whose salaries have been improperly charged to works, and request that sanction may be given for the amount (Rs 242-1-6) to be written back to establishment

7. The fact of these charges having been made to works has only lately come to my knowledge (the greater part of the expenditure was incurred during my absence) and instructions have now been given that under no circumstances

whatever

whatever is the pay of any man employed on office duties to be charged to works without special orders from this office. It is not quite clear why the irregularity was not noticed in the Examiner's office.

Sir

I have the honour to submit for the information of Government copy of a resolution passed by the Harbour Trust Board at their last meeting (in reference to G. O. No 3919 W. dated 13th December) in which Mr. Pogson has been directed to forward for the information of the Board copies of all correspondence with Mr. Parkes relating to the Harbour works

2. The Board note that since 1881 Mr. Parkes has "never given any instructions (and scarcely any before that) to the Harbour Works Engineer, but has "frequently made suggestions which it "was within the discretion of the Superintendent

(10)

Superintendent to adopt or not"

3. At para 6 of the despatch from the Right Honorable the Secretary of State No. 4. dated 7th June 1888. His Lordship says that he wishes "it to be "clearly understood that in no case" "will orders be given by or from "Mr. Parkes;" but that his "Suggestions" "should receive due attention."

4.

While the Board do not object to "unofficial communications" "between Mr. Parkes and their Engineer;" until in June next the Right Honorable the Secretary of State again takes into consideration the desirability of retaining Mr. Parkes services, the Trustees consider that any "Suggestions" he may have to make should, as ruled by the Right Honorable the Secretary of State in the above despatch, be transmitted officially through the India Office to Government, and that the Board should receive the earliest possible intimation of any suggestions, instructions or orders, from whatever source emanating, in any way relating to the Harbour which they hold in trust

P.W.D

Note by the Chief Engineer P.W.D.

With regard to paras 1 to 4 of the Supdg Engineer's letter No. 112 P.R, dated 21st January 1889, the Chief Engineer is strongly of opinion that the restrictions with respect to examination rules should be relaxed in cases of temporary appointments to the Periyar Project Works. The difficulty in procuring men qualified under the examination rules for temporary employment in such an unhealthy locality, is sufficiently illustrated by the Superintending Engineer. Service in the appointments in question does not count for pension, and the great object is to remove so far as as possible, all obstacles in the way of the rapid prosecution of works.

2. It is further recommended that the exemptions applied for in the Superintending Engineer's letters of 23rd January 1889, No. 114 PK, and 25th January 1889, No. 120 PK, be granted.
