To

The Chief Engineer
P. W.

Sir,

ENCLOSURES.

Acctd the Risk. and [illegible] & sketch & say that any enclosure [illegible] & [illegible] to complete the iron work [illegible] is this month M

With reference to G. O. No. 206 W of 25th January 1889 and your telegram dated 27th ultimo, regarding "Improvements to the signalling apparatus of the Negapatam Light house", I have the honor to state, that it is doubtful if the work can be fully completed before the end of March.

2. The gaff ladders, brackets &c cannot be made up locally; these were indented for on the P. W. workshop on the 18th ultimo,

and

12

and upon the date of receipt of these articles depends the completion of the work; if they are received before the end of the current month Rs 400 will be required for payment of workshop bill & drainage, and the amount required for the current year. The articles are very simple and should not take long to make up.

3. There should however be no difficulty in getting the work fully completed early in April. But as it does not appear certain that the workshops will supply the articles before the end of the month, it might be as well to allot the full amount of the estimate Rs 470, together with the required centage for establishment & tools & Plant, early in April.

I have the honor to be
Sir
Your most obedient Servant,
F. W. Campbell Major R. E.
Suptg. Engineer VI Circle.
