11TH FEBRUARY 1890, No. 302 L., LOCAL AND MUNICIPAL.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

G.O., dated 28th January 1890, No. 283 W., Public Works.

Read—the following papers :—

Letter from the President, District Board, Vizagapatam, dated 15th December 1889, No. 1007.

With reference to G.O., dated 6th August 1889, No. 1735 L., I have the honor to state that the Local Fund Engineering Department calls my attention to the fact that, for spreading and tamping metal and gravel, the Public Works Department charges a fixed rate per superficial area, whereas the Local Fund Engineering Department charges for cubic contents of the material laid down. It is obvious that, say, 9 inches of metal would take more tamping, watering, &c., than 2 inches, and I in consequence do not see how to carry out the instructions contained in the Government Order under reference without interfering with the efficiency of the work done. As regards these items, I request instructions as to what course I should adopt.

Endorsement thereon in the Local and Municipal Department, dated 17th January 1890, No. 15, transferring the above.

Note by the Acting Chief Engineer, Public Works Department, dated 21st January 1890, No. —.

The main point is that the unit for spreading and tamping must be the square of 100 s. feet, and so long as this unit is adhered to, there is no objection to increased rates in cases where the metal or sand has been put on in layers, each layer being separately spread and tamped.

Order—dated 28th January 1890, No. 283 W., Public Works.

The foregoing note by the Chief Engineer will be communicated to the Local and Municipal Department.

(True Extract)
