6TH MARCH 1890, No. 714 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Account.

READ—the following papers:—

From A. A. JOPP, Esq., Director-General of Stores, to the Secretary to the Government of Madras, Public Works Department, dated India Office, Whitehall, S. W., 31st January 1890, No. S. 1248.

Referring to the demand in Madras Public Works urgent indent No. 13, dated 8th October 1889, for a 10 horse-power Cornish boiler and an 8 horse-power horizontal engine for the Government Press, which were ordered on the 10th December 1889 of Messrs. Marshall Sons and Co. (Limited), I have the honor to inform you that, without information as to the positions which the engine and boiler are to occupy, connecting pipes cannot be supplied.

2. To enable you to determine the length, &c., of these pipes and whether they should be supplied from England, or obtained locally, I enclose drawings supplied by Messrs Marshall Sons and Co., and I am to ask that I may be acquainted with your decision at the earliest possible date.

No. 980 C.

Referred to the Superintending Engineer, V Circle, for favor of very early report.

CHEPAK,
21st February 1890.

(Signed) R. R. E. DRAKE-BROCKMAN, Lt.-Col., R.E.,
Ag. Joint Secy. to Govt., P.W.D.

From Lieut.-Colonel S. C. CLARKE, R.E., General Superintendent, Public Works Stores, &c., to the Superintending Engineer, V Circle, dated Madras, 26th February 1890, No. 1669 S.

With reference to your No. 7497 of the 24th instant, together with the Government No. 1256 W., of the 21st instant, and tracings of engine and boiler, I have the honor to request that the following information (paragraph 3) may be wired to London, since it is of the utmost importance that the engine, &c., should be set up *in situ* as soon as possible.

2. The delay in receiving the said articles is most vexatious and will put the Superintendent of the Government Press to very great inconvenience, for his presses are now scattered all over the premises.

3. "Please despatch the 10 horse-power Cornish boiler and 8 horse-power horizontal engine with fittings and about 40 running feet of steam pipe, together with 4 elbow pieces. The Public Works Workshops can undertake the fitting together of connections as may be found necessary."

4. If the Government can allow this office to retain the tracings, I shall be able, at any rate, to proceed with forming the bedding, &c., and thus save time as far as possible.

6TH MARCH 1890, No. 714 W., PUBLIC WORKS.

5. I may here remark that I have determined on setting up the engine and boiler, parallel to each other, as the space in rear of the press room will not allow of their being placed in any other position.

6. The enclosures of your letters are herewith returned.

P.S.—A tracing is enclosed showing the proposed positions of the engine and boiler.

No. 7666.

Forwarded to the Chief Engineer, Public Works Department, having reference to his endorsement No. 980 C., dated 21st February 1890, which is herewith returned with the two drawings therewith received.

2. Return of these two drawings is requested with reference to paragraph 4 of the General Superintendent's letter.

1st March 1890.

(Signed) W. H. BURTON, Colonel, R.E.,
Superintending Engineer, V Circle.

ORDER—dated 6th March 1890, No. 714 W., Public Works.

The Government considers that to save time it will be advisable to procure the steam piping locally. The General Superintendent, Public Works Stores, will at once submit an application for its purchase either at Bombay or Madras.

2. The following telegram will be despatched to the Director-General of Stores, India Office:—

"Your letter of 31st January last.

"Please despatch immediately engine and boiler for Government Press. Connections will be supplied here."

3. The tracings will be forwarded to the General Superintendent, Public Works Stores.

(True Extract.)

Captain, R.E.,
Under-Secy. to Govt., P.W.D.

To the Superintending Engineer, V Circle, with three tracings.

From Lieut Col S. B. Clarke R.E.
General Superintendent,
Public Works Stores &c.

To
The Superintending Engineer
5th mile, Chepauk
Madras

Sir

With reference to your No 7497
of the 24th Instant, together with the
Government No 1256 W of the 21st Instant
and Drawings of Engine and Boilers I
have the honor to request that the
following information (para 3) may
be wired to London, since it is of
the utmost importance that the Engine
&c. should be set up in situ, as soon
as possible.

2. The delay in receiving the said
articles, is most vexatious, and will
put the Superintendent of the Government
Press, to very great inconvenience, for
his Presses are now scattered all
over the Premises.

3. Please despatch the 10 H.P. Cornish
Boiler and 8 H.P. Horizontal Engine with
fittings and about 40 Rq. Feet of Steam
pipe, together with 4 Elbow pieces. The
Public Works Workshops can undertake
the fitting together, of connections, as

may

may be found necessary."

4. If the Government can allow this office to retain the tracings, I shall be able, at any rate, to proceed with forming the bedding &c, and thus save time, as far as possible.

5. I may here remark that I have determined on setting up the Engine and Boilers, parallel to each other, as the space in rear of the Press Room, will not allow of their being placed in any other position.

6. The Enclosures of your letters are herewith returned:

I have the honor to be &c.
