can be with a coat
of tar.

The difference in the construction
between the designs
submitted for execution
and the Standard design
lies in the substitution of
concrete entirely, for brick
in much but an concrete
and in the substitution
of burnt stone in mortar
for brick in much for
the walls the thickness
of which has necessarily
to be increased from
10" to 1-3". The rate for
brick in much given
in the schedule is Rs 9-8
per 1000 ft. the rate quoted
in the Est. for burnt
stone in mortar is Rs 4
per 1000 ft. and no reason
is assigned for using
the more expensive material.

As far as can be checked
the rates quoted in the Est.
are fair.

The plan of one
unit is 314 sq. ft. and
will cost Rs 1-3-10 per sq. ft.
or Rs 377-0-4 per unit.

Contingencies & Taxes
supervision are provided
for at 2% & 2 1/2% respectively.

The plan & Estimation
have been compared
by the Inspector General
of this and approved
in the previous Report:-

The reason given in
the Sept. 7. Police letter
No 1059 of 7. Nov. 19.
I think the attention
from brick in much
there are without
the additional cost
in the present estimate
may be a relief.
