GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers :—

G.O., dated 8th November 1889, No. 1906, Judicial.

Read—the following papers :—

From the District Magistrate, North Arcot, dated 12th September and 20th October 1889, Nos. 1753 and 2025.

Order—dated 8th November 1889, No. 1906, Judicial.

The portion of the Commissariat godowns in the Vellore Fort now used as a sub-jail was obtained from the Military Department in 1864, and before it can be again made over to that department, due provision for the sub-jail must be made elsewhere. Whether the old bastion cells can be made fit for the purpose cannot be determined without a plan of the cells. The Public Works Department will be requested to submit the necessary plans, work, if already commenced, being stayed pending further orders.

(True Extract.)

(Signed) A. G. CARDEW,
Under-Secretary.

G.O., dated 31st January 1890, No. 155, Judicial.

Read—again G.O., dated 8th November 1889, No. 1906, Judicial.

Read—also the following endorsement of the Public Works Department, dated 2nd December 1889, No. 5617 C., transferring letter from the Superintending Engineer, V Circle, dated 27th November 1889, No. 5731, forwarding the plan of the bastion cells, Vellore Fort.

Reference to the District Magistrate, North Arcot, dated 13th December 1889.

The plan of the bastion cells will be forwarded to the District Magistrate, North Arcot, for early report as to whether the cells, with the improvements proposed to be made, will be fit to be used as a sub-jail.

2. The cells seem to consist of a narrow closed verandah-like structure against the rampart. A wall is to be built in front and the spaces between the stone pillars are to be opened out and cross walls built dividing the whole length of 165 feet into four wards each with a door and two windows. These wards will apparently be almost entirely without ventilation and some further provision must be made in this respect before the cells can be rendered fit for occupation. The District Magistrate will report on this matter and as to the arrangements for out-buildings.

Endorsement of the Public Works Department, dated 31st December 1889 No. 6009, C., forwarding letter from the Superintending Engineer, V Circle, dated 18th December 1889, No. 6160.

From the Collector and District Magistrate, North Arcot, dated 14th January 1890, No. 26.

I have the honor to acknowledge the receipt of Government reference on C. No. 4466 dated 13th ultimo, and to report that if the doors of the proposed sub-jail be made of open iron bars and the breadth of the windows increased, there will be sufficient ventilation.

2. With regard to out-buildings, I beg to report that there are at present some sheds (not shown in the plan) against the circular inner rampart shown in the plan and these will do well as cook-rooms without further expense. The present sub-jail has a latrine attached thereto, but it is too far off to be used in connection with the new sub-jail. It should therefore be abandoned and in its stead I have the honor to recommend that the buildings shown in the left hand corner of the plan between the two ramparts may be converted into a latrine.

3. The plan and the estimate received with your reference under reply are returned herewith.

Order—dated 31st January 1890, No. 155, Judicial.

The proposals of the District Magistrate as to the cook-room and latrine and the use of the buildings as a sub-jail are approved and the Public Works Department will be requested to carry out the work urgently in view to the other buildings being made over to the Military Department. The Public Works Department will also be requested to make further provision, if practicable, for ventilation by the opening under the eave of the stone roof, as suggested by the District Magistrate, or if this is not practicable, in some other way.

(True Extract.)

(Signed) A. G. CARDEW,
Under-Secretary.

ORDER—dated 6th February 1890, No. 399 W., Public Works.

Communicated to the Superintending Engineer, V Circle, who will make arrangements to carry out the work as expeditiously as possible.

2. The proposals of the District Magistrate with regard to the cook-room and latrine should be carried out, and the necessary ventilation should be made as suggested by the Judicial Department.

3. The Superintending Engineer will submit a revised estimate for the sanction of Government should the alterations proposed in para. 2 of the Proceedings increase the cost to more than Rs. 2,500.

4. A sum of Rs. 2,410 was provided for the work in G.O., No. 3277 W., dated 18th November 1889, of which Rs. 1,900 were subsequently surrendered—*vide* G.O., No. 259 W., dated 27th January 1890. The Superintending Engineer will report whether any additional funds can be spent on the work during the current official year.
