PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following Proceedings of the Board of Revenue, (Separate Revenue), dated 3rd July 1890, No 1979 Mis; on letter from the Superintending Engineer II circle, dated 29th May 1890, No 564 H.S.

With reference to the Board's Proceedings No 7961 Sub, dated 17th December 1889, I have the honor to report as follows:-

An estimate is now under preparation and will be submitted for sanction within two months for making the Banturmilli Canal lower reach navigable for 9 months in year and for extending it to the Upputeru. The extension will come within a mile or so of the Pandraka salt pans. The work ought to be completed by June 1892.

2. Surplus now finds its way into the Laggabanda in December and January from the lower reach of the Bundar Canal and from channels taking off from the right bank of Pullaru between Corotaram and Pamaru. This cannot be avoided with the present arrangements, but within two years this will be obviated by the conversion of the Kaldindikodu into a drain and by arrangements which will be made for surplussing into the west side channel of the Bundar Canal at Rankipad Lock. I will endeavour to push on the necessary works as quickly as possible.

Resolution.

Resolution.

PW. C. No. 6920/7

2104

2

Submitted for the information of Government in continuation of para 5 of Board's Proceedings, No. 1398, Mis. dated May 11, 1890.

x Noted

2. The Superintending Engineer's letter deals with the measures he proposes to adopt with regard to the improvement of Canal Communication with Pandraka factory and the improvement of its brine supply by keeping out the surplus Canal water which at present weakens the brine. The Board regards it as a matter for regret that the carrying out of these measures should be postponed for so long.

Order thereon, 14th July 1890, No. 4351
