17th September 1890, No. 2484 W., Public Works.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following paper:—

From H. IRWIN, Esq., C.I.E., Consulting Architect to the Government of Madras, to the Chief Engineer, Public Works Department, dated Chepâk, 2nd September 1890, No. 1728.

In compliance with your G.O., No. 1882 W., dated 12th July 1890, I have the honor to submit the estimate called for and to forward a letter from Ellayalwar Naidoo, the owner of a portion, if not the whole, of the ground in question. It appears that he claims to be the owner of the whole of the ground, and the Collector informs me that the ownership is in dispute. I have been to see the land, and evidently the working of it for the purposes of the brickfield would curtail the ground Ellayalwar Naidoo designs to assign as those of his two houses now being constructed and in one of which he lives. Provided the land should prove to be all his property, he might insist on the whole being taken up; this would involve considerable expense as one of the houses is a large and valuable house; he might—and indeed has hinted to me verbally that he might—insist on the whole being taken up if a part is required.

2. Under these circumstances, it would be as well to abandon the idea of taking up this land.

3. If the portion of the Spur tank below the Poonamallee road (see plan enclosed), which is Government property, can be made over to me for the purpose of obtaining clay for the brick and tile manufacture, it will suffice as the materials can be brought to the kilns in the tramway it is proposed to procure.

Order—dated 17th September 1890, No. 2484 W., Public Works.

Under the circumstances stated by the Consulting Architect, the proposal to take up the land belonging to Ellayalwar Naidoo on the eastern side of the Government Brickfields may be abandoned.

2. The proposal to take clay from the bed of the Spur tank is approved subject to the following conditions:—

1*st*—that no pits are dug within 24 feet of the foot of the bank;

2*nd*—that the water-supply of the tank is in no way interfered with, the water being given free access to the portion of the tank on the north of the railway as well as to that on the south.
