To

J. S. Wilson, Esqre

Executive Engineer

Gondwana Contract Dn

To

The Superintending Engineer.

1st Circle

Camp Ralli.

Dated 29th October/89.

Sir,

With reference to your No. 1670 G.O. of 7-10-89 on G.O. No. 2663-16 of 23-9-89, I have the honor to inform you that as regards para 3 of the Examiner's office note No. 1319 of 13-9-89, I find that the Cashier was in the habit of going into Camp 3 or 4 times a month to Bolebirlanka, Talivela & Gopalpur locks which are all beyond the 5 miles radius. I find that the claim was disallowed on 3 occasions in Dis. Allie's lists Nos. 2115 of 87-88, 2814 of 87-88 and 54 of 188-89 but

250/91
Leut in all the 3 cases it was finally
admitted on the Supg Engineer's certificate.

Horre allowance was granted to the
previous Cashier in G.O. No. 1649 W 27 15-7-85.

The present cashier is not drawing
any allowance.

2. With regard to para 11 of the Examiner's
office note, materials are transferred for
general purposes only on very rare
cases such as when it is necessary to
transfer materials remaining at site of a
completed work in order to close the accounts
of the work, when it may be necessary
to transfer them to stock on account
of there being no other work on which
they are required at the time.

I have the honor to

to 1937 G.O., Ld J. S. Wilson
offg Engr.

Copy submitted to the Chief Engineer
P. W. Dept for information with reference
to G.O. No. 2663 W. of 23-9-89.

1st November 1889
J. L. Russell Major &
Superintending Engineer
for Circle

To

W.

Returned with the following

remarks:-

Item 2 of Summary para 2 of

Examiner's Office Note No. 1319

dated 13th July 1889.

2.

Nothing further required

Item 16 of Summary para 11

of Examiner's Office Note

3.

The Executive Engineer's
reply is not to the point. The
question is not whether materials are
or are not transferred for general
purposes, but whether materials obtained
for general purposes are improperly
charged off to particular works,

inst.

instead of to suspense, at a time
when it is impossible to say how they
will really be used, with the result
that frequent transfers between works
become necessary. From the Executive
Engineer's previous remarks about
stacking materials for several works
together it seems pretty clear that
this is the case. It also seems
clear that if there is any thing in
the circumstances of his division which
necessitates a procedure resulting in
in a (as compared with other divisions)
quite abnormal number of transfers
between works, the Executive Engineer
ought to be able to explain what
the cause is. His previous statement
that it cannot be avoided because
it is done in each case under his
special orders is apparently no ex-
planation at all.
