30TH JANUARY 1890, No. 90, REVENUE.

GOVERNMENT OF MADRAS.
REVENUE DEPARTMENT.

Read—again the following G.O., dated 11th December 1889, No. 8011, Mis., Revenue :—

Read—the following letter from the Superintending Engineer, II Circle, dated 13th November 1889, No. 363-G.L. :—

With reference to G.O., No. 2710-W., of the 27th September 1889, communicating reports on experiments made in New South Wales for the destruction of the prickly-pear by means of the "Scrub Exterminator" manufactured by Messrs. Taylor, Murchison and Sharpe of Melbourne, I have the honor to request you will be good enough to obtain and supply me with a small quantity of the above for the destruction of the prickly-pear on bushes in the bed of the Pennér river above Sangam anicut in the Nellore district.

No. 5445-C.

Memorandum.

Referred to the Revenue Department with advertence to G.O., No. 764, dated 6th September 1889, for favor of information whether it is proposed to give the "Scrub Exterminator" a trial in this country. The papers do not show whether the manufacturers have Indian agents, and if the order must be sent to Melbourne it would perhaps be desirable, after ascertaining the wishes of the Board of Revenue and the Local and Municipal Department, to obtain an experimental supply for use by the several departments.

(By order.)

MADRAS, (Signed) W. L. C. BADDELEY, Captain, R.E.,
21st November 1889. Under Secretary to Govt., P.W.D.

Endorsement—dated 11th December 1889, No. 8011, Mis., Revenue.

Referred to the Commissioner of Revenue Settlement, Land Records and Agriculture and to the Government Botanist for an expression of their opinion.

(True Extract.)

(Signed) J. GROSE,
Ag. Secretary to Government.

To the Commissioner of Revenue Settlement, Land Records and Agriculture,
with enclosures (in original) to be returned.
,, the Government Botanist.

Read—also the following letter from M. A. LAWSON, Esq., Government Botanist and Director of Government Cinchona Plantations, &c., Nilgiris, to the Secretary to Government, Revenue Department, dated Ootacamund, 18th December 1889, No. 58 :—

With reference to G.O., No. 8011, dated the 11th December 1889, Revenue, relating to the destruction of prickly-pear by the Australian Scrub Exterminator, I have the honor to say that I do not know anything of the effects produced by this apparatus, except from what I have read in G.O., No. 764, of 6th September 1889,

Revenue. I was, however, much impressed by the practical and apparently unexaggerated tone of Mr. Rudder's reports, and I think it would be very well for Government to institute experiments at first upon a small scale, and afterwards, if they should prove successful, on a larger scale.

2. The points to be especially attended to would appear to be the following :—

- (1) To find out the smallest amount of the chemical which it is necessary to use in a given amount of water.
- (2) To take care that the application of the solution is made in the hottest and driest weather.

READ—also the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 7th January 1890, No. 17, Mis. :—

MR. CLOGSTOUN.

Read—endorsement from Government, Revenue Department, dated 11th December 1889, No. 8011.

Resolution—dated 7th January 1890, No. 17, Mis.

The Board is of opinion that some small experiments with the "Serub Exterminator" might be usefully made in this Presidency if, on reference to the Agricultural Department of Victoria, the manufacturers' reports of its value are confirmed.

(A true Extract.)

(Signed) P. RAJARATNA MUDALIAR,
Secretary.

To the Secretary to Government, Revenue Department.

ORDER—dated 30th January 1890, No. 90, Revenue.

Miscellaneous.

The Government considers that, before making any experiments in this Presidency with the Serub Exterminator, it is desirable to obtain an official expression of opinion from the Governments of Victoria and New South Wales regarding the utility of the chemical, and resolves to address the Governments of those Colonies accordingly.
