GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following paper :—

From C. H. T. NORFOR, Esq., Executive Engineer, Negapatam Division, to the
Superintending Engineer, VI Circle, dated 17th March 1890, No. 903.

I have the honor to inform you that I have been requested by the Salt Department to prepare plans and estimates for certain work connected with their Salt Factory at Vedarniem. My overseer at Tiruturaipundi tells me that the work required is the extension of the Vedarniem canal. Inspectors in the Salt Department have to undergo examinations in survey, levelling and estimating; under the circumstances I request to be informed if this department should do the work. We have already enough to do to prepare our own estimates.

No. 2745 T.J.

Submitted to the Chief Engineer, Public Works Department, for orders.

2. The Superintending Engineer considers that estimates for works to be carried out by the Salt Department should be prepared by that department.

KODAIKANAL,
22nd March 1890.

(Signed) A. C. SMITH, Lt.-Col., R.E.,
Superintending Engineer, VI Circle.

Proceedings of the Board of Revenue (Separate Revenue), dated 19th June
1890, Mis. No. 1823.

MR. H. W. BLISS.

Read—endorsement of the Secretary to Government, Revenue Department, dated
15th April 1890, No. 2341.

Reference thereon to the Deputy Commissioner of Salt and Abkari Revenue,
Southern Division, dated 6th May 1890, requesting him to report as to the
nature and details of the work in question and the circumstances under
which the Public Works Department was asked to undertake its execution.

Read—also letter from the Deputy Commissioner, Southern Division, dated 15th May
1890, No. 1383, reporting on the nature and details of the work connected
with the extension of the Vedarniem canal to the monopoly extension at
Vedarniem and the circumstances under which the Department of Public
Works was asked to undertake its execution.

Resolution—dated 19th June 1890, Mis. No. 1823.

With reference to the endorsement of Government, dated 15th April 1890, No. 2341, Revenue Department, the enclosure to which is herewith returned, the Board begs to state that the work which the Public Works Department was asked to undertake on behalf of the Salt Department related to the extension of the navigation channel to the monopoly extension at Vedarniem intended to facilitate the carriage of salt by boats from the new factory. The Assistant Commissioner, Negapatam Sub-division, was of opinion that the work was of such an important nature as to require professional skill for the preparation of the necessary plans and therefore requested the Executive Engineer, Negapatam, to depute an overseer for the purpose.

2. It is also reported that the assistance of the Public Works Department was sought in the matter of clearance of silt from the portion of the Vedarniem canal within the factory, but that the Executive Engineer having declined to spare the services of an overseer for this work, it was carried out departmentally.

3. In neither of these cases was there any necessity to ask the Public Works Department for assistance. The work was simple, and the Inspector should have been able to make the necessary estimates himself. The local officers will be informed accordingly.

4. The Board presumes that this is the only point on which report is required from it, and that there can be no question as to the right of this department to seek and obtain the advice of Public Works officers in regard to works which require special professional consideration. The engineering knowledge possessed by the ordinary Salt Inspector is not such as to enable him to undertake, unassisted, works not of a very simple character.

(True Extract.)

Proceedings of the Board of Revenue
(Separate Revenue)

Dated 19th June 1890.

No. 1822 Adia.

Mr. A. H. P. P. P.

READ — endorsement of the Secretary to Government,

Revenue Department, dated April 15, 1890 No. 2341.

Reference thereon to the Deputy Commissioner
of Salt and, Athari Revenue, Southern Division,
dated May 6, 1890, requesting him to report as
to the nature and details of the work in
question and the circumstances under which
the P.W. Department was asked to undertake
its execution.

Read also letter from the Deputy
Commissioner, Southern Division, dated 15th
May 1890, No. 1388, reporting on the nature
and details of the work connected with the
extension of the Vedarnim Canal to the
monopoly extension at Vedarnim and the
Circumstances

Circumstances under which the Department of Public Works was asked to undertake its execution.

Resolution

With reference to the Indorsement of Government, dated April 15, 1890, No. 2341, Revenue Department, the Enclosure to which is herewith returned, the Board begs to state that the work which the Public Works Department was asked to undertake on behalf of the Salt Department related to the extension of the navigation Channel to the Monopoly Extension at Vedarnism intended to facilitate the carriage of salt by boats from the new factory. The Assistant Commissioner, Negapatam Sub-Division, was of opinion that the work was of such an important nature as to require professional skill for the preparation of the necessary plans and therefore requested the Executive Engineer, Negapatam, to depute an Overseer for the purpose.

2. It is also reported that the assistance of the Public Works Department was sought in the matter of clearance of silt from the portion of the Vedarnism Canal within the Factory, but that the Executive Engineer having declined to spare the services of an Overseer for this work, it was carried out departmentally.

3. In neither of these cases was there any necessity to ask the Public Works Department for assistance. The work was simple and the Inspector should have been able to make the necessary estimates himself. The local officers will be informed accordingly.

4. The Board presumes that this is the only point on which report is required from it, and that there can be no question as to the right of this Department to seek and obtain the advice of Public Works Officers in regard to works, which require special professional consideration. The Engineering Knowledge

knowledge possessed by the ordinary Salt
Inspector is not such as to enable him
to undertake, unassisted, works not of a
very simple character.
